In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

|---------|-------------------|
| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. | Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|------------|---|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.2 | Monnaie | Euro ("EUR") |
| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. La constitution des Valeurs mobilières peut être régie par la législation de la juridiction à laquelle est soumis l'Agent de compensation.</p> <p>Droits liés aux Valeurs mobilières</p> <p>Les Valeurs mobilières, lorsqu'elles sont rachetées ou bien exercées par leur détenteur, confèrent également à ce dernier le droit de recevoir un montant en espèces et/ou une livraison physique.</p> <p>Restrictions aux droits liés aux Valeurs mobilières</p> <p>En vertu des conditions énoncées dans les Modalités et les Conditions, l'Emetteur est autorisé à résilier et annuler les Valeurs mobilières et à modifier les Modalités et les Conditions.</p> <p>Statut des Valeurs mobilières</p> <p>Les Valeurs mobilières constitueront des engagements directs, non garantis et non subordonnés de l'Emetteur, qui auront égalité de rang les uns par rapport aux autres et égalité de rang avec tous les autres engagements non garantis et non subordonnés de l'Emetteur, à l'exception des engagements privilégiés par des dispositions légales.</p> |
| C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> | | | | | | | | | | | | | | | | | | | | |

| Elément | Section D – Risques | |
|------------|--|---|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains partis populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |

| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

| C.15 | A description of how the value of the investment is affected by the value of the underlying instrument(s), unless the securities have a denomination of at least EUR 100,000 | <p>Investors can participate more than proportionately (with leverage) in the positive development of the Underlying with this Turbo Infini Call-Warrant with no fixed settlement date.</p> <p>Conversely, investors also participate with leverage in the negative development of the Underlying and additionally bear the risk of the Turbo Infini Call-Warrant's immediately expiring (Barrier Event) if the Underlying at any time during the Observation Period is equal to or below the Barrier. In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |
|--|--|--|

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

| C.15 | A description of how the value of the investment is affected by the value of the underlying instrument(s), unless the securities have a denomination of at least EUR 100,000 | <p>Investors can participate more than proportionately (with leverage) in the positive development of the Underlying with this Turbo Infini Call-Warrant with no fixed settlement date.</p> <p>Conversely, investors also participate with leverage in the negative development of the Underlying and additionally bear the risk of the Turbo Infini Call-Warrant's immediately expiring (Barrier Event) if the Underlying at any time during the Observation Period is equal to or below the Barrier. In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.2 | Monnaie | Euro ("EUR") |
| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. La constitution des Valeurs mobilières peut être régie par la législation de la juridiction à laquelle est soumis l'Agent de compensation.</p> <p>Droits liés aux Valeurs mobilières</p> <p>Les Valeurs mobilières, lorsqu'elles sont rachetées ou bien exercées par leur détenteur, confèrent également à ce dernier le droit de recevoir un montant en espèces et/ou une livraison physique.</p> <p>Restrictions aux droits liés aux Valeurs mobilières</p> <p>En vertu des conditions énoncées dans les Modalités et les Conditions, l'Emetteur est autorisé à résilier et annuler les Valeurs mobilières et à modifier les Modalités et les Conditions.</p> <p>Statut des Valeurs mobilières</p> <p>Les Valeurs mobilières constitueront des engagements directs, non garantis et non subordonnés de l'Emetteur, qui auront égalité de rang les uns par rapport aux autres et égalité de rang avec tous les autres engagements non garantis et non subordonnés de l'Emetteur, à l'exception des engagements privilégiés par des dispositions légales.</p> |
| C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |
|--|--|--|

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

| C.15 | A description of how the value of the investment is affected by the value of the underlying instrument(s), unless the securities have a denomination of at least EUR 100,000 | <p>Investors can participate more than proportionately (with leverage) in the positive development of the Underlying with this Turbo Infini Call-Warrant with no fixed settlement date.</p> <p>Conversely, investors also participate with leverage in the negative development of the Underlying and additionally bear the risk of the Turbo Infini Call-Warrant's immediately expiring (Barrier Event) if the Underlying at any time during the Observation Period is equal to or below the Barrier. In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|-----|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. La constitution des Valeurs mobilières peut être régie par la législation de la juridiction à laquelle est soumis l'Agent de compensation.</p> <p>Droits liés aux Valeurs mobilières</p> <p>Les Valeurs mobilières, lorsqu'elles sont rachetées ou bien exercées par leur détenteur, confèrent également à ce dernier le droit de recevoir un montant en espèces et/ou une livraison physique.</p> <p>Restrictions aux droits liés aux Valeurs mobilières</p> <p>En vertu des conditions énoncées dans les Modalités et les Conditions, l'Emetteur est autorisé à résilier et annuler les Valeurs mobilières et à modifier les Modalités et les Conditions.</p> <p>Statut des Valeurs mobilières</p> <p>Les Valeurs mobilières constitueront des engagements directs, non garantis et non subordonnés de l'Emetteur, qui auront égalité de rang les uns par rapport aux autres et égalité de rang avec tous les autres engagements non garantis et non subordonnés de l'Emetteur, à l'exception des engagements privilégiés par des dispositions légales.</p> |
| C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |
|--|--|--|

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |
|--|--|--|

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

| C.15 | A description of how the value of the investment is affected by the value of the underlying instrument(s), unless the securities have a denomination of at least EUR 100,000 | <p>Investors can participate more than proportionately (with leverage) in the positive development of the Underlying with this Turbo Infini Call-Warrant with no fixed settlement date.</p> <p>Conversely, investors also participate with leverage in the negative development of the Underlying and additionally bear the risk of the Turbo Infini Call-Warrant's immediately expiring (Barrier Event) if the Underlying at any time during the Observation Period is equal to or below the Barrier. In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.2 | Monnaie | Euro ("EUR") |
| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. La constitution des Valeurs mobilières peut être régie par la législation de la juridiction à laquelle est soumis l'Agent de compensation.</p> <p>Droits liés aux Valeurs mobilières</p> <p>Les Valeurs mobilières, lorsqu'elles sont rachetées ou bien exercées par leur détenteur, confèrent également à ce dernier le droit de recevoir un montant en espèces et/ou une livraison physique.</p> <p>Restrictions aux droits liés aux Valeurs mobilières</p> <p>En vertu des conditions énoncées dans les Modalités et les Conditions, l'Emetteur est autorisé à résilier et annuler les Valeurs mobilières et à modifier les Modalités et les Conditions.</p> <p>Statut des Valeurs mobilières</p> <p>Les Valeurs mobilières constitueront des engagements directs, non garantis et non subordonnés de l'Emetteur, qui auront égalité de rang les uns par rapport aux autres et égalité de rang avec tous les autres engagements non garantis et non subordonnés de l'Emetteur, à l'exception des engagements privilégiés par des dispositions légales.</p> |
| C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> | | | | | | | | | | | | | | | | | | | | |

| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |

| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. | C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |
|--|--|--|

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.1 | Nature, catégorie et numéro d'identification des valeurs mobilières | <p>Nature des Valeurs mobilières</p> <p>Aucune Valeur mobilière définitive ne sera émise.</p> <p>Les valeurs mobilières seront émises sous forme dématérialisée.</p> <p>Type de Valeurs mobilières</p> <p>Les Valeurs mobilières sont des Warrants.</p> <p>Numéro(s) d'identification des Valeurs mobilières</p> <p>ISIN: DE000DL5LZV0</p> <p>WKN: DL5LZV</p> |
| C.2 | Monnaie | Euro ("EUR") |
| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. La constitution des Valeurs mobilières peut être régie par la législation de la juridiction à laquelle est soumis l'Agent de compensation.</p> <p>Droits liés aux Valeurs mobilières</p> <p>Les Valeurs mobilières, lorsqu'elles sont rachetées ou bien exercées par leur détenteur, confèrent également à ce dernier le droit de recevoir un montant en espèces et/ou une livraison physique.</p> <p>Restrictions aux droits liés aux Valeurs mobilières</p> <p>En vertu des conditions énoncées dans les Modalités et les Conditions, l'Emetteur est autorisé à résilier et annuler les Valeurs mobilières et à modifier les Modalités et les Conditions.</p> <p>Statut des Valeurs mobilières</p> <p>Les Valeurs mobilières constitueront des engagements directs, non garantis et non subordonnés de l'Emetteur, qui auront égalité de rang les uns par rapport aux autres et égalité de rang avec tous les autres engagements non garantis et non subordonnés de l'Emetteur, à l'exception des engagements privilégiés par des dispositions légales.</p> |
| C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution positive du Sous-jacent avec ce Turbo Infini Call-Warrant et sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution négative du Sous-jacent et supportent de plus le risque que le Turbo Infini Call-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est inférieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur est supérieur au Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou inférieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

| | | |
|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |

| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | |
|--|--|--|
| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

Issue-Specific Summary

Summaries are made up of disclosure requirements, known as "Elements". These elements are numbered in Sections A – E (A.1 – E.7).

This Summary contains all the Elements required to be included in a summary for this type of securities and Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and Issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of 'not applicable'.

In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer exceeds the Strike. If, at the relevant time, the Underlying is equal to or below the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is above the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates plus a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the sum of the relevant Strike and the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

|---------|-------------------|
| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or below the Barrier, the Barrier Event will occur for the Turbo Infini Call-Warrant and the term of the Turbo Infini Call-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the value of the Underlying in the period after the Barrier Event occurred and the Strike, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Call-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Call-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| Elément | Section D – Risques | |
|------------|--|--|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains parties populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de restructuration lui étaient imposées par les autorités compétentes. |

|--|--|--|
| | | <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civile liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action. |

| | | |
|------------|---|--|
| | | <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Émetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Émetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Émetteur</p> <p>L'Émetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est inférieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Call-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans</p> |

| | | <p>une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et le Prix d'exercice et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Call-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Call-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |

In such case, investors will receive as the Cash Amount the product of the Multiplier and the amount by which the Stop Loss Reference Level specified by the Issuer falls below the Strike. If, at the relevant time, the Underlying is equal to or above the Strike – which may be the case particularly with strong movement of the Underlying at the time of the Barrier Event – investors will receive no payment.</p> <p>If no Barrier Event occurs, investors will receive on the Settlement Date, after exercising the Security on an Exercise Date or termination by the Issuer effective on a Redemption Date, as Cash Amount the product of the Multiplier and the amount by which the Final Reference Level is lower than the Strike.</p> <p>Due to lack of a fixed maturity, the product is designed in a way that the initially applicable Strike is adjusted daily to reflect a Financing Component incurred by the Issuer based on the respective market rates less a percentage determined by the Issuer at the issuance of the Security.</p> <p>In addition, upon payment of a cash dividend by its Index-Sponsor the Dividend Adjustment Date is an additional Adjustment Date, and the Strike will be reduced by the respective Dividend Factor, which takes into account the dividends paid less an adjustment amount for taxes and similar charges arising thereon.</p> <p>Finally, the initially applicable Barrier is also adjusted on each following Adjustment Date so that it is equal in each case to the relevant Strike less the Barrier Adjustment Amount. The Barrier Adjustment Amount on the other hand is the product of the applicable Strike and the Barrier Adjustment Factor, where the Issuer may, in its reasonable discretion, reset the latter on any Adjustment Date, with respect to its level on the Issue Date, in order to prevent the security from expiring with no value and without any payment after occurrence of a Barrier Event with the same probability as at its issue (taking into account the volatility and liquidity of the Underlying).</p> |

| Element | Section D – Risks |
|---------|-------------------|

| | | |
|-----|---|--|
| D.2 | Key information on the key risks that are specific and individual to the issuer | <p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> Recent tepid economic growth, and uncertainties about prospects for growth going forward, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of its businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected. An elevated level of political uncertainty and the increasing attractiveness to voters of populist parties in a number of countries in the European Union could lead to a partial unwinding of European integration. Furthermore, anti-austerity movements in some member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. An escalation of political risks could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Legislation regarding the recovery and resolution of banks and investment firms could, if competent authorities impose resolution measures upon Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors. Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on its business and results. Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies, deposit protection or a possible financial transaction tax – may materially increase its operating costs and negatively impact its business model. Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. Deutsche Bank announced the next phase of its strategy, Strategy 2020, in April 2015 and gave further details on it in October 2015. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or it may incur losses or low profitability or erosions of its capital base, and its financial condition, results of operations and share price may be materially and adversely affected. As part of Strategy 2020, Deutsche Bank announced its intention to dispose of Deutsche Postbank AG (together with its subsidiaries, "Postbank"). Deutsche Bank may have difficulties disposing of Postbank at a favourable price or on favourable terms, or at all, and may experience material losses from its holding or disposition of Postbank. Deutsche Bank may remain subject to the risks of or other obligations associated with Postbank following a disposal. Deutsche Bank may have difficulties selling non-core assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. |
|-----|---|--|

| | | |
|------------|--|---|
| | | <ul style="list-style-type: none"> • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business. |
| D.6 | <p>Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it</p> | <p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p>Currency risks</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p>Early redemption by the Issuer</p> |

| | | |
|--|--|---|
| | | <p>The Issuer is entitled to terminate and to repay, or, as the case may be, redeem the Securities early in accordance with the Terms and Conditions for a Cash Amount predetermined in the Terms and Conditions. This amount may be below the market value of the Securities and the amount invested.</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If at any time during the Observation Period the Underlying is equal to or above the Barrier, the Barrier Event will occur for the Turbo Infini Put-Warrant and the term of the Turbo Infini Put-Warrant will end immediately. A price recovery is ruled out. In this event the Cash Amount will be determined based on the difference between the Strike and the value of the Underlying in the period after the Barrier Event occurred, and investors may lose their entire investment or a large part of it. Investors will also suffer a loss if the Underlying on the Valuation Date is so close to the Strike that the Cash Amount is less than the purchase price of the Turbo Infini Put-Warrant. The Barrier Event may occur at any time during the trading hours of the Underlying and potentially even outside the trading hours of the Turbo Infini Put-Warrant.</p> <p>Possible total loss</p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p> |

| C.2 | Monnaie | Euro ("EUR") |
| C.5 | Restrictions imposées à la libre négociabilité des valeurs mobilières | Chaque Valeur mobilière est cessible conformément à la législation applicable et conformément aux règles et procédures mises en œuvre pour le moment par tout Agent de compensation dans les livres duquel une telle Valeur mobilière est transférée. |
| C.8 | Droits liés aux valeurs mobilières, y compris leur rang et toute restriction qui leur est applicable | <p>Droit applicable aux Valeurs mobilières</p> <p>Les Valeurs mobilières seront régies par, et interprétées conformément à, la législation allemande. La constitution des Valeurs mobilières peut être régie par la législation de la juridiction à laquelle est soumis l'Agent de compensation.</p> <p>Droits liés aux Valeurs mobilières</p> <p>Les Valeurs mobilières, lorsqu'elles sont rachetées ou bien exercées par leur détenteur, confèrent également à ce dernier le droit de recevoir un montant en espèces et/ou une livraison physique.</p> <p>Restrictions aux droits liés aux Valeurs mobilières</p> <p>En vertu des conditions énoncées dans les Modalités et les Conditions, l'Emetteur est autorisé à résilier et annuler les Valeurs mobilières et à modifier les Modalités et les Conditions.</p> <p>Statut des Valeurs mobilières</p> <p>Les Valeurs mobilières constitueront des engagements directs, non garantis et non subordonnés de l'Emetteur, qui auront égalité de rang les uns par rapport aux autres et égalité de rang avec tous les autres engagements non garantis et non subordonnés de l'Emetteur, à l'exception des engagements privilégiés par des dispositions légales.</p> |
| C.11 | Demande d'admission à la négociation en vue de leur distribution sur un marché réglementé ou sur des marchés équivalents – les marchés en question devant alors être nommés | Sans objet; aucune demande n'a été introduite afin d'admettre les Valeurs mobilières sur le marché réglementé d'une quelconque Bourse. |
| C.15 | Décrire comment la valeur de l'investissement est influencée par celle du ou des instrument(s) sous-jacent(s), sauf lorsque les valeurs mobilières ont une valeur nominale d'au moins 100 000 EUR | <p>Les investisseurs peuvent être exposés plus que proportionnellement (avec effet de levier) à l'évolution négative du Sous-jacent avec ce Turbo Infini Put-Warrant sans date de règlement fixe.</p> <p>Toutefois, les investisseurs sont également exposés, avec effet de levier, à l'évolution positive du Sous-jacent et supportent de plus le risque que le Turbo Infini Put-Warrant expirera immédiatement (Evénement barrière) si, à un quelconque moment au cours de la Période d'observation le Sous-jacent est supérieur ou égal à la Barrière. Dans un tel cas, ils recevront en tant que Montant en espèces le produit du Multiplicateur par le montant par lequel le Niveau Stop Loss de Référence défini par l'Emetteur tombe sous le Prix d'exercice. Si, à la date concernée, le Sous-jacent est égal ou supérieur au Prix d'exercice – ce qui peut se produire lorsque le Sous-jacent subit de fortes variations au moment de l'Evénement barrière – les investisseurs ne recevront aucun paiement.</p> <p>Si aucun Evénement barrière ne se produit, les investisseurs recevront à la Date de règlement, après</p> |

Le Montant d'actualisation de la barrière est égal au produit du Prix d'exercice applicable par le Facteur d'actualisation de la barrière, le niveau dudit Facteur d'actualisation de la barrière étant susceptible d'être redéfini à une Date d'actualisation par rapport au niveau qui était le sien à la Date d'émission, ce à la discrétion raisonnable de l'Emetteur et pour éviter que la Valeur mobilière n'expire avec une valeur nulle et ne donne lieu à aucun paiement après la survenance d'un Evénement barrière, ce avec la même probabilité de survenance que lors de son émission (en tenant compte de la volatilité et de la liquidité du Sous-jacent).</p> <p>Avant l'échéance, les investisseurs ne recevront aucun revenu courant tel que des intérêts.</p> <p>De même, les investisseurs ne peuvent pas faire valoir de droits concernant le Sous-jacent /dérivant du Sous-jacent (p. ex. des droits de vote, dividendes).</p> | | | | | | | | | | | | | | | | | | | | |

| Élément | Section D – Risques | |
|------------|--|---|
| D.2 | Informations clés concernant les principaux risques propres et spécifique à l'émetteur | <p>Les investisseurs seront exposés au risque d'insolvabilité de l'Émetteur résultant de son surendettement ou de son incapacité à honorer ses dettes, à savoir le risque d'incapacité temporaire ou permanente à s'acquitter des paiements d'intérêts et/ou de principal en temps voulu. Les notations de crédit de l'Émetteur tiennent compte de l'évaluation de ces risques.</p> <p>Les facteurs qui peuvent avoir des incidences négatives sur la rentabilité de Deutsche Bank sont décrits dans les points suivants :</p> <ul style="list-style-type: none"> La récente faiblesse de la croissance économique et l'incertitude des perspectives de croissance ont affecté et continuent d'affecter négativement les comptes d'exploitation de Deutsche Bank et le résultat financier de certaines de ses activités, tandis qu'une conjoncture de faibles taux d'intérêt et de concurrence accrue dans le secteur des services financiers ont eu un effet négatif sur les marges de la plupart de ses activités. Si ces conditions persistent ou s'aggravent, les activités, les comptes d'exploitation ou les plans stratégiques de Deutsche Bank pourraient en être négativement affectés. Un niveau élevé d'incertitude politique et l'attrait croissant qu'exercent certains partis populistes sur les électeurs dans quelques pays de l'Union européenne pourraient se solder par un démantèlement partiel de la construction européenne. En outre, les mouvements anti-austérité dans quelques pays membres de la zone euro pourraient notamment affecter la confiance apportée à un maintien de ces pays dans la zone euro. Une augmentation des risques politiques pourrait avoir des conséquences imprévisibles, entre autres politiques, sur le système financier et l'économie en général, susceptibles alors d'entraîner des baisses de niveaux d'activité, des dépréciations d'actifs et des pertes pour les divisions de Deutsche Bank. La capacité de Deutsche Bank à se protéger de ces risques est limitée. Il peut s'avérer nécessaire pour Deutsche Bank de réduire son exposition à la dette souveraine de pays européens ou d'autres pays, si la crise de la dette souveraine en Europe devait se raviver. Les swaps de défaut de crédit que Deutsche Bank a conclus pour gérer le risque de crédit souverain peuvent ne pas être disponibles pour compenser ces pertes. Deutsche Bank a une demande constante de liquidités pour financer ses activités commerciales. La Banque peut être confrontée à des difficultés pendant les périodes de contraintes de liquidité, que ce soit au niveau de la banque ou sur le marché de manière générale, et des liquidités peuvent ne pas être disponibles pour la banque même si ses activités sous-jacentes restent fortes. Les réformes réglementaires adoptées et proposées en réponse aux faiblesses du secteur financier, ainsi que, d'une manière plus générale, la multiplication des contrôles par les autorités réglementaires, ont entraîné des incertitudes pour Deutsche Bank et pourraient avoir un effet négatif sur ses activités commerciales et sur la capacité de la Banque à mettre en œuvre ses plans stratégiques. La législation relative à la relance et à la restructuration des banques et des entreprises d'investissement pourrait avoir un effet négatif considérable sur les activités de Deutsche Bank et se solder par des pertes pour ses actionnaires et ses créanciers, si des mesures de |

|--|--|--|
| | | <p>restructuration lui étaient imposées par les autorités compétentes.</p> <ul style="list-style-type: none"> • Les changements réglementaires et législatifs obligent Deutsche Bank à maintenir une augmentation de capital et peuvent sensiblement affecter son modèle d'entreprise, son résultat financier, ses comptes d'exploitation ainsi que son environnement concurrentiel en général. Toute perception sur le marché selon laquelle Deutsche Bank pourrait être incapable de satisfaire à ses exigences en matière de capital avec une marge de sécurité suffisante, ou selon laquelle Deutsche Bank devrait conserver des capitaux au-delà de ces exigences, pourrait intensifier l'effet de ces facteurs sur ses activités et ses résultats. • La législation aux États-Unis et en Allemagne et des projets de loi dans l'Union Européenne visant à interdire la négociation pour compte propre ou à séparer cette activité des activités de banque de dépôt, pourraient peser sur le modèle stratégique de Deutsche Bank. • D'autres réformes réglementaires proposées au regard de la crise financière – par exemple, les nouveaux règlements encadrant les opérations dérivées de Deutsche Bank, la mise en place de prélèvements bancaires, la garantie des dépôts ou l'éventualité d'une imposition sur les opérations financières – pourraient augmenter considérablement ses charges d'exploitation et affecter son modèle stratégique. • Les conditions de marché défavorables, les prix historiquement bas ainsi que la volatilité et la prudence des investisseurs ont affecté et pourront sensiblement et négativement affecter les revenus et bénéfices de Deutsche Bank à l'avenir, notamment au sein de ses activités de banque d'investissement, de ses services de courtage ainsi que de ses autres activités reposant sur des commissions et honoraires. Par conséquent, Deutsche Bank a encouru par le passé et pourra encourir à l'avenir des pertes importantes provenant de ses activités boursières et d'investissement. • En avril 2015 Deutsche Bank a annoncé la prochaine étape de sa stratégie, la « Stratégie 2020 », présentée de manière plus détaillée en octobre 2015. Si Deutsche Bank est incapable de mettre en œuvre ses plans stratégiques avec succès, elle pourrait se trouver dans l'incapacité d'atteindre ses objectifs financiers, et pourrait encourir des pertes ou un affaiblissement de sa rentabilité, subir une érosion de ses fonds propres et son résultat financier, ses comptes d'exploitation et sa cotation en bourse pourraient en être sensiblement et négativement affectés. • Deutsche Bank a annoncé son intention de vouloir déconsolider Deutsche Postbank AG (appelée « Postbank » avec ses filiales) dans le cadre de la Stratégie 2020. Deutsche Bank pourrait avoir des difficultés à déconsolider Postbank, voire à la déconsolider à un prix favorable ou à des conditions favorables, et elle pourrait enregistrer des pertes considérables d'une consolidation ou déconsolidation de Postbank. Suite à une déconsolidation, Deutsche Bank pourrait continuer à être confrontée aux risques ou à d'autres obligations associés à Postbank. • Deutsche Bank pourrait avoir des difficultés à vendre des actifs non stratégiques, voire à les vendre à des prix favorables, et pourrait enregistrer des pertes importantes de ces actifs et d'autres investissements indépendamment des évolutions du marché. • Deutsche Bank opère dans un environnement de plus en plus réglementé et procédurier, l'exposant à des actions en responsabilité et autres coûts dont les montants peuvent être lourds et difficiles à estimer, ainsi qu'à des poursuites judiciaires et réglementaires et à des dommages de réputation. • Deutsche Bank fait actuellement et mondialement l'objet de plusieurs enquêtes de la part d'autorités réglementaires et d'autres organismes d'application de la loi aussi bien que actions civiles liées à l'inconduite potentiel Il est impossible de prédire quelle sera la conclusion de ces affaires dont les conséquences pourraient être graves pour le compte d'exploitation, la situation financière et la réputation de Deutsche Bank. • Les activités de crédit non traditionnelles menées par Deutsche Bank ajoutent à son risque bancaire habituel. • Deutsche Bank a subi des pertes et pourrait encourir des pertes supplémentaires liées aux changements de la juste valeur de ses instruments financiers. • Les politiques, procédures et méthodes de gestion du risque mises en place par Deutsche Bank ne protègent pas la Banque de risques non identifiés et non anticipés, ce qui pourrait entraîner des pertes conséquentes. • Des risques opérationnels peuvent perturber l'activité de Deutsche Bank. • Les systèmes opérationnels de Deutsche Bank sont exposés à un risque croissant d'attaque informatique et autres actes criminels liés à internet, ce qui pourrait conduire à la perte de nombreuses informations relatives à la clientèle, nuire à la réputation de Deutsche Bank et entraîner des sanctions réglementaires et des pertes financières. • La taille des opérations de compensation de Deutsche Bank l'expose à un risque accru de pertes importantes dans le cas où ces opérations ne parviendraient pas à fonctionner correctement. • Deutsche Bank peut rencontrer des difficultés pour trouver et exécuter des acquisitions, et tant le |

| | | <p>fait d'effectuer ces acquisitions que celui de les éviter peut sensiblement nuire aux résultats opérationnels de Deutsche Bank et au cours de son action.</p> <ul style="list-style-type: none"> La concurrence intense sur le marché national allemand de Deutsche Bank ainsi que sur les marchés internationaux pourrait considérablement nuire aux revenus et à la rentabilité de Deutsche Bank. Des transactions avec des contreparties situées dans des pays désignés par le Département d'État américain comme États parrains du terrorisme ou des personnes visées par des sanctions économiques américaines peuvent inciter des clients et investisseurs potentiels à éviter de collaborer avec Deutsche Bank ou d'investir dans ses titres, nuire à sa réputation ou entraîner une mesure réglementaire qui pourrait avoir une incidence défavorable importante sur l'activité de la Banque. |
| D.6 | Informations clés concernant les principaux risques propres et spécifique aux valeurs mobilières et avertissement informant l'investisseur qu'il pourrait perdre tout ou partie, de la valeur de son investissement | <p>Les Valeurs mobilières sont liées à l'Instrument sous-jacent</p> <p>Les montants à payer ou les actifs à livrer périodiquement ou à l'exercice ou au rachat des Valeurs mobilières, selon le cas, sont liés au Sous-jacent qui peut comprendre un ou plusieurs Élément(s) de référence. L'achat de, ou l'investissement dans, des Valeurs mobilières liées au Sous-jacent comporte des risques importants.</p> <p>Les Valeurs mobilières ne sont pas des valeurs mobilières conventionnelles et comportent plusieurs risques d'investissement particuliers que les investisseurs potentiels doivent bien comprendre avant d'investir dans les Valeurs mobilières. Chaque investisseur potentiel dans les Valeurs mobilières devrait avoir une expérience avec des valeurs mobilières similaires aux Valeurs mobilières et devrait étudier toute la documentation et comprendre les Modalités et les Conditions relative(s) aux Valeurs mobilières ainsi que la nature et l'étendue de son exposition au risque de perte.</p> <p>Les investisseurs potentiels devraient s'assurer de bien comprendre la formule de calcul des montants à payer et/ou des actifs à livrer, et s'ils le jugent nécessaire, demander conseil à leur(s) conseiller(s).</p> <p>Risques associés au Sous-jacent</p> <p>En raison de l'influence du Sous-jacent sur le droit découlant de la Valeur mobilière, comme pour un investissement direct dans le Sous-jacent, les investisseurs sont exposés à des risques jusqu'à et à l'échéance, qui sont généralement également associés à un investissement dans l'indice concerné en général.</p> <p>Risques de change</p> <p>Les investisseurs sont exposés à un risque de change si la Monnaie de règlement n'est pas la monnaie du lieu de résidence de l'investisseur.</p> <p>Résiliation anticipée</p> <p>Une disposition des Modalités et les Conditions des Valeurs mobilières stipule que si certaines conditions sont remplies, l'Emetteur peut racheter les Valeurs mobilières par anticipation. La valeur de marché de ces Valeurs mobilières peut par conséquent être plus faible que celle de valeurs mobilières similaires qui ne comportent pas un tel droit de rachat de l'Emetteur. Pendant une période de rachat potentiel des Valeurs mobilières de cette manière, la valeur de marché des Valeurs mobilières n'excède généralement pas de manière substantielle le prix auquel elles seraient rachetées ou annulées. C'est le cas également lorsque les Modalités et les Conditions des Valeurs mobilières prévoient le rachat ou l'annulation automatique des Valeurs mobilières (p. ex. clause « knock-out » ou « auto call »).</p> <p>Droit de rachat anticipé de l'Emetteur</p> <p>L'Emetteur peut résilier et rembourser, ou, selon les cas, racheter les Valeurs mobilières de façon anticipée conformément aux Modalités et aux Conditions pour un Montant en espèces prédéterminé dans les Modalités et les Conditions. Ce montant peut être inférieur à la valeur de marché des Valeurs mobilières ainsi qu'au montant investi.</p> <p>Bail-in réglementaire et autres mesures de résolution</p> <p>Si le régulateur compétent ou l'autorité de résolution compétente détermine que l'Émetteur fait ou est susceptible de faire défaut et si d'autres conditions sont remplies, l'autorité de résolution compétente a le pouvoir de réduire, et même d'effacer des créances relatives au remboursement du principal, le paiement d'intérêts ou tout autre montant dû et toute autre créance en vertu des Valeurs mobilières, de convertir les Valeurs mobilières en actions ordinaires ou autres instruments de fonds propres « common equity tier 1 » (la réduction, l'effacement et la conversion étant communément appelés l'instrument de bail-in), ou d'appliquer d'autres mesures de résolution en ce compris (mais sans s'y limiter) un transfert des Valeurs mobilières à une autre entité, une modification des conditions des Valeurs mobilières ou une annulation des Valeurs mobilières.</p> <p>Risques à l'échéance</p> |

| | <p>Si à un moment quelconque pendant la Période d'observation, le Sous-jacent tel que spécifié dans les Conditions définitives est supérieur ou égal à la Barrière, l'Événement barrière survient pour le Turbo Infini Put-Warrant et celui-ci arrive immédiatement à échéance. Un rebond du prix est exclu. Dans une telle situation, le Montant en espèce sera déterminé sur la base de la différence entre le Prix d'exercice et la valeur du Sous-jacent durant la période suivant la survenance de l'Événement barrière et les investisseurs pourraient perdre la totalité de leur investissement ou une grande partie de celui-ci. Les investisseurs subiront également une perte si, à la Date de valorisation, le Sous-jacent est tellement proche du Prix d'exercice que le Montant en espèces est inférieur au prix d'achat du Turbo Infini Put-Warrant. L'Événement barrière peut survenir à tout moment pendant les heures de négociations du Sous-jacent et même éventuellement en dehors des heures de négociation du Turbo Infini Put-Warrant.</p> <p>Perte totale possible</p> <p>Lorsqu'aucun montant en espèce minimal n'est spécifié, les investisseurs peuvent subir une perte de la totalité du capital investi dans la Valeur mobilière.</p> |
