PART B – OTHER INFORMATION

1. Listing and Admission to trading

Application will be made for the Securities to be admitted to trading on the Multilateral Trading Facility EuroTLX (managed by EuroTLX SIM S.p.A.) (the "Euro TLX") with effect from a date prior to the Issue Date.

2. Ratings

The Securities have not been rated.

The rating of the Issuer is A from Standard and Poor's.

The rating of the Guarantor is A1 from Moody's and A from Standard and Poor's.

As defined by Moody's, an "A" rating means that the obligations of the Issuer and the Guarantor under the Programme are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category.

As defined by Standard & Poor's, an obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the relevant Issuer and Guarantor's capacity to meet its financial commitment on the obligation is still strong. The addition of a plus (+) or minus (-) sign shows relative standing within the major rating category.

Moody's and Standard & Poor's are established in the European Union and are registered under Regulation (EC) No. 1060/2009 (as amended).

3. Interests of Natural and Legal Persons Involved in the Offer

All placement fees will be paid out upfront. Moreover, investors shall be aware that implicit in the Issue Price of the Securities are structuring costs equal to an estimated maximum annual amount of 0.20% of the issue amount.

Investors must also consider that such fees and costs are not included in the price of the Securities on the secondary market and, therefore, if the Securities are sold on the secondary market, fees and costs embedded in the Issue Price will be deducted from the sale price.

Save as discussed in the "Potential Conflicts of Interest" paragraph in the "Risk Factors" in the Base Prospectus, so far as the Issuer is aware, no person involved in the offer of the Securities has an interest material to the offer.

Element	Title	
B.19/ B.2	Domicile/ legal form/ legislation/ country of incorporation	The Guarantor was incorporated in France as a <i>société anonyme</i> under French law and licensed as a bank having its head office at 16, boulevard des Italiens - 75009 Paris, France.
B.19/ B.4b	Trend information	<p><i>Macroeconomic environment</i></p> <p>Macroeconomic and market conditions affect BNPP's results. The nature of BNPP's business makes it particularly sensitive to macroeconomic and market conditions in Europe, which have been at times challenging and volatile in recent years.</p> <p>In 2015, the global economic activity remained sluggish. Activity slowed down in emerging countries, while a modest recovery continued in developed countries. The global outlook is still impacted by three major transitions: the slowing economic growth in China, the fall in prices of energy and other commodities, and an initial tightening of US monetary policy in a context of resilient internal recovery, while the central banks of several major developed countries are continuing to ease their monetary policies. For 2016, the IMF¹ is forecasting the progressive recovery of global economic activity but with low growth prospects on the medium term in developed and emerging countries.</p> <p>In that context, two risks can be identified:</p> <p><i>Financial instability due to the vulnerability of emerging countries</i></p> <p>While the exposure of the BNP Paribas Group in emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the BNP Paribas Group and potentially alter its results.</p> <p>In numerous emerging economies, an increase in foreign currency commitments was observed in 2015, while the levels of indebtedness (both in foreign and local currencies) are already high. Moreover, the prospects of a progressive hike in key rates in the United States (first rate increase decided by the Federal Reserve in December 2015), as well as tightened financial volatility linked to the concerns regarding growth in emerging countries, have contributed to the stiffening of external financial conditions, capital outflows, further currency depreciations in numerous emerging countries and an increase in risks for banks. This could lead to the downgrading of sovereign ratings.</p> <p>Given the possible standardisation of risk premiums, there is a risk of global market disruptions (rise in risk premiums, erosion of confidence, decline in growth, postponement or slowdown in the harmonisation of monetary policies, drop in market liquidity, problem with the valuation of assets, shrinking of the credit offering, and chaotic de-leveraging) that would affect all banking institutions.</p> <p><i>Systemic risks related to economic conditions and market liquidity</i></p> <p>The continuation of a situation with exceptionally low interest rates could promote excessive risk-taking by certain financial players: increase in the maturity of loans and assets held, less stringent loan granting policies, increase in leverage financing.</p> <p>Some players (insurance companies, pension funds, asset managers, etc.) entail an increasingly systemic dimension and in the event of market turbulence (linked for instance to a sudden rise in interest rates and/or a sharp price correction) they may decide to unwind large positions in an environment of relatively weak market liquidity.</p> <p>Such liquidity pressure could be exacerbated by the recent increase in the volume of</p>

		<p>assets under management placed with structures investing in illiquid assets.</p> <p><i>Laws and regulations applicable to financial institutions</i></p> <p>Recent and future changes in the laws and regulations applicable to financial institutions may have a significant impact on BNPP. Measures that were recently adopted or which are (or whose application measures are) still in draft format, that have or are likely to have an impact on BNPP notably include:</p> <ul style="list-style-type: none"> - the structural reforms comprising the French banking law of 26 July 2013 requiring that banks create subsidiaries for or segregate "speculative" proprietary operations from their traditional retail banking activities, the "Volcker rule" in the US which restricts proprietary transactions, sponsorship and investment in private equity funds and hedge funds by US and foreign banks, and expected potential changes in Europe; - regulations governing capital: CRD IV/CRR, the international standard for total-loss absorbing capacity (TLAC) and BNPP's designation as a financial institution that is of systemic importance by the Financial Stability Board; - the European Single Supervisory Mechanism and the ordinance of 6 November 2014; - the Directive of 16 April 2014 related to deposit guarantee systems and its delegation and implementing decrees, the Directive of 15 May 2014 establishing a Bank Recovery and Resolution framework, the Single Resolution Mechanism establishing the Single Resolution Council and the Single Resolution Fund; - the Final Rule by the US Federal Reserve imposing tighter prudential rules on the US transactions of large foreign banks, notably the obligation to create a separate intermediary holding company in the US (capitalised and subject to regulation) to house their US subsidiaries; - the new rules for the regulation of over-the-counter derivative activities pursuant to Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, notably margin requirements for uncleared derivative products and the derivatives of securities traded by swap dealers, major swap participants, security-based swap dealers and major security-based swap participants, and the rules of the US Securities and Exchange Commission which require the registration of banks and major swap participants active on derivatives markets and transparency and reporting on derivative transactions; - the new MiFID and MiFIR, and European regulations governing the clearing of certain over-the-counter derivative products by centralised counterparties and the disclosure of securities financing transactions to centralised bodies. <p><i>Cyber risk</i></p> <p>In recent years, financial institutions have been impacted by a number of cyber incidents, notably involving large-scale alterations of data which compromise the quality of financial information. This risk remains today and BNPP, like other banks, has taken measures to implement systems to deal with cyber attacks that could destroy or damage data and critical systems and hamper the smooth running of its operations. Moreover, the regulatory and supervisory authorities are taking initiatives to promote the exchange of information on cyber security and cyber criminality in order to improve the security of technological infrastructures and establish effective recovery plans after a cyber incident.</p>

Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with its activities, as described below:</p> <p><u>Guarantor</u></p> <p>Eleven main categories of risk are inherent in BNPP's activities:</p> <ol style="list-style-type: none"> 1) <i>Credit Risk</i> - Credit risk is the potential that a bank borrower or counterparty will fail to meet its obligations in accordance with agreed terms. The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment; (2) <i>Counterparty Credit Risk</i> - Counterparty credit risk is the credit risk embedded in payment or transactions between counterparties. Those transactions include bilateral contracts such as over-the-counter (OTC) derivatives contracts which potentially expose the Bank to the risk of counterparty default, as well as contracts settled through clearing houses. The amount of

Element	Title	
		<p>this risk may vary over time in line with changing market parameters which then impacts the replacement value of the relevant transactions or portfolio;</p> <p>(3) <i>Securitisation</i> - Securitisation means a transaction or scheme, whereby the credit risk associated with an exposure or pool of exposures is tranching, having the following characteristics:</p> <ul style="list-style-type: none"> • payments made in the transaction or scheme are dependent upon the performance of the exposure or pool of exposures; • the subordination of tranches determines the distribution of losses during the life of the risk transfer. <p>Any commitment (including derivatives and liquidity lines) granted to a securitisation operation must be treated as a securitisation exposure. Most of these commitments are held in the prudential banking book;</p> <p>(4) <i>Market Risk</i> - Market risk is the risk of incurring a loss of value due to adverse trends in market prices or parameters, whether directly observable or not.</p> <p>Observable market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether listed or obtained by reference to a similar asset), prices of derivatives, and other parameters that can be directly inferred from them, such as interest rates, credit spreads, volatilities and implied correlations or other similar parameters.</p> <p>Non-observable factors are those based on working assumptions such as parameters contained in models or based on statistical or economic analyses, non-ascertainable in the market.</p> <p>In fixed income trading books, credit instruments are valued on the basis of bond yields and credit spreads, which represent market parameters in the same way as interest rates or foreign exchange rates. The credit risk arising on the issuer of the debt instrument is therefore a component of market risk known as issuer risk.</p> <p>Liquidity is an important component of market risk. In times of limited or no liquidity, instruments or goods may not be tradable or may not be tradable at their estimated value. This may arise, for example, due to low transaction volumes, legal restrictions or a strong imbalance between demand and supply for certain assets.</p> <p>The market risk related to banking activities encompasses the risk of loss on equity holdings on the one hand, and the interest rate and foreign exchange risks stemming from banking intermediation activities on the other hand;</p> <p>(5) <i>Operational Risk</i> - Operational risk is the risk of incurring a loss due to inadequate or failed internal processes, or due to external events, whether deliberate, accidental or natural occurrences. Management of operational risk is based on an analysis of the “cause – event – effect” chain.</p> <p>Internal processes giving rise to operational risk may involve employees and/or IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk.</p> <p>Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, conduct risks (risks related to the provision of inappropriate financial services), risk related to failures in operating processes, including loan procedures or model risks, as well as any potential financial implications resulting from the</p>

Element	Title	
		<p>management of reputation risks;</p> <p>(6) <i>Compliance and Reputation Risk</i> - Compliance risk as defined in French regulations as the risk of legal, administrative or disciplinary sanctions, of significant financial loss or reputational damage that a bank may suffer as a result of failure to comply with national or European laws and regulations, codes of conduct and standards of good practice applicable to banking and financial activities, or instructions given by an executive body, particularly in application of guidelines issued by a supervisory body.</p> <p>By definition, this risk is a sub-category of operational risk. However, as certain implications of compliance risk involve more than a purely financial loss and may actually damage the institution's reputation, the Bank treats compliance risk separately.</p> <p>Reputation risk is the risk of damaging the trust placed in a corporation by its customers, counterparties, suppliers, employees, shareholders, supervisors and any other stakeholder whose trust is an essential condition for the corporation to carry out its day-to-day operations.</p> <p>Reputation risk is primarily contingent on all the other risks borne by the Bank;</p> <p>(7) <i>Concentration Risk</i> - Concentration risk and its corollary, diversification effects, are embedded within each risk, especially for credit, market and operational risks using the correlation parameters taken into account by the corresponding risk models.</p> <p>It is assessed at consolidated Group level and at financial conglomerate level;</p> <p>(8) <i>Banking Book Interest Rate Risk</i> - Banking book interest rate risk is the risk of incurring losses as a result of mismatches in interest rates, maturities and nature between assets and liabilities. For banking activities, this risk arises in non-trading portfolios and primarily relates to global interest rate risk;</p> <p>(9) <i>Strategic and Business Risks</i> - Strategic risk is the risk that the Bank's share price may fall because of its strategic decisions.</p> <p>Business risk is the risk of incurring an operating loss due to a change in the economic environment leading to a decline in revenue coupled with insufficient cost-elasticity.</p> <p>These two types of risk are monitored by the Board of Directors;</p> <p>(10) <i>Liquidity Risk</i> - In accordance with regulations, the liquidity risk is defined as the risk that a bank will be unable to honour its commitments or unwind or settle a position due to the situation on the market or idiosyncratic factors, within a given time frame and at a reasonable price or cost; and</p> <p>(11) <i>Insurance Underwriting Risk</i> - Insurance underwriting risk corresponds to the risk of a financial loss caused by an adverse trend in insurance claims. Depending on the type of insurance business (life, personal risk or annuities), this risk may be statistical, macroeconomic or behavioural, or may be related to public health issues or natural disasters. It is not the main risk factor arising in the life insurance business, where financial risks are predominant.</p> <p>a) Difficult market and economic conditions have had and may continue to have a material adverse effect on the operating environment for financial institutions and hence on BNPP's financial condition, results of operations and cost of risk.</p> <p>b) Due to the geographic scope of its activities, BNPP may be vulnerable to</p>

		<p>country or regional-specific political, macroeconomic and financial environments or circumstances.</p> <p>c) BNPP's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in credit spreads or other factors.</p> <p>d) Significant interest rate changes could adversely affect BNPP's revenues or profitability.</p> <p>e) The prolonged low interest rate environment carries inherent systemic risks</p> <p>f) The soundness and conduct of other financial institutions and market participants could adversely affect BNPP.</p> <p>g) BNPP may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>h) BNPP may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.</p> <p>i) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.</p> <p>j) Laws and regulations adopted in response to the global financial crisis may materially impact BNPP and the financial and economic environment in which it operates.</p> <p>k) BNPP is subject to extensive and evolving regulatory regimes in the jurisdictions in which it operates.</p> <p>l) BNPP may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations.</p> <p>m) There are risks related to the implementation of BNPP's strategic plan.</p> <p>n) BNPP may experience difficulties integrating acquired companies and may be unable to realize the benefits expected from its acquisitions.</p> <p>o) Intense competition by banking and non-banking operators could adversely affect BNPP's revenues and profitability.</p> <p>p) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPP's results of operations and financial condition.</p> <p>q) BNPP's risk management policies, procedures and methods, may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.</p> <p>r) BNPP's hedging strategies may not prevent losses.</p> <p>s) Adjustments to the carrying value of BNPP's securities and derivatives portfolios and BNPP's own debt could have an impact on its net income and shareholders' equity.</p> <p>t) The expected changes in accounting principles relating to financial instruments may have an impact on BNPP's balance sheet and regulatory</p>

Element	Title	
		<p>capital ratios and result in additional costs.</p> <p>u) BNPP's competitive position could be harmed if its reputation is damaged.</p> <p>v) An interruption in or a breach of BNPP's information systems may result in material losses of client or customer information, damage to BNPP's reputation and lead to financial losses.</p> <p>w) Unforeseen external events may disrupt BNPP's operations and cause substantial losses and additional costs.</p> <p>Issuer</p> <p>The main risks described above in relation to BNPP also represent the main risks for BNPP B.V., either as an individual entity or a company in the BNPP Group.</p> <p>Dependency Risk</p> <p>BNPP B.V. is an operating company. The assets of BNPP B.V. consist of the obligations of other BNPP Group entities. The ability of BNPP B.V. to meet its own obligations will depend on the ability of other BNPP Group entities to fulfil their obligations. In respect of securities it issues, the ability of BNPP B.V. to meet its obligations under such securities depends on the receipt by it of payments under certain hedging agreements that it enters with other BNPP Group entities. Consequently, Holders of BNPP B.V. securities will, subject to the provisions of the Guarantee issued by BNPP, be exposed to the ability of BNPP Group entities to perform their obligations under such hedging agreements.</p> <p>Market Risk</p> <p>BNPP B.V. takes on exposure to market risks arising from positions in interest rates, currency exchange rates, commodities and equity products, all of which are exposed to general and specific market movements. However, these risks are hedged by option and swap agreements and therefore these risks are mitigated in principle.</p> <p>Credit Risks</p> <p>BNPP B.V. has significant concentration of credit risks as all OTC contracts are acquired from its parent company and other BNPP Group entities. Taking into consideration the objective and activities of BNPP B.V. and the fact that its parent company is under supervision of the European Central Bank and the <i>Autorité de Contrôle Prudentiel et de Résolution</i> management considers these risks as acceptable. The long term senior debt of BNP Paribas is rated (A) by Standard & Poor's and (A1) by Moody's.</p> <p>Liquidity Risk</p> <p>BNPP B.V. has significant liquidity risk exposure. To mitigate this exposure, BNPP B.V. entered into netting agreements with its parent company and other BNPP Group entities.</p>
D.3	Key risks regarding the Securities	<p>In addition to the risks (including the risk of default) that may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantor, there are certain factors which are material for the purposes of assessing the market risks associated with Securities issued under the Base Prospectus, including:</p> <p>Market Risks</p> <p>- Securities (other than Secured Securities) are unsecured obligations,</p>

Element	Title	
		<p>-the trading price of the Securities is affected by a number of factors including, but not limited to, the price of the relevant Underlying Reference(s), time to expiration or redemption and volatility and such factors mean that the trading price of the Securities may be below the Final Redemption Amount or Cash Settlement Amount or value of the Entitlement,</p> <p>-exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities,</p> <p><i>Holder Risks</i></p> <p>-the meetings of Holders provisions permit defined majorities to bind all Holders,</p> <p>-in certain circumstances Holders may lose the entire value of their investment.</p> <p><i>Issuer/Guarantor Risks</i></p> <p>-a reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Securities,</p> <p>-certain conflicts of interest may arise (see Element E.4 below),</p> <p><i>Legal Risks</i></p> <p>-the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, cancellation (in the case of Warrants) or early redemption (in the case of Notes and Certificates) or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities,</p> <p>-expenses and taxation may be payable in respect of the Securities,</p> <p>- the Securities may redeemed in the case of illegality or impracticability and such cancellation or redemption may result in an investor not realising a return on an investment in the Securities,</p> <p>-any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it,</p> <p><i>Secondary Market Risks</i></p> <p>-the only means through which a Holder can realise value from the Security prior to its Exercise Date, Maturity Date or Redemption Date, as applicable, is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to exercise or wait until redemption of the Securities to realise a greater value than its trading value),</p> <p><i>Risks relating to Underlying Reference Asset(s)</i></p> <p>In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:</p>

Element	Title	
		<p>exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities,</p> <p>and that the Issuer will not provide post-issuance information in relation to the Underlying Reference</p> <p><i>Risks relating to specific types of products</i></p> <p>Sum Products</p> <p>Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and is calculated based on the weighted sum of returns determined using different payout formulae.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Securities when repayment falls due, an investor may lose all or part of his investment in the Securities.</p> <p>If the Guarantor is unable or unwilling to meet its obligations under the Guarantee when due, an investor may lose all or part of his investment in the Securities.</p> <p>In addition, investors may lose all or part of their investment in the Securities as a result of the terms and conditions of the Securities.</p>

B.14	Dipendenza da altri soggetti del Gruppo	BNPP B.V. dipende da BNPP. BNPP B.V. è una società interamente controllata da BNPP specialmente incaricata dell'emissione di titoli quali notes, warrants o certificati o altre obbligazioni che vengono sviluppate, definite e vendute agli investitori da altre società del Gruppo BNPP (inclusa BNPP). I titoli sono coperti attraverso l'acquisto di strumenti di copertura da BNP Paribas ed entità di BNP Paribas, come descritto nell'Elemento D.2 di cui sotto. Si veda anche l'Elemento B.5 che precede.
B.15	Principali attività	L'attività principale di BNPP B.V. consiste nell'emettere e/o acquisire strumenti finanziari di qualsiasi natura e nello stipulare contratti correlati per conto di vari soggetti nell'ambito del Gruppo BNPP.
B.16	Azionisti di controllo	BNP Paribas detiene il 100% del capitale sociale di BNPP B.V.

B.18	Descrizione della Garanzia	I Titoli saranno garantiti incondizionatamente e irrevocabilmente da BNP Paribas (" BNPP " o il " Garante "), ai sensi di un atto di garanzia di diritto inglese sottoscritto dal Garante in data o circa in data 10 giugno 2016 (la " Garanzia "). Nell'eventualità di un <i>bail-in</i> di BNPP ma non di BNPP B.V., le obbligazioni e/o gli importi dovuti da BNPP ai sensi della garanzia saranno ridotti per riflettere tale eventuale modifica o riduzione applicata alle responsabilità di BNPP e derivante dall'applicazione di una misura di <i>bail-in</i> di BNPP da parte di un organismo di vigilanza incaricato (anche nel caso in cui la garanzia non sia soggetta al <i>bail-in</i>). Le obbligazioni ai sensi della garanzia sono obbligazioni dirette, incondizionate, non garantite e non subordinate di BNPP e hanno e avranno pari priorità tra esse e almeno pari priorità rispetto a ogni altro indebitamento diretto, incondizionato, non garantito e non subordinato di BNPP (salvo per debiti privilegiati per legge).

B.19/ B.2	Domicilio/ forma giuridica/ legislazione/ paese di costituzione	Il Garante è stato costituito nella forma di <i>société anonyme</i> (" <i>naamloze vennootschap</i> ") ai sensi della legge francese e ha ottenuto l'autorizzazione a operare quale banca. La sede legale al 16, boulevard des Italiens – 75009 Parigi, Francia.
B.19/B.4b	Informazioni sulle tendenze	<p>Contesto macroeconomico.</p> <p>I risultati di BNPP sono influenzati dal contesto macroeconomico e di mercato. Data la natura della sua attività, BNPP è particolarmente sensibile alle condizioni macroeconomiche e di mercato in Europa, che negli ultimi anni sono state a volte impegnative e volatili.</p> <p>Nel 2015, l'attività economica globale ha continuato a ristagnare. L'attività economica ha rallentato nei paesi emergenti, mentre nei mercati sviluppati è proseguita una modesta ripresa. Sulle prospettive globali continuano a incidere tre importanti transizioni: il rallentamento della crescita economica in Cina, la flessione dei prezzi dell'energia e di altre materie prime e una prima stretta della politica monetaria statunitense in una cornice di solida ripresa interna mentre le banche centrali di diversi importanti paesi sviluppati continuano a promuovere politiche monetarie espansive. Nel 2016, il FMI² prevede un progressivo recupero delle attività economiche mondiali, ma in un quadro di crescita modesta a medio termine nei paesi sviluppati ed emergenti.</p> <p>In tale contesto, si possono identificare due rischi:</p> <p><i>Instabilità finanziaria dovuta alla vulnerabilità dei paesi emergenti</i></p> <p>Malgrado l'esposizione contenuta del Gruppo BNP Paribas nei mercati emergenti, la vulnerabilità di queste economie può generare turbolenze nel sistema finanziario globale in grado di coinvolgere il Gruppo BNP Paribas e, potenzialmente, di alterarne i risultati.</p> <p>Nel 2015 è stato rilevato in diverse economie emergenti un incremento degli impieghi in valuta estera, mentre i livelli di indebitamento (sia in valuta estera che locale) sono già elevati. Inoltre, le prospettive di un rialzo progressivo dei tassi di riferimento negli Stati Uniti (primo aumento dei tassi deciso dalla Federal Reserve nel dicembre 2015), al pari di un aumento della volatilità finanziaria associato alle prospettive di crescita dei paesi emergenti, hanno contribuito ad alimentare la stretta delle condizioni finanziarie esterne, i deflussi di capitale, ulteriori deprezzamenti delle divise di diversi paesi emergenti e un incremento dei rischi per le banche, che potrebbero condurre verso il declassamento dei rating sovrani.</p> <p>Data la possibile standardizzazione dei premi al rischio, i mercati globali sono esposti al pericolo di turbolenze (aumento dei premi al rischio, erosione della fiducia, flessione della crescita, deroghe o rallentamento nell'armonizzazione delle politiche monetarie, crollo della liquidità dei mercati, problemi di valutazione degli attivi, contrazione dell'offerta creditizia e riduzione caotica dell'indebitamento) che coinvolgerebbero tutte le istituzioni bancarie.</p> <p><i>I rischi sistemici correlati alle condizioni economiche e alla liquidità di mercato</i></p> <p>Il protrarsi di una situazione segnata da tassi d'interesse insolitamente bassi potrebbe favorire l'assunzione di rischi eccessivi da parte di alcuni attori finanziari: aumento della durata dei prestiti e degli attivi detenuti, politiche di concessione finanziamenti meno stringenti, aumento del finanziamento tramite indebitamento.</p>

		<p>Alcuni attori (compagnie assicurative, fondi pensione, asset manager ecc.) richiedono una dimensione sempre più sistemica e, in caso di turbolenza dei mercati (associata per esempio a un improvviso balzo dei tassi d'interesse e/o a una brusca correzione dei prezzi), possono decidere di liquidare posizioni rilevanti in un contesto di liquidità di mercato relativamente modesta.</p> <p>Tale pressione sulla liquidità potrebbe accentuarsi con i recenti aumenti del volume di attivi gestiti tramite strutture che effettuano investimenti illiquidi.</p> <p>Legislazione e regolamenti applicabili alle istituzioni finanziarie</p> <p>Le modifiche recenti e future nelle leggi e nei regolamenti applicabili alle istituzioni finanziarie potrebbero incidere considerevolmente su BNPP. Le misure adottate di recente nonché le misure (o i relativi provvedimenti applicativi) ancora in via di definizione che producono o potrebbero produrre effetti sul BNPP includono in particolare: - le riforme strutturali che comprendono la legge francese in materia bancaria del 26 luglio 2013 che impone alle banche la creazione di filiali o l'esecuzione di operazioni interne di natura "speculativa" distintamente dalle tradizionali attività bancarie al dettaglio, la "Regola di Volcker" negli Stati Uniti che impone limiti su operazioni interne, finanziamenti e investimenti in fondi di private equity e hedge fund da parte di banche statunitensi ed estere, e le potenziali modifiche attese in Europa;</p> <ul style="list-style-type: none"> - regolamenti che disciplinano i capitali: CRD IV/CRR, lo standard internazionale relativo alla capacità di assorbimento delle perdite totali (TLAC) e la designazione di BNPP quale istituzione finanziaria affinché rivesta un'importanza sistemica per il Consiglio per la Stabilità Finanziaria; - il Meccanismo di Vigilanza Unico Europeo e l'ordinanza del 6 novembre 2014; - la Direttiva del 16 aprile 2014 in materia di sistemi di garanzia sui depositi e i relativi decreti delega e attuativi, la Direttiva del 15 maggio 2014 che istituisce un quadro di Risanamento e Risoluzione delle crisi bancarie, il Meccanismo di Risoluzione Unico che istituisce il Consiglio di Risoluzione Unico e il Fondo di Risoluzione Unico; - la Norma Finale della Federal Reserve statunitense che impone regole prudenziali più stringenti sulle operazioni statunitensi di importanti banche estere, in particolare l'obbligo di creazione di una holding intermediaria distinta negli Stati Uniti (capitalizzata e soggetta a regolamentazione) al fine di ospitare le filiali statunitensi; - le nuove norme che regolamentano le attività in derivati over-the-counter ai sensi del Titolo VII della legge Dodd-Frank per la riforma di Wall Street e la difesa dei consumatori, in particolare i requisiti di margine per i prodotti derivati non liquidati e i derivati di titoli negoziati da intermediari su swap, principali negozianti di swap, intermediari su swap basati su titoli e principali operatori di swap basati su titoli, e le norme della Securities and Exchange Commission statunitense che richiede la registrazione delle banche e dei principali operatori di swap attivi su mercati derivati e obblighi di trasparenza e informazione sulle operazioni derivate; - i nuovi regolamenti MiFID e MiFIR, e i regolamenti europei che disciplinano la compensazione di alcuni prodotti derivati over-the-counter da parte di controparti centralizzate e gli obblighi di informativa sulle operazioni di finanziamento tramite titoli agli

		organismi centralizzati. Rischi informatici Negli ultimi anni, le istituzioni finanziarie hanno subito una serie di incidenti informatici, che hanno riguardato in particolare alterazioni su larga scala di dati che compromettono la qualità delle informazioni finanziarie. Questo rischio permane oggi e BNPP, analogamente ad altri istituti di credito, ha adottato misure per implementare sistemi di gestione degli attacchi informatici in grado di distruggere o danneggiare i dati e i sistemi critici e ostacolare il regolare svolgimento delle sue operazioni. Inoltre, le autorità regolamentari e di vigilanza stanno assumendo iniziative volte a promuovere lo scambio di informazioni in materia di protezione informatica e di criminalità informatica, al fine di migliorare la sicurezza delle infrastrutture tecnologiche e introdurre piani di ripristino efficaci a seguito di incidente informatico.

Sezione D – Rischi

Elemento	Titolo	
D.2	Rischi fondamentali relativi agli Emittenti e ai Garanti	<p>I potenziali acquirenti dei Titoli emessi ai sensi del presente Prospetto di Base dovrebbero avere esperienze di investimento relativamente ad opzioni e negoziazione di opzioni e comprendere il rischio di negoziazione che i Titoli comportano. Un investimento in Titoli presenta alcuni rischi che dovrebbero essere valutati prima di effettuare ogni decisione di investimento. Alcuni rischi possono influenzare la capacità dell'Emittente di adempiere alle proprie obbligazioni sorte relativamente ai Titoli o la capacità del Garante di adempiere alle proprie obbligazioni relativamente alla Garanzia (in caso di Titoli emessi da BNPP B.V.), alcuni dei quali sono indipendenti dal loro controllo. In particolare, l'Emittente (e il Garante, in caso di Titoli emessi da BNPP B.V.), congiuntamente al Gruppo BNPP, è esposto ai seguenti rischi, connessi alla sua attività:</p>
D.3	Rischi chiave relativi ai Titoli	<p>Oltre ai rischi (ivi incluso il rischio di inadempimento) che possono influenzare la capacità dell'Emittente di adempiere alle obbligazioni assunte relativamente ai Titoli o del Garante di adempiere alle obbligazioni assunte ai sensi della Garanzia, esistono determinati fattori che sono significativi allo scopo di valutare i rischi associati ai Titoli emessi ai sensi del presente Prospetto di Base, ivi inclusi:</p> <p><i>Rischio di Mercato</i></p> <ul style="list-style-type: none"> - i Titoli (diversi dai Titoli Garantiti) sono obbligazioni non garantite; - il prezzo di negoziazione dei Titoli è influenzato da vari fattori tra cui, a mero titolo esemplificativo (in relazione ai Titoli legati a un Sottostante di Riferimento), il prezzo del/i relativo/i Sottostante/i di Riferimento, il tempo restante alla scadenza o al rimborso e la volatilità, e tali fattori implicano che il prezzo di negoziazione dei Titoli può essere inferiore all'Importo del Rimborso Finale o all'Importo del Regolamento in Contanti o al valore del Diritto Spettante; - l'esposizione al Sottostante di Riferimento in molti casi sarà ottenuta tramite la

I fattori di rischio relativi ai Titoli Legati a un Sottostante di Riferimento includono:</p> <p>nel caso di Titoli Azionari, esposizione a una o più azioni, rischi di mercato simili a quelli di un investimento diretto in capitale azionario, certificati di deposito globale (<i>global depositary receipt</i>, "GDR") o certificati di deposito americani (<i>American</i></p>

D.6	Avvertenza relativa ai rischi	<p>Si veda l’Elemento D.3 che precede.</p> <p>Nel caso di insolvenza di un Emittente o qualora lo stesso non sia altrimenti in grado di, o disposto a, rimborsare i Titoli alla scadenza, un investitore potrebbe perdere tutto o parte del suo investimento nei Titoli.</p> <p>Qualora il Garante non sia in grado di, o non sia disposto a, adempiere le proprie obbligazioni ai sensi della Garanzia dovute alla scadenza, un investitore potrebbe perdere tutto o parte del suo investimento nei Titoli.</p> <p>Inoltre, gli investitori potrebbero perdere tutto o parte del loro investimento nei Titoli in conseguenza dei termini e condizioni dei Titoli stessi.</p>
