The obligations under the guarantee are direct unconditional, unsecured and unsubordinated obligations of BNPP and rank and will rank <i>pari passu</i> among themselves and at least <i>pari passu</i> with all other direct, unconditional, unsecured and unsubordinated indebtedness of BNPP (save for statutorily preferred exceptions).

B.19/ B.4b	Trend information	Macroeconomic environment Macroeconomic and market conditions affect the Bank's results. The nature of the Bank's business makes it particularly sensitive to macroeconomic and market conditions in Europe, which have been at times challenging and volatile in recent years. In 2015, the global economic activity remained sluggish. Activity slowed down in emerging countries, while modest recovery continued in developed countries. The

Element	Title	
		<p>global outlook is still impacted by three major transitions: the slowing economic growth in China, the fall in prices of energy and other commodities, and an initial tightening of US monetary policy in a context of resilient internal recovery, while the central banks of several major developed countries are continuing to ease their monetary policies. For 2016, the IMF¹ is forecasting the progressive recovery of global economic activity but with low growth prospects on the medium term in developed and emerging countries.</p> <p>In that context, two risks can be identified:</p> <p><i>Financial instability due to the vulnerability of emerging countries</i></p> <p>While the exposure of the BNP Paribas Group in emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the BNP Paribas Group and potentially alter its results.</p> <p>In numerous emerging economies, an increase in foreign currency commitments was observed in 2015, while the levels of indebtedness (both in foreign and local currencies) are already high. Moreover, the prospects of a progressive hike in key rates in the United States (first rate increase decided by the Federal Reserve in December 2015), as well as tightened financial volatility linked to the concerns regarding growth in emerging countries, have contributed to the stiffening of external financial conditions, capital outflows, further currency depreciations in numerous emerging countries and an increase in risks for banks. This could lead to the downgrading of sovereign ratings.</p> <p>Given the possible standardisation of risk premiums, there is a risk of global market disruptions (rise in risk premiums, erosion of confidence, decline in growth, postponement or slowdown in the harmonisation of monetary policies, drop in market liquidity, problem with the valuation of assets, shrinking of the credit offering, and chaotic de-leveraging) that would affect all banking institutions.</p> <p><i>Systemic risks related to economic conditions and market liquidity</i></p> <p>The continuation of a situation with exceptionally low interest rates could promote excessive risk-taking by certain financial players: increase in the maturity of loans and assets held, less stringent loan granting policies, increase in leverage financing.</p> <p>Some players (insurance companies, pension funds, asset managers, etc.) entail an increasingly systemic dimension and in the event of market turbulence (linked for instance to a sudden rise in interest rates and/or a sharp price correction) they may decide to unwind large positions in an environment of relatively weak market liquidity.</p> <p>Such liquidity pressure could be exacerbated by the recent increase in the volume of assets under management placed with structures investing in illiquid assets.</p> <p>Laws and regulations applicable to financial institutions</p> <p>Recent and future changes in the laws and regulations applicable to financial institutions may have a significant impact on BNPP. Measures that were recently adopted or which are (or whose application measures are) still in draft format, that have or are likely to have an impact on BNPP notably include:</p> <ul style="list-style-type: none"> - the structural reforms comprising the French banking law of 26 July 2013 requiring that banks create subsidiaries for or segregate "speculative" proprietary operations from their traditional retail banking activities, the "Volcker rule" in the US which restricts proprietary transactions, sponsorship and investment in private equity funds and hedge funds by US and foreign banks, and expected potential changes in Europe; - regulations governing capital: CRD IV/CRR, the international standard for total loss-absorbing capacity (TLAC) and BNPP's designation as a financial institution that is of systemic importance by the Financial Stability Board;

¹See: IMF – October 2015 Financial Stability Report, Advanced Countries and January 2016 update

Element	Title																			
		<ul style="list-style-type: none"> - the European Single Supervisory Mechanism and the ordinance of 6 November 2014; - the Directive of 16 April 2014 related to deposit guarantee schemes and its delegation and implementing decrees, the Directive of 15 May 2014 establishing a Bank Recovery and Resolution framework, the Single Resolution Mechanism establishing the Single Resolution Council and the Single Resolution Fund; - the Final Rule by the US Federal Reserve imposing tighter prudential rules on the US transactions of large foreign banks, notably the obligation to create a separate intermediary holding company in the US (capitalised and subject to regulation) to house their US subsidiaries; - the new rules for the regulation of over-the-counter derivative activities pursuant to Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, notably margin requirements for uncleared derivative products and the derivatives of securities traded by swap dealers, major swap participants, security-based swap dealers and major security-based swap participants, and the rules of the US Securities and Exchange Commission which require the registration of banks and major swap participants active on derivatives markets and transparency and reporting on derivative transactions; - the new MiFID and MiFIR, and European regulations governing the clearing of certain over-the-counter derivative products by centralised counterparties and the disclosure of securities financing transactions to centralised bodies. <p>Cyber risk</p> <p>In recent years, financial institutions have been impacted by a number of cyber incidents, notably involving large-scale alterations of data which compromise the quality of financial information. This risk remains today and BNPP, like other banks, has taken measures to implement systems to deal with cyber attacks that could destroy or damage data and critical systems and hamper the smooth running of its operations. Moreover, the regulatory and supervisory authorities are taking initiatives to promote the exchange of information on cyber security and cyber criminality in order to improve the security of technological infrastructures and establish effective recovery plans after a cyber incident.</p>

Section D - Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with its activities, as described below:</p> <p>Guarantor</p> <p>Eleven main categories of risk are inherent in BNPP's activities</p> <p>(1) <i>Credit Risk</i> - Credit risk is the potential that a bank borrower or counterparty will fail to meet its obligations in accordance with agreed terms. The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment;</p> <p>(2) <i>Counterparty Credit Risk</i> - Counterparty credit risk is the credit risk embedded in payment or transactions between counterparties. Those transactions include bilateral contracts such as over-the-counter (OTC) derivatives contracts which potentially expose the Bank to the risk of counterparty default, as well as contracts settled through clearing houses. The amount of this risk may vary over time in line with changing market parameters which then impacts the replacement value of the relevant transactions or portfolio;</p> <p>(3) <i>Securitisaton</i> - Securitisation means a transaction or scheme, whereby the credit risk associated with an exposure or pool of exposures is tranced, having the following characteristics:</p> <ul style="list-style-type: none"> - payments made in the transaction or scheme are dependent upon the performance of the exposure or pool of exposures; - the subordination of tranches determines the distribution of losses during the life of the risk transfer. <p>Any commitment (including derivatives and liquidity lines) granted to a securitisation operation must be treated as a securitisation exposure. Most of these commitments are held in the prudential banking book;</p> <p>(4) <i>Market Risk</i> - Market risk is the risk of incurring a loss of value due to adverse trends in market prices or parameters, whether directly observable or not.</p> <p>Observable market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether listed or obtained by reference to a similar asset), prices of derivatives, and other parameters that can be directly inferred from them, such as interest rates, credit spreads, volatilities and implied correlations or other similar parameters.</p> <p>Non-observable factors are those based on working assumptions such as parameters contained in models or based on statistical or economic analyses, non-ascertainable in the market.</p> <p>In fixed income trading books, credit instruments are valued on the basis of bond yields and credit spreads, which represent market parameters in the same way as interest rates or foreign exchange rates. The credit risk arising on the issuer of the debt instrument is therefore a component of market risk</p>

Element	Title	
		<p>known as issuer risk.</p> <p>Liquidity is an important component of market risk. In times of limited or no liquidity, instruments or goods may not be tradable or may not be tradable at their estimated value. This may arise, for example, due to low transaction volumes, legal restrictions or a strong imbalance between demand and supply for certain assets.</p> <p>The market risk related to banking activities encompasses the risk of loss on equity holdings on the one hand, and the interest rate and foreign exchange risks stemming from banking intermediation activities on the other hand;</p> <p>(5) <i>Operational Risk</i> - Operational risk is the risk of incurring a loss due to inadequate or failed internal processes, or due to external events, whether deliberate, accidental or natural occurrences. Management of operational risk is based on an analysis of the "cause - event - effect" chain.</p> <p>Internal processes giving rise to operational risk may involve employees and/or IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk.</p> <p>Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, conduct risks (risks related to the provision of inappropriate financial services), risk related to failures in operating processes, including loan procedures or model risks, as well as any potential financial implications resulting from the management of reputation risks;</p> <p>(6) <i>Compliance and Reputation Risk</i> - Compliance risk as defined in French regulations as the risk of legal, administrative or disciplinary sanctions, of significant financial loss or reputational damage that a bank may suffer as a result of failure to comply with national or European laws and regulations, codes of conduct and standards of good practice applicable to banking and financial activities, or instructions given by an executive body, particularly in application of guidelines issued by a supervisory body.</p> <p>By definition, this risk is a sub-category of operational risk. However, as certain implications of compliance risk involve more than a purely financial loss and may actually damage the institution's reputation, the Bank treats compliance risk separately.</p> <p>Reputation risk is the risk of damaging the trust placed in a corporation by its customers, counterparties, suppliers, employees, shareholders, supervisors and any other stakeholder whose trust is an essential condition for the corporation to carry out its day-to-day operations.</p> <p>Reputation risk is primarily contingent on all the other risks borne by the Bank;</p> <p>(7) <i>Concentration Risk</i> - Concentration risk and its corollary, diversification effects, are embedded within each risk, especially for credit, market and operational risks using the correlation parameters taken into account by the corresponding risk models.</p> <p>It is assessed at consolidated Group level and at financial conglomerate level;</p>

Element	Title	
		<p>(8) <i>Banking Book Interest Rate Risk</i> - Banking book interest rate risk is the risk of incurring losses as a result of mismatches in interest rates, maturities and nature between assets and liabilities. For banking activities, this risk arises in non-trading portfolios and primarily relates to global interest rate risk;</p> <p>(9) <i>Strategic and Business Risks</i> - Strategic risk is the risk that the Bank's share price may fall because of its strategic decisions.</p> <p>Business risk is the risk of incurring an operating loss due to a change in the economic environment leading to a decline in revenue coupled with insufficient cost-elasticity.</p> <p>These two types of risk are monitored by the Board of Directors;</p> <p>(10) <i>Liquidity Risk</i> - In accordance with regulations, the liquidity risk is defined as the risk that a bank will be unable to honour its commitments or unwind or settle a position due to the situation on the market or idiosyncratic factors, within a given time frame and at a reasonable [price or] cost;</p> <p>(11) <i>Insurance Underwriting Risk</i> - Insurance underwriting risk corresponds to the risk of a financial loss caused by an adverse trend in insurance claims. Depending on the type of insurance business (life, personal risk or annuities), this risk may be statistical, macroeconomic or behavioural, or may be related to public health issues or natural disasters. It is not the main risk factor arising in the life insurance business, where financial risks are predominant.</p> <p>(a) Difficult market and economic conditions have had and may continue to have a material adverse effect on the operating environment for financial institutions and hence on BNPP's financial condition, results of operations and cost of risk.</p> <p>(b) Due to the geographic scope of its activities, BNPP may be vulnerable to country or regional-specific political, macroeconomic and financial environments or circumstances.</p> <p>(c) BNPP's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in credit spreads or other factors.</p> <p>(d) Significant interest rate changes could adversely affect BNPP's revenues or profitability.</p> <p>(e) The prolonged low interest rate environment carries inherent systemic risks.</p> <p>(f) The soundness and conduct of other financial institutions and market participants could adversely affect BNPP.</p> <p>(g) BNPP may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>(h) BNPP may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.</p>

Element	Title	
		<p>(i) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.</p> <p>(j) Laws and regulations adopted in response to the global financial crisis may materially impact BNPP and the financial and economic environment in which it operates.</p> <p>(k) BNPP is subject to extensive and evolving regulatory regimes in the jurisdictions in which it operates.</p> <p>(l) BNPP may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations.</p> <p>(m) There are risks related to the implementation of BNPP's strategic plan.</p> <p>(n) BNPP may experience difficulties integrating acquired companies and may be unable to realise the benefits expected from its acquisitions.</p> <p>(o) Intense competition by banking and non-banking operators could adversely affect BNPP's revenues and profitability.</p> <p>(p) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPP's results of operations and financial condition.</p> <p>(q) BNPP's risk management policies, procedures and methods, may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.</p> <p>(r) BNPP's hedging strategies may not prevent losses.</p> <p>(s) Adjustments to the carrying value of BNPP's securities and derivatives portfolios and BNPP's own debt could have an impact on its net income and shareholders' equity.</p> <p>(t) The expected changes in accounting principles relating to financial instruments may have an impact on BNPP's balance sheet and regulatory capital ratios and result in additional costs.</p> <p>(u) BNPP's competitive position could be harmed if its reputation is damaged.</p> <p>(v) An interruption in or a breach of BNPP's information systems may result in material losses of client or customer information, damage to BNPP's reputation and lead to financial losses.</p> <p>(w) Unforeseen external events may disrupt BNPP's operations and cause substantial losses and additional costs.</p> <p>Issuer</p> <p>The main risks described above in relation to BNPP also represent the main risks for BNPP B.V., either as an individual entity or a company in the BNPP Group.</p>

Element	Title	
		<p><i>Dependency Risk</i></p> <p>BNPP B.V. is an operating company. The assets of BNPP B.V. consist of the obligations of other BNPP Group entities. The ability of BNPP B.V. to meet its own obligations will depend on the ability of other BNPP Group entities to fulfil their obligations. In respect of securities it issues, the ability of BNPP B.V. to meet its obligations under such securities depends on the receipt by it of payments under certain hedging agreements that it enters with other BNPP Group entities. Consequently, Holders of BNPP B.V. securities will, subject to the provisions of the Guarantee issued by BNPP, be exposed to the ability of BNPP Group entities to perform their obligations under such hedging agreements.</p> <p><i>Market Risk</i></p> <p>BNPP B.V. takes on exposure to market risks arising from positions in interest rates, currency exchange rates, commodities and equity products, all of which are exposed to general and specific market movements. However, these risks are hedged by option and swap agreements and therefore these risks are mitigated in principle.</p> <p><i>Credit Risk</i></p> <p>BNPP B.V. has significant concentration of credit risks as all OTC contracts are acquired from its parent company and other BNPP Group entities. Taking into consideration the objective and activities of BNPP B.V. and the fact that its parent company is under supervision of the European Central Bank and the Autorité de Contrôle Prudentiel et de Résolution management considers these risks as acceptable. The long term senior debt of BNP Paribas is rated (A) by Standard & Poor's and (A1) by Moody's.</p> <p><i>Liquidity Risk</i></p> <p>BNPP B.V. has significant liquidity risk exposure. To mitigate this exposure, BNPP B.V. entered into netting agreements with its parent company and other BNPP Group entities.</p>
D.3	Key risks regarding the Securities	<p>In addition to the risks (including the risk of default) that may affect the Issuer's ability to fulfil its obligations under the Securities [or the Guarantor's ability to perform its obligations under the Guarantee], there are certain factors which are material for the purposes of assessing the risks associated with Securities issued under the Base Prospectus, including:</p> <p><i>Market Risks</i></p> <ul style="list-style-type: none"> -the Securities (other than Secured Securities) are unsecured obligations; -Securities including leverage involve a higher level of risk and whenever there are losses on such Securities those losses may be higher than those of a similar security which is not leveraged; -the trading price of the Securities is affected by a number of factors including, but not limited to, (in respect of Securities linked to an Underlying Reference) the price of the relevant Underlying Reference(s), time to expiration and volatility and such factors mean that the trading price of the Securities may be below the Cash Settlement Amount or value of the Entitlement; -exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities;

Element	Title	
		<p><i>Holder Risks</i></p> <ul style="list-style-type: none"> -limitations on the exercise of Securities may mean that a Holder is not able to exercise all the Securities that it desires to exercise on a particular date where the Issuer has the option to limit the number of Securities exercisable on any date or may be required to sell or purchase Securities (incurring transaction costs in each case) in order to realise its investment where a minimum number of Securities must be exercised, -the meetings of Holders provisions permit defined majorities to bind all Holders; -in certain circumstances Holders may lose the entire value of their investment; <p><i>Issuer/Guarantor Risks</i></p> <ul style="list-style-type: none"> -a reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Securities; -certain conflicts of interest may arise (see Element E.4 below); <p><i>Legal Risks</i></p> <ul style="list-style-type: none"> -the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, cancellation or may result in the amount payable on scheduled settlement being different from the amount expected to be paid at scheduled settlement and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities; -expenses and taxation may be payable in respect of the Securities; -the Securities may be cancelled in the case of illegality or impracticability and such redemption may result in an investor not realising a return on an investment in the Securities; -any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it; <p><i>Secondary Market Risks</i></p> <ul style="list-style-type: none"> -the only means through which a Holder can realise value from the Security prior to its Exercise Date is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to exercise or wait until redemption of the Securities to realise a greater value than its trading value); -BNP Paribas Arbitrage S.N.C. is required to act as market-maker. In those circumstances, BNP Paribas Arbitrage S.N.C. will endeavour to maintain a secondary market throughout the life of the Securities, subject to normal market conditions and will submit bid and offer prices to the market. The spread between bid and offer prices may change during the life of the Securities. However, during certain periods, it may be difficult, impractical or impossible for BNP Paribas Arbitrage S.N.C. to quote bid and offer prices, and during such periods, it may be difficult, impracticable or impossible to buy or sell these Securities. This may, for example, be due to adverse market conditions, volatile prices or large price fluctuations, a large marketplace being closed or restricted or experiencing technical problems such as an IT system failure or network disruption. <p><i>Risks relating to Underlying Reference Asset(s)</i></p>

Element	Title	
		<p>-In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:</p> <p>-exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.</p> <p><i>Risks relating to Specific types of products</i></p> <p>The following risks are associated with ETS Products:</p> <p>Leverage Products</p> <p>Investors may be exposed to a partial or total loss of their invested capital. The return on the Securities depends on the performance of the Underlying Reference(s) . Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Securities when repayment falls due, an investor may lose all or part of his investment in the Securities.</p> <p>If the Guarantor is unable or unwilling to meet its obligations under the Guarantee when due, an investor may lose all or part of his investment in the Securities.</p> <p>In addition, investors may lose all or part of their investment in the Securities as a result of the terms and conditions of the Securities.</p>

B.19/ B.1	Denominación social y nombre comercial del Garante	BNP Paribas.
B.19/ B.2	Domicilio social/ forma jurídica / legislación aplicable/ país de constitución	El Garante se constituyó en Francia como una sociedad anónima (" <i>société anonyme</i> ") de Derecho francés autorizada para ejercer la actividad bancaria, con domicilio social en 16, boulevard des Italiens - 75009 París, Francia.
B.19/ B.4b	Información sobre tendencias	<p>Entorno macroeconómico</p> <p>Las condiciones macroeconómicas y de mercado afectan a los resultados de BNPP. La naturaleza de la actividad llevada a cabo por el BNPP es particularmente sensible a las condiciones macroeconómicas y de mercado en Europa, que en ocasiones han sido difíciles y volátiles los últimos años.</p> <p>En 2015, la actividad económica mundial siguió siendo lenta. Se produjo una desaceleración de la actividad en los países emergentes, mientras que en los países desarrollados siguió adelante una modesta recuperación. La perspectiva mundial sigue encontrándose bajo la influencia de tres transiciones importantes: la desaceleración del crecimiento económico en China, la caída de los precios de la energía y de otras materias primas y un endurecimiento inicial de la política monetaria de EE.UU. en un contexto de recuperación interna sostenible, mientras que los bancos centrales de varios de los principales países desarrollados siguen relajando sus políticas monetarias. Para 2016, el FMI¹ prevé la recuperación progresiva de la actividad económica mundial, pero con perspectivas de bajo crecimiento a medio plazo en los países tanto desarrollados como emergentes.</p> <p>En ese contexto, pueden observarse dos riesgos:</p> <p><i>Inestabilidad financiera debido a la vulnerabilidad de los países emergentes</i></p> <p>A pesar de que la exposición del Grupo BNP Paribas en países emergentes es limitada, la vulnerabilidad de estas economías puede generar perturbaciones en el sistema financiero mundial que podrían afectar al Grupo BNP Paribas y alterar sus resultados.</p> <p>En numerosas economías emergentes, en 2015 se observó un incremento de los compromisos en moneda extranjera, mientras que los niveles de endeudamiento (tanto en las monedas locales como en monedas extranjeras) ya eran elevados. Además, las perspectivas de un aumento progresivo de los tipos de interés de referencia en EE.UU. (la Reserva Federal decidió un primer aumento en diciembre de 2015), así como la volatilidad financiera recrudescida vinculada a las preocupaciones relativas al crecimiento de los países emergentes, han contribuido al endurecimiento de las condiciones financieras externas, a fugas de capitales, a ulteriores depreciaciones monetarias en numerosos países emergentes y a un incremento de los riesgos para los bancos, lo cual podría conllevar un empeoramiento de las calificaciones soberanas.</p> <p>Dada la posible normalización de las primas de riesgo, existe un riesgo de perturbaciones en el mercado mundial (aumento de las primas de riesgo, deterioro de la confianza, reducción del crecimiento, aplazamiento o desaceleración de la armonización de las políticas monetarias, caída de la liquidez del mercado, problemas con la valoración de los activos, contracción de la oferta de crédito y desapalancamiento caótico) que afectaría a todas las entidades bancarias.</p> <p><i>Riesgos sistémicos relacionados a las condiciones económicas y a la liquidez del mercado</i></p> <p>La continuación de una situación caracterizada por unos tipos de interés</p>

Algunas de las medidas que se adoptaron recientemente o que siguen (sus medidas de aplicación siguen) en fase de proyecto, que han influido o es probable que influyan en BNPP, son:</p> <ul style="list-style-type: none"> - las reformas estructurales que comprenden la Ley bancaria francesa del 26 de julio de 2013, la cual exige que los bancos creen filiales o que separen las operaciones por cuenta propia "especulativas" de sus actividades bancarias minoristas tradicionales; la "norma Volcker" en EE.UU. que restringe las transacciones por cuenta propia, el patrocinio y la inversión en fondos de capital privado y fondos de cobertura por parte de bancos estadounidenses y de otros países, y los cambios potenciales que se esperan en Europa; - la normativa de regulación del capital: CRD IV/CRR, la norma internacional relativa a la capacidad total de absorción de pérdidas (TLAC) y la designación de BNPP como institución financiera de importancia sistémica por el Consejo de Estabilidad Financiera (FSB); - el Mecanismo Único de Supervisión europeo y la normativa del de 6 noviembre de 2014; - la Directiva 2014/49/UE, de 16 de abril de 2014, relativa a los sistemas de garantía de depósitos y sus decretos de delegación y de ejecución, la Directiva 2014/59/UE, de 15 de mayo de 2014, por la que se establece un marco para la reestructuración y la resolución de entidades de crédito y empresas de servicios de inversión, el Mecanismo Único de Resolución por el que se establecen el Consejo Único de Resolución y el Fondo Único de Resolución; - la Norma Definitiva (<i>Final Rule</i>) de la Reserva Federal de EE.UU. que impone normas prudenciales más rígidas para las transacciones en EE.UU. de grandes bancos extranjeros, en concreto la obligación de crear una sociedad de cartera intermediaria separada en EE.UU. - Section D - Riesgos

Elemento	Título	
D.2	Riesgos clave asociados al Emisor y al Garante	<p>Los compradores potenciales de Valores emitidos en virtud del presente Folleto de Base deben tener experiencia en relación con las opciones y las transacciones con opciones, y deben comprender los riesgos de las transacciones con Valores. Toda inversión en Valores presenta determinados riesgos que deben tenerse en cuenta antes de tomar cualquier decisión de inversión. Ciertos riesgos pueden afectar a la capacidad del Emisor para cumplir sus obligaciones derivadas de los Valores o a la capacidad del Garante de cumplir sus obligaciones derivadas de la Garantía (en el caso de los Valores emitidos por BNPP B.V.), algunos de los cuales escapan a su control. En concreto, el Emisor (y el Garante, en el caso de los Valores emitidos por BNPP B.V.), junto con el Grupo BNPP, está expuesto a los riesgos asociados a sus actividades, según se describen a continuación:</p> <p>Garante</p> <p>Existen once categorías principales de riesgos inherentes a las actividades de BNPP:</p> <p>(1) <i>Riesgo de Crédito:</i> - el riesgo de crédito es la posibilidad de que un prestatario bancario o una contraparte incumplan sus obligaciones de conformidad con las condiciones acordadas. La probabilidad de impago y la recuperación prevista en relación con el préstamo o el importe por cobrar en caso de impago son componentes clave de la evaluación de la calidad crediticia;</p> <p>(2) <i>Riesgo de Crédito de la Contraparte:</i> - el riesgo de crédito de la contraparte es el riesgo de crédito implícito en los pagos o las transacciones entre las contrapartes. Esas transacciones incluyen contratos bilaterales como contratos de derivados extrabursátiles que podrían exponer al Banco al riesgo de impago de la contraparte, así como contratos liquidados a través de cámaras de compensación. La magnitud de este riesgo puede variar con el paso del tiempo en consonancia con el cambio en los parámetros de mercado que afecten al valor de sustitución de las correspondientes transacciones o carteras;</p> <p>(3) <i>Titulización:</i> - la titulización es una transacción o un plan por los cuales se divide en tramos el riesgo de crédito asociado a una exposición o a un conjunto de transacciones, y tiene las siguientes características:</p> <ul style="list-style-type: none"> - los pagos realizados en relación con la transacción o el plan dependen de la rentabilidad de la exposición o el conjunto de exposiciones; - la subordinación de tramos determina la distribución de las pérdidas mientras exista la transferencia de riesgo. <p>Todo compromiso (incluidos derivados y líneas de liquidez) otorgado a una operación de titulización debe considerarse como una exposición a titulización. La mayoría de estos compromisos se recogen en la cartera bancaria de prudencia;</p> <p>(4) <i>Riesgo de Mercado:</i> - el riesgo de mercado es el riesgo de sufrir una pérdida de valor derivada de tendencias adversas en los precios o los parámetros del mercado, ya sea observable directamente o no.</p> <p>Los parámetros de mercado observables incluyen, entre otros, tipos de cambio, precios de valores y materias primas (ya sean cotizados u obtenidos por referencia a un activo similar), precios de derivados y otros parámetros que se pueden inferir directamente de ellos, como tipos de interés, diferenciales de crédito, volatilidades y correlaciones implícitas u otros parámetros similares.</p>

		<p>Los factores no observables son los que se basan en hipótesis, como parámetros recogidos en modelos o basados en análisis estadísticos o económicos, no verificables en el mercado.</p> <p>En las carteras de negociación de renta fija, los instrumentos de crédito se valoran sobre la base de los rendimientos de los bonos y los diferenciales de crédito, que representan parámetros de mercado del mismo modo que los tipos de interés o los tipos de cambio. Por consiguiente, el riesgo de crédito derivado del emisor del instrumento de deuda es un componente del riesgo de mercado denominado riesgo de emisor.</p> <p>La liquidez es un componente importante del riesgo de mercado. En épocas de liquidez limitada o falta de liquidez, es posible que no puedan contratarse instrumentos o bienes o que estos no se puedan contratar a su valor estimado. Esto puede suceder, por ejemplo, debido a bajos volúmenes de transacción, restricciones legales o un acusado desequilibrio entre la oferta y la demanda de determinados activos.</p> <p>El riesgo de mercado asociado a las actividades bancarias engloba el riesgo de pérdidas en posiciones de renta variable, por un lado, y los riesgos de tipos de interés y de tipos de cambio derivados de las actividades de intermediación bancaria, por otro;</p> <p>(5) <i>Riesgo Operativo</i>: - el riesgo operativo es el riesgo de incurrir en una pérdida debido a procesos internos inadecuados o erróneos, o debido a acontecimientos externos, ya sean deliberados, accidentales o naturales. La gestión del riesgo operativo se basa en un análisis de la cadena "causa - acontecimiento - efecto".</p> <p>Los procesos internos que generan riesgo operativo pueden estar relacionados con empleados y/o sistemas informáticos. Los acontecimientos externos incluyen, entre otras cosas, inundaciones, incendios, terremotos y atentados terroristas. Los supuestos de crédito o de mercado, como los impagos o las fluctuaciones de valor, no se incluyen en la categoría de riesgo operativo.</p> <p>El riesgo operativo engloba fraude, riesgos de recursos humanos, riesgos legales, riesgos de incumplimiento normativo, riesgos fiscales, riesgos de sistemas de información, riesgos de conducta (riesgos asociados a la prestación de servicios financieros inapropiados), riesgos relacionados con fallos en procesos operativos (incluidos procedimientos de préstamo) o riesgos de modelo, así como cualesquiera otras implicaciones financieras derivadas de la gestión de los riesgos reputacionales;</p> <p>(6) <i>Riesgo de Cumplimiento Normativo y Reputacional</i>: - según se define en la normativa francesa, el riesgo de cumplimiento normativo es el riesgo de sanciones legales, administrativas o disciplinarias, o de pérdida financiera o daño a la reputación considerables que un banco puede sufrir como consecuencia de incumplir leyes o reglamentos, códigos de conducta o normas de nuevas prácticas, nacionales o europeos, aplicables a las actividades bancarias y financieras, o instrucciones dictadas por un órgano ejecutivo, en especial en aplicación de las directrices dictadas por un órgano de supervisión.</p> <p>Por definición, este riesgo es una subcategoría del riesgo operativo. Sin embargo, puesto que determinadas implicaciones del riesgo de cumplimiento normativo conllevan más que una pérdida financiera y, de hecho, pueden dañar la reputación de la institución, el Banco trata el riesgo de cumplimiento normativo por separado.</p> <p>El riesgo reputacional es el riesgo de que resulte dañada la confianza</p>

Por lo que respecta a las actividades bancarias, este riesgo se genera en carteras que no realizan negociaciones y está relacionado principalmente al riesgo de interés mundial;</p> <p>(9) <i>Riesgos de Estrategia y Empresariales:</i> - el riesgo de estrategia es el riesgo de que la cotización del Banco caiga a causa de sus decisiones estratégicas.</p> <p>El riesgo empresarial es el riesgo de sufrir una pérdida operativa debida a un cambio en la coyuntura económica que provoca un descenso de los ingresos asociado a insuficiente elasticidad de costes.</p> <p>Estos dos tipos de riesgos son supervisados por el Consejo de Administración;</p> <p>(10) <i>Riesgo de Liquidez:</i> - según la normativa, el riesgo de liquidez se define como el riesgo de que un banco no sea capaz de cumplir sus compromisos o de liquidar o deshacer una posición a causa de la situación del mercado o de factores idiosincrásicos en un plazo de tiempo determinado y a un precio o coste razonables; y</p> <p>(11) <i>Riesgo de Suscripción de Seguros</i> - el riesgo de suscripción de seguros corresponde al riesgo de una pérdida financiera ocasionada por una tendencia adversa en los partes de los seguros. En función del tipo de actividad del seguro (vida, riesgo personal o anualidades), el riesgo puede ser estadístico, macroeconómico o conductual, o puede estar relacionado con problemas de salud pública o desastres naturales. No es el factor de riesgo principal derivado de la actividad de seguros de vida, donde los riesgos financieros son los predominantes.</p> <p>(a) Las difíciles condiciones del mercado y económicas han tenido y podrían seguir teniendo un efecto material adverso en el entorno operativo de las instituciones financieras y por ende en las condiciones financieras, los resultados de las operaciones y el coste del riesgo de BNPP.</p> <p>(b) Dado el ámbito geográfico de sus actividades, BNPP puede ser vulnerable a los entornos o circunstancias de carácter político, macroeconómico y</p>

En tales circunstancias, BNP Paribas Arbitrage S.N.C. se esforzará por mantener un mercado secundario a lo largo de toda la vida de los Valores, sujeto a condiciones normales de mercado y presentará precios de compra/venta al mercado. El margen entre los precios de compra/venta podrá variar durante la vida de los Valores. Sin embargo, durante determinados periodos, podrá ser difícil, inviable o imposible para BNP Paribas Arbitrage S.N.C. indicar precios de compra/venta, y durante dichos periodos, podrá ser difícil, inviable o imposible vender o comprar dichos Valores. Esto puede deberse, por ejemplo, a condiciones de mercado adversas, precios volátiles o grandes fluctuaciones de precio, o a un gran mercado cerrado o restringido o que experimente problemas técnicos como por ejemplo un fallo del sistema de informático o una interrupción de la red.</p> <p>Asimismo, existen riesgos específicamente asociados a los Valores que están vinculados a un Subyacente de Referencia (incluidos los Valores Híbridos); una inversión en estos Valores entrañará riesgos significativos no asociados a una inversión en un valor de deuda convencional. Entre los factores de riesgo asociados a los Valores vinculados a un Subyacente de Referencia se incluyen : exposición a uno o más índices, supuestos de ajuste y perturbaciones o la no apertura de cualquier mercado susceptibles de incidir negativamente en el valor y en la liquidez de los Valores, y el hecho de que el Emisor no proporcionará con posterioridad a la emisión información alguna acerca del Subyacente de Referencia.</p> <p>En determinadas circunstancias, los Tenedores podrían perder la totalidad del valor de su inversión.</p>
