TECHNICAL ANNEX TO THE FINAL TERMS

The present Technical Annex includes the necessary parameters to the use of the pay-off formulas (each, a Pay-Off Formula) used in Part A (Contractual Terms) of the Final Terms in order to determine an interest amount, an early settlement amount or a final settlement amount payable on a Security.

All the information set out in this Technical Annex to the Final Terms refers to the calculation formulae and the concept as the Pay-Off Formulae, the Underlying Values, the Values and the Applicable Conditions used in the Technical Annex to the Base Prospectus.

On the Maturity Date, the Holder of one Certificate will receive a Final Settlement Amount which is a Conditional Settlement Amount depending on two (2) Applicable Conditions: an American Barrier Condition(1) and an American Barrier Condition(2).

- 1. If the American Barrier Condition(1) is met (i.e. if at any Valuation Time(1) within the Valuation Period(1), the level of the Futures Contract has never been higher than or equal to the Barrier), each Holder of one Certificate will receive the following Delta One Settlement Amount(1) in USD determined in accordance with the following formula:*

$$USD (Strike - RV_{Final}) \times 0.1$$

- 2. Otherwise, if the American Barrier Condition(1) is not met but if the American Barrier Condition(2) is met, (i.e. if on the first day on which the level of the Futures Contract is higher than or equal to the Barrier, it however remains strictly lower than the Strike at any Valuation Time(2) within the Valuation Period(2)), each Holder of one Certificate will receive the following Delta One Settlement Amount(2) in USD determined in accordance with the following formula:*

$$USD (Strike - RV_{Barrier}) \times 0.1$$

- 3. Otherwise, if the American Barrier Condition(1) and the American Barrier Condition(2) are not met, the Final Settlement Amount shall be a Fixed Settlement Amount equal to USD 0.00 (zero).*
