The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

		<p>réaliser des acquisitions, et le fait de réaliser ou d'éviter des acquisitions pourrait nuire fortement aux résultats des opérations de Deutsche Bank ainsi qu'à son cours boursier.</p> <ul style="list-style-type: none"> • Les effets du rachat de Deutsche Postbank AG pourraient être très différents de ce à quoi Deutsche Bank s'attend. • Certains événements au sein d'entreprises dans lesquelles Deutsche Bank a investi pourraient rendre plus difficile la vente des participations de la Banque et conduire à de lourdes pertes indépendamment de l'évolution du marché. • Une concurrence féroce, tant nationale en Allemagne que sur les marchés internationaux, pourrait affecter défavorablement les revenus et la rentabilité de Deutsche Bank. • Des transactions avec des contreparties dans des pays identifiés par le Département d'Etat américain comme Etats soutenant le terrorisme pourraient conduire les clients et investisseurs potentiels à se détourner de Deutsche Bank et à ne pas investir dans ses valeurs mobilières.
<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
<p>D.3</p>	<p>Key information on the risks that are specific and individual to the securities.</p>	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Emetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Emetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depositary, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Emetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

		<p>et pourraient continuer à générer des pertes importantes pour Deutsche Bank en raison des fluctuations de marché.</p> <ul style="list-style-type: none"> • Deutsche Bank a subi des pertes, et pourrait en subir davantage en raison de changements dans la juste valeur de ses instruments financiers. • Une situation économique défavorable a conduit et pourrait de nouveau conduire à des pertes de crédit pour Deutsche Bank. • Même lorsque des pertes concernent les comptes des clients de Deutsche Bank, ils pourraient ne pas rembourser la Banque, ce qui réduirait les volumes d'activités client et entraînerait de lourdes pertes pour Deutsche Bank, ce qui pourrait nuire à sa réputation. • Les revenus de l'activité banque d'investissement de Deutsche Bank pourraient chuter en raison des conditions économiques et de marché défavorables. • Les activités de courtage et autres services rémunérés sur la base de commissions/frais de Deutsche Bank pourraient générer des revenus plus faibles. • Les politiques, procédures et méthodes de gestion des risques de la Banque la laissent exposée à des risques non identifiés et imprévus, ce qui peut conduire à des pertes importantes. • Les activités de crédit non traditionnelles de Deutsche Bank participent significativement aux risques de crédit de son activité bancaire traditionnelle. • Deutsche Bank exerce ses activités dans un environnement de plus en plus réglementé et litigieux, ce qui l'expose potentiellement à des recours en responsabilité et à d'autres coûts, dont le montant est difficile à évaluer. • Les réformes réglementaires mises en œuvre et proposées en réponse à la crise financière mondiale et à la crise de la dette souveraine en Europe (en plus des exigences supplémentaires en matière de capital) pourraient affecter le modèle commercial et l'environnement concurrentiel de Deutsche Bank de manière significative. • Deutsche Bank a fait l'objet de poursuites et de revendications contractuelles au titre de ses activités de crédit hypothécaire résidentiel aux Etats-Unis qui pourraient avoir des effets défavorables significatifs sur les résultats ou la réputation de la Banque. • Des risques opérationnels pourraient perturber les activités de Deutsche Bank. • La taille des opérations de compensations de Deutsche Bank l'expose à un risque plus élevé de pertes importantes en cas de dysfonctionnement de ces opérations. • Si Deutsche Bank ne parvient pas à mettre en œuvre ses projets stratégiques, la Banque pourrait ne pas atteindre ses objectifs financiers, ou subir des pertes ou une faible rentabilité, ce qui pourrait affecter le cours de l'action de la Banque de manière significative et défavorable. • Deutsche Bank pourrait avoir du mal à identifier et à

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.

The Bank reaffirmed its commitment to the universal banking model and to its four existing corporate divisions. Deutsche Bank strengthened this emphasis with an integrated Asset & Wealth Management Corporate Division that includes former Corporate Banking & Securities businesses such as exchange-traded funds (ETFs). Furthermore, the Bank created a Non-Core Operations Unit. This unit includes the former Group Division Corporate Investments (CI) as well as non-core operations which were re-assigned from other corporate divisions.</p> <p>As of 31 December 2012 the Bank was organized into the following five corporate divisions:</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management (AWM) — Private & Business Clients (PBC) — Non-Core Operations Unit (NCOU) <p>Corporate Banking & Securities (CB&S) is made up of the business divisions Corporate Finance and Markets. These businesses offer financial products worldwide including the underwriting of stocks and bonds, trading services for investors and the tailoring of solutions for companies' financial requirements. Effective in November 2012, following a comprehensive strategic review of the Group's organizational structure, CB&S was realigned as part of the Group's new banking model. This realignment covered three main aspects: the transfer of non-core assets (namely correlation and capital intensive securitization positions, monoline positions, and IAS 39 reclassified assets) to the NCOU; the transfer of passive and third-party alternatives businesses, such as ETF's, into the newly integrated AWM Corporate Division; and a refinement of coverage costs between CB&S and GTB.</p> <p>Global Transaction Banking (GTB) delivers commercial banking products and services to corporate clients and financial institutions, including domestic and cross-border payments, financing for international trade, as well as the provision of trust, agency, depository, custody and related services. GTB's business divisions consist of Trade Finance and Cash Management Corporates as well as Trust & Securities Services and Cash Management Financial Institutions.</p> <p>Asset and Wealth Management (AWM) is one of the world's leading investment organizations. AWM helps individuals and institutions worldwide to protect and grow their wealth, offering traditional and alternative investments across all major asset classes. AWM also provides customized wealth management solutions and private banking services to high-net-worth and ultra-high-networth individuals and family offices.</p> <p>AWM comprises former Private Wealth Management (PWM) and Asset Management (AM) businesses as well as passive and third party alternatives businesses that were re-assigned from CB&S to AWM in the fourth quarter 2012. The combined division has sizable franchises in both retail and institutional asset and wealth management, allowing both clients and Deutsche Bank Group to benefit from its scale. In addition, non-core assets and businesses were re-assigned from AWM to the NCOU in the fourth quarter 2012. AWM now consists of two major pillars: Investment Platform and Coverage/Advisory.</p> <p>Private & Business Clients (PBC) operates under a single business model across Europe and selected Asian markets. PBC serves retail and affluent clients as well as small and medium sized business customers. The PBC Corporate Division is organized into the following business units:</p> <ul style="list-style-type: none"> — Advisory Banking Germany, which comprises all of PBC's activities in Germany excluding Postbank. — Advisory Banking International, which covers PBC's European activities outside Germany and PBC's

		<p>activities in Asia including our stake in and partnership with Hua Xia Bank.</p> <p>— Consumer Banking Germany, which mainly comprises the contribution of Postbank Group to the consolidated results of Deutsche Bank.</p> <p>Non-Core Operations Unit (NCOU) was established in November 2012. The NCOU operates as a separate corporate division alongside Deutsche Bank's core businesses.</p> <p>In addition to managing its global principal investments and holding certain other non-core assets to maturity, targeted de-risking activities within the NCOU will help the Bank reduce risks that are not related to its planned future strategy, thereby reducing capital demand. In carrying out these targeted de-risking activities, the NCOU will prioritize for exit those positions with less favorable capital and risk return profiles to enable the Bank to strengthen its Core Tier 1 capital ratio under Basel 3.</p>

Element	Section D – Risks
----------------	--------------------------

<p>D.2</p>	<p>Key information on the key risks that are specific and individual to the issuer.</p>	<p>Investors will be exposed to the risk of Deutsche Bank as the Issuer becoming insolvent and thus over indebted or unable to pay debts, i.e. a temporary or permanent inability to meet interest and/or principal payments on time. Deutsche Bank's credit rating reflects the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Deutsche Bank has been and may continue to be affected by the ongoing European sovereign debt crisis, and it may be required to take impairments on the Bank's exposures to the sovereign debt of Greece and other countries. The credit default swaps Deutsche Bank has entered into to manage sovereign credit risk may not be available to offset these losses. • Regulatory and political actions by European governments in response to the sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. The departure of any one or more countries from the euro could have unpredictable consequences on the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks are limited. • The Bank's results are dependent on the macroeconomic environment and the Bank has been and may continue to be affected by the macroeconomic effects of the ongoing European sovereign debt crisis, including renewed concerns about the risk of a return to recession within the eurozone, as well as by lingering effects of the recent global financial crisis of 2007-2008. • Deutsche Bank requires capital to support its business activities and meet regulatory requirements. Regulatory capital and liquidity requirements are being increased significantly. Surcharges for systemically important banks like Deutsche Bank are being imposed and definitions of capital are being tightened. In addition, any losses resulting from current market conditions or otherwise could diminish the Bank's capital, make it more difficult for Deutsche Bank to raise additional capital or increase the cost to the Bank of new capital. Any perception in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer could have the effect of intensifying the effect of these factors on Deutsche Bank. • Deutsche Bank has a continuous demand for liquidity to fund its business activities, and may be limited in its ability to access the capital markets for liquidity and to fund assets in the current market environment. In addition, the Bank may suffer during periods of market-wide or firm specific liquidity constraints and is exposed to the risk that liquidity is not made available to it even if the Bank's underlying business remains strong. • Protracted market declines have reduced and may in the future reduce available liquidity in the markets, making it harder to sell assets and possibly leading to material losses. • Market declines and volatility on the markets can materially and adversely affect Deutsche Bank's revenues and profits. • Deutsche Bank has incurred and may in the future continue to incur significant losses from its trading and investment activities due to market fluctuations. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Adverse economic conditions have caused and may in the future cause Deutsche Bank to incur higher credit losses. • Even where losses are for Deutsche Bank's clients' accounts, they may fail to repay Deutsche Bank, leading to decreased volumes of client business and material losses for Deutsche Bank, and its reputation can be harmed. • Deutsche Bank investment banking revenues may decline as a result of adverse market or economic conditions. • Deutsche Bank may generate lower revenues from brokerage and other commission- and fee-based businesses. • The Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses. • Deutsche Bank's non-traditional credit businesses materially add to its

		<p>traditional banking credit risks.</p> <ul style="list-style-type: none"> • Deutsche Bank operates in an increasingly regulated and litigious environment, potentially exposing it to liability claims and other costs, the amounts of which may be difficult to estimate. • Regulatory reforms enacted and proposed in response to the global financial crisis and the European sovereign debt crisis (in addition to increased capital requirements) may significantly affect Deutsche Bank's business model and the competitive environment. • Deutsche Bank has been subject to contractual claims and litigation in respect of its U.S. residential mortgage loan business that may materially and adversely affect the Bank's results or reputation. • Operational risks may disrupt Deutsche Bank's business. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • If Deutsche Bank is unable to implement its strategic initiatives, the Bank may be unable to achieve its financial objectives, or incur losses or low profitability, and the Bank's share price may be materially and adversely affected. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • The effects of the takeover of Deutsche Postbank AG may differ materially from Deutsche Bank's expectations. • Events at companies in which Deutsche Bank has invested may make it harder to sell the Bank's holdings and result in material losses irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact its revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities.
D.3	Key information on the risks that are specific and individual to the securities.	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective exchange rate.</p> <p>Currency risks</p> <p>As the currency of the Underlying is not the same as the Settlement Currency of the Security, investors are exposed to the risk of adverse changes in exchange rates both during the term and at maturity.</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p>

		<p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Risks at maturity</p> <hr/> <p>If the Underlying reaches or exceeds the Barrier at any time during the Observation Period (Barrier Event), the term of the Turbo Put Warrant ends immediately and investors will only receive the Minimum Amount. A price recovery is then ruled out. In this case investors will lose their entire investment. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Put Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Put Warrant.</p>
D.6	Risk warning to the effect that investors may lose the value of their entire investment or part of it	Where no minimum amount(s) of cash or assets to be payable or deliverable is specified, investors may experience a total or partial loss of their investment in the Security.

B.15	Principales activités de l'Émetteur	A l'issue d'une étude stratégique globale, Deutsche Bank a révisé sa structure organisationnelle au cours du quatrième trimestre 2012. La Banque a réaffirmé son attachement à un modèle de banque universelle et à une répartition de ses activités entre les quatre divisions existantes. Deutsche Bank a renforcé cette															

		<p>orientation avec une division Asset & Wealth Management – Corporate (Gestion de Patrimoine), qui intègre à présent les activités Corporate Banking & Securities portant, par exemple, sur les trackers (ETF). En outre, elle a créé la division Non-Core Operations Unit (Activités non stratégiques), qui regroupe l'ancienne division Corporate Investment (Investissements d'entreprise) (CI) ainsi que des activités non stratégiques jusqu'alors exercées par d'autres divisions.</p> <p>Depuis le 31 décembre 2012, les activités de Deutsche Bank sont réparties en cinq divisions :</p> <ul style="list-style-type: none"> — Corporate Banking & Securities (CB&S) — Global Transaction Banking (GTB) — Asset & Wealth Management – AWM (Gestion de patrimoine) — Private & Business Clients – PBC (Clients privés et professionnels) — Non-Core Operations Unit – NCOU (Activités non stratégiques) <p>La division Corporate Banking & Securities (CB&S) regroupe les activités liées au financement des entreprises et aux marchés financiers. Elle propose des produits financiers dans le monde entier et, notamment, des services de prise ferme ou de placement d'actions et d'obligations, des services de courtage pour les investisseurs et des solutions de financement pour les entreprises. En novembre 2012, à l'issue d'une étude stratégique globale de la structure organisationnelle du Groupe, les activités de la division CB&S ont été redéfinies dans le cadre du nouveau modèle bancaire du Groupe. Cette restructuration s'est effectuée selon les trois principaux axes suivants : le transfert à la division NCOU des actifs non stratégiques (à savoir les positions de titrisation à forte corrélation et à forte intensité en capital, les positions sur les sociétés de rehaussement de crédit et les actifs ayant fait l'objet d'un reclassement selon la norme IAS 39), le transfert à la nouvelle division AWM des activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, comme l'activité trackers (ETF), et un ajustement de la répartition des coûts de couverture entre CB&S et GTB.</p> <p>La division Global Transaction Banking (GTB) propose des produits et services de banque commerciale aux entreprises et aux établissements financiers, notamment des services de paiement nationaux et transfrontaliers, des services de financement du commerce international ainsi que des services de fiducie, de mandataire, de dépositaire, de garde et des services connexes. La division GTB regroupe les activités Trade Finance, Cash Management Corporates, Trust & Securities Services et Cash Management Financial Institutions.</p> <p>La division Asset and Wealth Management (AWM) est l'une des principales organisations mondiales d'investissement. Elle aide les personnes physiques et morales du monde entier à protéger et à faire fructifier leur patrimoine en proposant des investissements classiques ou alternatifs dans toutes les grandes classes d'actifs. Elle offre également des solutions et services personnalisés de gestion de patrimoine aux personnes très fortunées et extrêmement fortunées ainsi qu'aux bureaux de gestion de patrimoine (family offices).</p>

		<p>AWM regroupe les activités des anciennes unités Private Wealth Management (PWM) et Asset Management (AM) et, depuis le quatrième trimestre 2012, les activités liées à la gestion de fonds passifs et aux actifs alternatifs de tierces parties, qui, précédemment, étaient exercées par la division CB&S. La nouvelle division jouit d'une excellente position sur le marché de la gestion de patrimoine des particuliers et des investisseurs institutionnels et permet, tant à ses clients qu'au groupe Deutsche Bank de bénéficier de son importance. En outre, les actifs et activités non stratégiques de AWM ont été transférés à la division NCOU au quatrième trimestre 2012. A présent, la division AWM comprend deux principales unités : Investment Platform et Coverage/Advisory.</p> <p>La division Private & Business Clients (PBC) exerce ses activités selon un même modèle en Europe et sur des marchés asiatiques sélectionnés. Elle fournit ses services aux particuliers, y compris aux clients fortunés, ainsi qu'aux entreprises de petite taille et de taille moyenne. Elle comprend les trois unités d'activités ci-dessous :</p> <ul style="list-style-type: none"> — Advisory Banking Germany, qui regroupe toutes les activités de PBC en Allemagne, à l'exclusion des activités de Postbank. — Advisory Banking International, qui regroupe les activités européennes, hors Allemagne, de PBC ainsi que les activités de PBC en Asie, y compris notre participation au capital de la Hua Xia Bank avec laquelle nous entretenons un partenariat. — Consumer Banking Germany, qui comprend essentiellement la contribution du groupe Postbank aux résultats consolidés de Deutsche Bank. <p>La division Non-Core Operations Unit (NCOU) a été créée en novembre 2012 en tant que division distincte, ayant le même statut que les quatre autres divisions de Deutsche Bank axées sur nos métiers stratégiques.</p> <p>Outre la gestion de ses investissements majeurs mondiaux et la conservation d'actifs non stratégiques jusqu'à l'échéance, NCOU réalise des opérations ciblées de réduction des risques qui aideront Deutsche Bank à réduire les risques non liés à son plan stratégique et, par conséquent, ses besoins en fonds propres. Dans le domaine de la réduction des risques, NCOU privilégiera le dénouement des positions qui présentent les profils risques-rendement les moins favorables pour nous permettre d'améliorer notre ratio de fonds propres « Core Tier 1 » dans le cadre de la réglementation Bâle III.</p>

Elément	Section D – Risques	
D.2	Informations clés sur les principaux risques spécifiques et propres à l'émetteur.	<p>Les investisseurs seront exposés au risque d'insolvabilité de Deutsche Bank en tant qu'Emetteur qui serait alors surendetté et incapable de rembourser ses dettes (incapacité temporaire ou permanente de respecter les délais/dates de paiement des intérêts et/ou du principal). La notation de crédit de Deutsche Bank reflète l'évaluation de ces risques.</p> <p>Le facteurs pouvant nuire à la rentabilité de Deutsche Bank sont décrit ci-dessous:</p> <ul style="list-style-type: none"> • Deutsche Bank a été affecté et pourrait continuer à pâtir de la crise de la dette souveraine en Europe et il pourrait

		<p>s'avérer nécessaire de provisionner la dépréciation des expositions de la Banque à la dette souveraine de la Grèce et d'autres pays. Les swaps de défaut de crédit dans lesquels Deutsche Bank a investi pour gérer le risque de la dette souveraine pourraient ne pas compenser ces pertes.</p> <ul style="list-style-type: none"> • Les mesures réglementaires et politiques prises par les gouvernements européens en réponse à la crise de la dette souveraine pourraient ne pas suffire à éviter la contagion ou à empêcher un ou plusieurs pays membres de quitter la monnaie unique. Le départ d'un ou de plusieurs pays de l'euro pourrait avoir des conséquences imprévisibles sur le système financier et l'économie dans son ensemble, conduisant potentiellement à une diminution des activités commerciales, à des dépréciations d'actifs et à des pertes dans les activités de Deutsche Bank. La capacité de Deutsche Bank à se protéger contre ces risques est limitée. • Les résultats de la Banque dépendent de la conjoncture et la Banque a été affectée et pourrait continuer à pâtir des effets macroéconomiques de la crise actuelle de la dette souveraine en Europe, qui comprennent les inquiétudes concernant le risque d'une nouvelle récession dans la zone euro, ainsi que des effets persistants de la récente crise financière mondiale de 2007-2008. • Deutsche Bank a besoin de capital pour soutenir ses activités et se conformer aux exigences réglementaires. Les exigences en matière de capital et de liquidités ont considérablement augmenté. Des exigences supplémentaires pour les banques d'importance systémique comme Deutsche Bank sont imposées et les définitions du capital sont plus strictes. De plus, toutes pertes résultant des conditions de marché ou autre pourrait diminuer le capital de la Banque, rendre plus difficile une levée de capital supplémentaire pour Deutsche Bank ou augmenter le coût de nouveau capital pour la Banque. Si Deutsche Bank est perçue par le marché comme incapable de respecter les exigences en matière de capital avec une marge suffisante, les effets de ces facteurs sur Deutsche Bank pourraient s'intensifier. • Deutsche Bank a un besoin continu de liquidités pour financer ses activités, et sa capacité à accéder aux marchés de capitaux pour obtenir des liquidités et financer ses actifs pourrait être limitée dans les conditions de marché actuelles. En outre, la Banque pourrait souffrir en période de contraintes de liquidités pour les entreprises tout en étant exposée au risque de ne pas disposer de liquidités même si les activités sous-jacentes de la Banques restent solides. • Les périodes prolongées de recul des marchés ont réduit et pourraient réduire les liquidités disponibles dans les mois à venir sur les marchés, rendant les ventes d'actifs plus difficiles et pouvant conduire à des pertes considérables. • Les reculs des marchés et la volatilité peuvent affecter de manière significative et défavorable les revenus et les bénéfices de Deutsche Bank. • Les activités de négociation et d'investissement ont généré,

<p>D.3</p>	<p>Informations clés sur les principaux risques spécifiques et propres aux valeurs mobilières.</p>	<p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou suite à l'exercice ou l'échéance des Valeurs mobilières, selon le cas, sont liés à l'Instrument sous-jacent qui peut comprendre un ou plusieurs Elément(s) de référence. L'achat de, ou le placement dans, des Valeurs mobilières liées à l'Instrument sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience de valeurs mobilières similaires aux Valeurs mobilières et devrait avoir consulté toute la documentation et comprendre les Conditions générales relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Nous incitons les investisseurs potentiels à s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, à se rapprocher de leur(s) conseiller(s).</p> <p>Risques associés à l'Instrument sous-jacent</p> <p>En raison de l'influence de l'Instrument sous-jacent sur les droits afférents à la Valeur mobilière, comme avec un investissement direct dans l'Instrument sous-jacent, les investisseurs sont exposés à des risques pendant sa durée de vie et jusqu'à son échéance, qui sont généralement également associés à un placement direct dans le taux de change</p> <p>Risques de change</p> <p>Comme la monnaie de l'Instrument sous-jacent n'est pas la même que la Monnaie de règlement de la Valeur mobilière, les investisseurs sont exposés au risque de modifications défavorables des taux de change à la fois durant la période et</p>

		<p>à l'échéance. Les investisseurs sont également exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie de la juridiction de la résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Les Conditions générales des Valeurs mobilières stipulent qu'à l'initiative de l'Emetteur ou autrement sous certaines conditions, l'Emetteur peut racheter ou annuler les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières qui ne comportent pas ce droit de rachat ou d'annulation de l'Emetteur. Pendant la période de rachat ou d'annulation potentiel(le) des Valeurs mobilières de cette manière, la valeur de marché de ces Valeurs mobilières n'excède généralement pas le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Conditions générales des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Risques à l'échéance</p> <hr/> <p>Si pendant la Période d'observation, l'Instrument sous-jacent atteint ou dépasse la Barrière (Barrier Event), le Turbo Put Warrant arrive immédiatement à échéance et les investisseurs ne recevront que le Montant minimal. Un rebond du prix n'est alors plus envisageable. Les investisseurs perdront alors la quasi-totalité de leur placement. Les investisseurs subiront également une perte si, à la Date de valorisation, l'Instrument sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Put Warrant. Le Barrier Event peut survenir à tout moment pendant les heures de négociation de l'Instrument sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Put Warrant.</p>
D.6	Avertissement concernant le risque pour les investisseurs de perte de tout ou partie de la valeur de leur placement	Lorsque aucun montant minimum d'espèces ou d'actifs à payer ou à livrer n'est spécifié, les investisseurs pourraient subir une perte partielle ou totale de leur investissement dans la Valeur mobilière.
