**NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES**

Basis of preparation

The annual accounts have been prepared in accordance with Luxembourg legal and regulatory requirements under the historical cost convention, except for the use of the fair value option for derivative financial instruments.

Accounting policies and valuation rules are, besides the ones laid down by the law, determined and applied by the Board of Directors.

These annual accounts have been disclosed following the layout in the Title II of the law of December 19, 2002 on the register of trade and companies and the accounting and annual accounts of undertakings, as subsequently modified.

The preparation of the annual accounts requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the accounting policies. Changes in assumptions may have a significant impact on the annual accounts in the period in which the assumptions changed. The Board of Directors believed that the underlying assumptions are appropriate and that the annual accounts therefore present the financial position and results fairly.

It is the role of the Board of Directors to ensure that, to the best of their knowledge, the financial statements are prepared in accordance with the applicable set of accounting standards and give a true and fair view of the assets and liabilities, financial position and profit or loss and that the management report represents the information required under Article 3 (5) of the Transparency Law dated 11/01/2008, as amended from time to time.

The Company's significant accounting policies and valuation rules are as follows:

Formation expenses

The formation expenses of the Company are directly charged to the profit and loss account for the year in which they are incurred.

As of December 31, 2014 and since the incorporation of the Company, no formation expenses were incurred.

Financial fixed assets

Financial fixed assets, including loans to undertakings, are valued at nominal value including the expenses incidental thereto.

In case of durable depreciation in value according to the opinion of the Board of Directors, value adjustments are made in respect of financial fixed assets so that they are valued at the lower figure to be attributed to them at the balance sheet date. These value adjustments are not continued if the reasons for which they were made have ceased to apply.

Derivative financial instruments

The Company may enter into derivative financial instruments such as options, swaps, futures, foreign exchange contracts, warrants, among others. The Company initially records derivative financial instruments at cost.

## NOTES TO THE ANNUAL ACCOUNTS

December 31, 2014

Derivative financial instruments are then fair valued based on market value. Unrealized gains and losses are recorded in the profit and loss.

The market value corresponds to (i) the latest available quote on the valuation day for derivatives listed on a stock exchange or traded on another regulated market or (ii) the probable realisation value estimated through valuation techniques based on assumptions made by the Board of Directors and market conditions existing at the balance sheet date.

Commitment relating to options, swaps, futures, foreign exchange contracts, warrants, among other transactions is disclosed in note 3.

### Premiums on notes and certificates

The premiums resulting from the purchase of fixed-income transferable securities having the characteristics of financial fixed assets, at a price exceeding the amount repayable at maturity is included in the profit and loss account on an amortised basis.

### Debtors

Debtors are valued at their nominal value. They are subject to value adjustments where their recovery is compromised. These value adjustments are not continued if the reasons for which they were made have ceased to apply. The Board of Directors assesses specific value adjustments on a debt or by debtor basis throughout the year.

### Debts

Debts are recorded at their reimbursement value.

### Premiums or discounts on loans

Premiums or discounts on loans are accounted for in deferred charges and income, independently of the loans to which they are associated and are amortised *pro rata temporis* over the life of the loans to which they are related.

### Foreign currency translation

The Company maintains its accounts in Euro (EUR) and the balance sheet and the profit and loss account are expressed in this currency.

Transactions expressed in currencies other than EUR are translated into EUR at the exchange rate effective at the time of the transaction.

Assets and liabilities expressed in currencies other than EUR are translated into EUR at the year end rate. The unrealized foreign exchange gains resulting from the application of this principle are reflected in the balance sheet as "deferred income" whilst the unrealized foreign exchange losses are included in the profit and loss account.

Where there is an economic link between an asset and a liability, these are valued in total according to the method described above and the net unrealized losses are recorded in the profit and loss account. The exchange gains are recorded in the profit and loss account at the moment of their realization.

Cash and cash equivalents expressed in currencies other than EUR are translated into EUR at the exchange rate applicable at the balance sheet date, considering all related exchange gains and losses as realized.
