## RocTool

## Half year interim report June 30 2016 RocTool SA (France)

[Informal translation of RocTool SA "Rapport semestriel d'activité au 30 juin 2016" without notes]

## A. Statement of the legal representative

"I certify that, to my knowledge, the interim financial statements presented in the financial report are prepared in accordance with applicable accounting standards and give a fair view of the assets and liabilities, financial position and results of RocTool SA (hereinafter "RocTool"), and that the report activity of the first half presents a true picture of the significant events during the first six months of the year, their impact on the financial statements and a description of the principal risks and principal uncertainties to which RocTool is confronted"

Mathieu Boulanger, RocTool CEO

## B. Introduction

Dear Shareholders,
We are pleased to present the interim report on the financial statements as of June $30^{\text {th }}, 2016$ of RocTool, established by the Board of Directors pursuant to the legal and regulatory requirements.
We inform you that the financial statements as of June $30^{\text {th }}, 2016$ were prepared using the same presentation and the same valuation methods as in the period last year and have been the subject of a limited review by RocTool auditors.

## 1. Business developments

### 1.1. Key facts of the semester

The first half of 2016 demonstrated a lot of activities. Management top priority has been to implement the new strategy around three main drivers:

- Better alignment of the RocTool Group commercial offer to the market and customer needs
- Increased marketing activities and communication with a focus on top brands (see HD Plastics ${ }^{\text {TM }}$ below)
- Increased sales as well as improved costs management

The first step has been to revise our commercial offer so that it was clearer to our customers and easier to sell for our staff, with positive feedbacks from the market from the start and historical clients renewing their investments in RocTool technologies. It includes also the enrichment of the RocTool Group product range with the launch of new RocTool Performance Cooling (RPC) units (used to complement its induction heating process for plastic injection and composites processes so as to optimize cycle times to increase equipment productivity). It also offers to customer to continue using the technology through royalty payments or pay per mold if they prefer.

The second step has been the launch of a complete new approach for the brands and their suppliers in order to reach a new level of quality for plastic parts: the "High Definition Plastics ${ }^{\top \mathrm{TM}}$. With RocTool high heat molding, the level of quality which can be reached is unmatched and is providing product designers very premium looks, high gloss possibilities and matching the texture they initially targeted. A fully dedicated website (www.hdplastics.com) as well as specific marketing tools have been realized in the second quarter.

The third step has been the continuation of the positive trend since the end of 2015 especially in the United-States, with a stable base of revenues from existing users of RocTool technology together with an improved ratio of adoption from new clients. Also, RocTool management spent time and efforts to contain all operational costs.

Further, the RocTool Group attended the JEC Paris, the world largest composite tradeshow, with the successful launch of the LIT™ (Light Induction Tooling), a new molding technology which will allow us to develop our offer in key segments, such as aerospace, automotive and transport. RocTool LIT ${ }^{\text {TM }}$ addresses OEM challenges to make cost effective composite parts with quick cycle times: $\mathrm{LIT}^{\text {TM }}$ technology does not require any compression press machines or special large forming press that only few manufacturers can afford globally.

### 1.2. Significant events after June $30^{\text {th }}, 2016$

None.

### 1.3. Subsidiary update

Please refer to the interim report on the group consolidated financial statements for the details of RocTool subsidiaries.

## 2. Comments on the results

### 2.1. Financial statements

Revenues increased strongly to reach over € 3m, a significant increase over S1 2015 (+260\%).

The revenue increase was reflected in all segments. In line with the new group strategy set at the end of 2015the sale of goods have the lion's share of total revenues ( $57 \%$ of total revenues).

Over $81 \%$ of the revenues has been realized internationally.
Operational costs increased overall by 33\%, in particular linked with higher purchased goods as well as employee costs.

The operational result during the first half of 2016 benefitted significantly from the increase in revenues, getting from a $€ 1.1 \mathrm{~m}$ loss in 2015 to a positive $€ 0.1 \mathrm{~m}$ benefit S1 2016, and so did the net result which is over $€ 250 \mathrm{k}$ in 2016 (vs a loss of $€ 1.1 \mathrm{~m}$ in 2015).

## Financial position

The cash reserves are stable, with slightly more than $€ 1.5 \mathrm{~m}$ of cash as of June $30^{\text {th }} 2016$ and total assets of $€ 7.2 \mathrm{~m}$.

### 2.2. Main risks and uncertainties

The risks faced by RocTool didn't change compared to those detailed in the reporting package made available for the introduction in Alternext in November 2013 (section 4).

Cash reserves allow RocTool to finance its operational activities.
Revenues are less and less concentrated around few clients hence decreasing the risk.

### 2.3. Backlog and future prospects

RocTool management is confident that the ongoing growth will continue in H 2 2016. The existing backlog is already a good sign along with a pipeline which is continuing to build well

The board of administrators is currently finalizing a new strategic plan for the next four years that aims to make RocTool a leading international company and the standard in molding technology used by major brands with commensurate increases in shareholder value.

### 1.4. Management P\&L

RocTool considers the income statement below (prepared under French accounting standards but with a different presentation) is a relevant indicator of the operating performance. It should be considered in addition to, not a substitute for other measures of operating performance in accordance with accounting principles, as presented in the financial statements and the related notes, or described in the interim report.
