B.19	Information about the Guarantor	
B.19/ B.1	Legal and commercial name of the Guarantor	BNP Paribas.
B.19/ B.2	Domicile/ legal form/ legislation/ country of incorporation	The Guarantor was incorporated in France as a <i>société anonyme</i> under French law and licensed as a bank having its head office at 16, boulevard des Italiens - 75009 Paris, France.
B.19/ B.4b	Trend information	<p>Macroeconomic environment</p> <p>Macroeconomic and market conditions affect BNPP's results. The nature of BNPP's business makes it particularly sensitive to macroeconomic and market conditions in Europe, which have been at times challenging and volatile in recent years.</p> <p>In 2016, global growth stabilised slightly above 3%, despite a much lower growth in the advanced economies. Three major transitions continue to affect the global outlook: declining economic growth in China, fluctuating energy prices that rose in 2016, and a second tightening of monetary policy in the United States in the context of a resilient domestic recovery. It should be noted that the central banks of several large developed countries continue to maintain accommodative monetary policies. IMF economic forecasts for 2017 point to a recovery in global activity, no significant improvement in growth in the euro zone and Japan, and a slowdown in the United Kingdom.</p> <p>In that context, two risks can be identified:</p> <p><i>Financial instability due to the vulnerability of emerging countries</i></p> <p>While the exposure of the BNP Paribas Group to emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the Group and potentially alter its results.</p> <p>A broad increase in the foreign exchange liabilities of the economies of many emerging market economies was observed in 2016, at a time when debt levels (in both foreign and local currency) were already high. The private sector was the main source of the increase in this</p>

		<p>debt. Furthermore, the prospect of a gradual increase in US key rates (the Federal Reserve Bank made its first increase in December 2015, and a second in December 2016) and increased financial volatility stemming from concerns about growth and mounting geopolitical risk in emerging markets have contributed to a tightening of external financial conditions, increased capital outflows, further currency depreciations in many emerging markets and heightened risks for banks. These factors could result in further downgrades of sovereign ratings.</p> <p>There is still a risk of disturbances in global markets (rising risk premiums, erosion of confidence, declining growth, deferral or slower pace of normalisation of monetary policies, declining liquidity in markets, asset valuation problems, decline in credit supply and disorderly deleveraging) that could affect all banking institutions.</p> <p><i>Systemic risks related to increased debt and market liquidity</i></p> <p>Despite the upturn since mid-2016, interest rates remain low, which may continue to encourage excessive risk-taking among some players in the financial system: increased maturities of financing and assets held, less stringent policy for granting loans, increase in leveraged financing.</p> <p>Some players (insurance companies, pension funds, asset managers, etc.) entail an increasingly systemic dimension and in the event of market turbulence (linked for instance to a sudden rise in interest rates and/or a sharp price correction) they may decide to unwind large positions in an environment of relatively weak market liquidity.</p> <p>Recent years have also seen an increase in debt (public and private, in both developed and emerging countries). The resulting risk could materialise either in the event of a spike in interest rates or a further negative growth shock.</p> <p><i>Laws and regulations applicable to financial institutions</i></p> <p>Recent and future changes in the laws and regulations applicable to financial institutions may have a significant impact on BNPP. Measures that were recently adopted or which are (or whose application measures are) still in draft format, that have or are likely to have an impact on BNPP notably include:</p> <ul style="list-style-type: none"> - the structural reforms comprising the French banking law of 26 July 2013 requiring that banks create subsidiaries for or segregate "speculative" proprietary operations from their traditional retail banking activities, the "Volcker rule" in the US which restricts proprietary transactions, sponsorship and investment in private equity funds and hedge funds by US and foreign banks, and upcoming potential changes in Europe; - regulations governing capital: the Capital Requirements Directive IV ("CRD 4")/the Capital Requirements Regulation ("CRR"), the international standard for total-loss absorbing capacity ("TLAC") and BNPP's designation as a financial institution that is of systemic importance by the Financial Stability Board; - the European Single Supervisory Mechanism and the ordinance of 6 November 2014; - the Directive of 16 April 2014 related to deposit guarantee systems and its delegation and implementing Decrees, the Directive of 15 May 2014 establishing a Bank Recovery and Resolution framework, the Single Resolution Mechanism establishing the Single Resolution Council and the Single Resolution Fund; - the Final Rule by the US Federal Reserve imposing tighter prudential rules on the US transactions of large foreign banks, notably the obligation to create a separate intermediary holding company in the US (capitalised and subject to regulation) to house their US subsidiaries; - the new rules for the regulation of over-the-counter derivative activities pursuant to Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, notably margin requirements for uncleared derivative products and the derivatives of securities traded by swap dealers, major swap participants, security-based swap dealers and major security-based swap participants, and the rules of the US Securities and Exchange Commission which require the registration of banks and major swap participants active on derivatives markets as well as transparency and reporting on derivative transactions; - the new Markets in Financial Instruments Directive ("MiFID") and Markets in

Element	Title																																		
		<p>Financial Instruments Regulation ("MiFIR"), and European regulations governing the clearing of certain over-the-counter derivative products by centralised counterparties and the disclosure of securities financing transactions to centralised bodies.</p> <p>Moreover, in today's tougher regulatory context, the risk of non-compliance with existing laws and regulations, in particular those relating to the protection of the interests of customers, is a significant risk for the banking industry, potentially resulting in significant losses and fines. In addition to its compliance system, which specifically covers this type of risk, the Group places the interest of its customers, and more broadly that of its stakeholders, at the heart of its values. The new Code of conduct adopted by the Group in 2016 sets out detailed values and rules of conduct in this area.</p> <p>Cyber risk</p> <p>In recent years, financial institutions have been impacted by a number of cyber incidents, notably involving large-scale alterations of data which compromise the quality of financial information. This risk remains today and BNPP, like other banks, has taken measures to implement systems to deal with cyber attacks that could destroy or damage data and critical systems and hamper the smooth running of its operations. Moreover, the regulatory and supervisory authorities are taking initiatives to promote the exchange of information on cyber security and cyber criminality in order to improve the security of technological infrastructures and establish effective recovery plans after a cyber incident.</p>

B.19/ B.14	Dependence upon other Group entities	<p>Subject to the following paragraph, BNPP is not dependent upon other members of the BNPP Group.</p> <p>In April 2004, BNPP began outsourcing IT Infrastructure Management Services to the BNP Paribas Partners for Innovation (BP²I) joint venture set up with IBM France at the end of 2003. BP²I provides IT Infrastructure Management Services for BNPP and several BNPP subsidiaries in France (including BNP Paribas Personal Finance, BP2S, and BNP Paribas Cardif), Switzerland, and Italy. In mid-December 2011 BNPP renewed its agreement with IBM France for a period lasting until end-2017. At the end of 2012, the parties entered into an agreement to gradually extend this arrangement to BNP Paribas Fortis as from 2013. The Swiss subsidiary was closed on 31 December 2016.</p> <p>BP²I is under the operational control of IBM France. BNP Paribas has a strong influence over this entity, which is 50/50 owned with IBM France. The BNP Paribas staff made available to BP²I make up half of that entity's permanent staff, its buildings and processing centres are the property of the Group, and the governance in place provides BNP Paribas with the contractual right to monitor the entity and bring it back into the Group if necessary.</p> <p>ISFS is a fully-owned IBM subsidiary, which has changed its name to IBM Luxembourg, and handles IT Infrastructure Management for part of BNP Paribas Luxembourg's entities.</p> <p>BancWest's data processing operations are outsourced to Fidelity Information Services ("FIS") for its core banking. The hosting and production operations are also located at FIS in Honolulu.</p>

Section D - Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with its activities, as described below:</p> <p>Guarantor</p> <p>As defined in BNPP's 2016 Registration Document (in English version) and Annual Financial Report, eight main categories of risk are inherent in BNPP's activities</p> <p>(1) <i>Credit Risk</i> - Credit risk is the consequence resulting from the likelihood that a borrower or counterparty will fail to meet its obligations in accordance with agreed terms. The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment;</p> <p>(2) <i>Securitisation in the banking book</i> - Securitisation means a transaction or scheme, whereby the credit risk associated with an exposure or pool of exposures is tranching, having the following characteristics:</p> <ul style="list-style-type: none"> - payments made in the transaction or scheme are dependent upon the performance of the exposure or pool of exposures; - the subordination of tranches determines the distribution of losses during the life of the risk transfer. <p>Any commitment (including derivatives and liquidity lines) granted to a securitisation operation must be treated as a securitisation exposure. Most of these commitments are held in the prudential banking book;</p> <p>(3) <i>Counterparty Credit Risk</i> - Counterparty credit risk is the translation of the credit risk embedded in financial transactions, investments and/or settlement transactions between counterparties. Those transactions include bilateral contracts such as over-the-counter ("OTC") derivatives contracts as well as contracts settled through clearing houses. The amount of this risk may vary over time in line with changing market parameters which then impacts the replacement value of the relevant transactions</p> <p>Counterparty risk lies in the event that a counterparty defaults on its obligations to pay the Bank the full present value of the flows relating to a transaction or a portfolio for which the Bank is a net receiver. Counterparty credit risk is also linked to the replacement cost of a derivative or portfolio in the event of counterparty default. Hence, it can be seen as a market risk in case of default or a contingent risk. Counterparty risk arises both from both bilateral activities of BNP Paribas with clients and clearing activities through a clearing house or an external clearer.</p> <p>(4) <i>Market Risk</i> - Market risk is the risk of incurring a loss of value due to adverse trends in market prices or parameters, whether directly observable or not.</p> <p>Observable market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether listed or obtained by reference to a similar asset), prices of derivatives, and other parameters that can be directly inferred from them, such as interest rates, credit spreads, volatilities and implied correlations or other similar parameters.</p> <p>Non-observable factors are those based on working assumptions such as parameters</p>

Element	Title	
		<p>contained in models or based on statistical or economic analyses, non-ascertainable in the market.</p> <p>In fixed income trading books, credit instruments are valued on the basis of bond yields and credit spreads, which represent market parameters in the same way as interest rates or foreign exchange rates. The credit risk arising on the issuer of the debt instrument is therefore a component of market risk known as issuer risk.</p> <p>Liquidity is an important component of market risk. In times of limited or no liquidity, instruments or goods may not be tradable or may not be tradable at their estimated value. This may arise, for example, due to low transaction volumes, legal restrictions or a strong imbalance between demand and supply for certain assets.</p> <p>The market risk related to banking activities encompasses the risk of loss on equity holdings on the one hand, and the interest rate and foreign exchange risks stemming from banking intermediation activities on the other hand;</p> <p>(5) <i>Liquidity Risk</i> - Liquidity risk is the risk that BNPP will not be able to honour its commitments or unwind or settle a position due to the market environment or idiosyncratic factors (i.e. specific to BNP Paribas), within a given timeframe and at a reasonable cost.</p> <p>Liquidity risk reflects the risk of the BNPP Group being unable to fulfil current or future foreseen or unforeseen cash or collateral requirements, across all time horizons, from the short to the long term</p> <p>This risk may stem from the reduction in funding sources, draw down of funding commitments, a reduction in the liquidity of certain assets, or an increase in cash or collateral margin calls. It may be related to the bank itself (reputation risk) or to external factors (risks in some markets).</p> <p>The BNPP Group's liquidity risk is managed under a global liquidity policy approved by the Group's ALM Committee. This policy is based on management principles designed to apply both in normal conditions and in a liquidity crisis. The Group's liquidity position is assessed on the basis of internal indicators and regulatory ratios.</p> <p>(6) <i>Operational Risk</i> - Operational risk is the risk of incurring a loss due to inadequate or failed internal processes, or due to external events, whether deliberate, accidental or natural occurrences. Management of operational risk is based on an analysis of the "cause - event - effect" chain.</p> <p>Internal processes giving rise to operational risk may involve employees and/or IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk.</p> <p>Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, conduct risks (risks related to the provision of inappropriate financial services), risk related to failures in operating processes, including loan procedures or model risks, as well as any potential financial implications resulting from the management of reputation risks;</p> <p>(7) <i>Compliance and Reputation Risk</i> - Compliance risk is defined in French regulations as the risk of legal, administrative or disciplinary sanctions, of significant financial loss or reputational damage that a bank may suffer as a result of failure to comply with national or European laws and regulations, codes of conduct and standards of good practice applicable to banking and financial activities, or instructions given by an executive body, particularly in application of guidelines issued by a supervisory</p>

		<p>body.</p> <p>By definition, this risk is a sub-category of operational risk. However, as certain implications of compliance risk involve more than a purely financial loss and may actually damage the institution's reputation, BNPP treats compliance risk separately.</p> <p>Reputation risk is the risk of damaging the trust placed in a corporation by its customers, counterparties, suppliers, employees, shareholders, supervisors and any other stakeholder whose trust is an essential condition for the corporation to carry out its day-to-day operations.</p> <p>Reputation risk is primarily contingent on all the other risks borne by BNPP;</p> <p>(8) <i>Insurance Risk</i> - BNP Paribas Cardif is exposed to the following risks:</p> <ul style="list-style-type: none"> - market risk, risk of a financial loss arising from adverse movements of financial markets. These adverse movements are notably reflected in prices (foreign exchange rates, bond prices, equity and commodity prices, derivatives prices, real estate prices...) and derived from fluctuations in interest rates, credit spreads, volatility and correlation; - credit risk, risk of loss resulting from fluctuations in the credit standing of issuers of securities, counterparties and any debtors to which insurance and reinsurance undertakings are exposed. Among the debtors, risks related to financial instruments (including the banks in which the Company holds deposits) and risks related to receivables generated by the underwriting activities (premium collection, reinsurance recovering...) are distinguished into two categories: "Asset Credit Risk" and "Liabilities Credit Risk"; - underwriting risk is the risk of a financial loss caused by a sudden, unexpected increase in insurance claims. Depending on the type of insurance business (life, non-life), this risk may be statistical, macroeconomic or behavioural, or may be related to public health issues or disasters; - operational risk is the risk of loss resulting from the inadequacy or failure of internal processes, IT failures or deliberate external events, whether accidental or natural. The external events mentioned in this definition include those of human or natural origin. <p>(a) Difficult market and economic conditions have had and may continue to have a material adverse effect on the operating environment for financial institutions and hence on BNPP's financial condition, results of operations and cost of risk.</p> <p>(b) The United Kingdom's referendum to leave the European Union may lead to significant uncertainty, volatility and disruption in European and broader financial and economic markets and hence may adversely affect BNPP's operating environment.</p> <p>(c) Due to the geographic scope of its activities, BNPP may be vulnerable to country or regional-specific political, macroeconomic and financial environments or circumstances.</p> <p>(d) BNPP's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in credit spreads or other factors.</p>

Element	Title	
		<p>(e) Significant interest rate changes could adversely affect BNPP's revenues or profitability.</p> <p>(f) The prolonged low interest rate environment carries inherent systemic risks, and an exit from such environment also carries risks.</p> <p>(g) The soundness and conduct of other financial institutions and market participants could adversely affect BNPP.</p> <p>(h) BNPP may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>(i) BNPP may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.</p> <p>(j) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.</p> <p>(k) Laws and regulations adopted in recent years, particularly in response to the global financial crisis may materially impact BNPP and the financial and economic environment in which it operates.</p> <p>(l) BNPP is subject to extensive and evolving regulatory regimes in the jurisdictions in which it operates.</p> <p>(m) BNPP may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.</p> <p>(n) There are risks related to the implementation of BNPP's strategic plans.</p> <p>(o) BNPP may experience difficulties integrating acquired companies and may be unable to realise the benefits expected from its acquisitions.</p> <p>(p) Intense competition by banking and non-banking operators could adversely affect BNPP's revenues and profitability.</p> <p>(q) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPP's results of operations and financial condition.</p> <p>(r) BNPP's risk management policies, procedures and methods, may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.</p> <p>(s) BNPP's hedging strategies may not prevent losses.</p> <p>(t) Adjustments to the carrying value of BNPP's securities and derivatives portfolios and BNPP's own debt could have an impact on its net income and shareholders' equity.</p> <p>(u) The expected changes in accounting principles relating to financial instruments</p>

Element	Title	
		<p>may have an impact on BNPP's balance sheet and regulatory capital ratios and result in additional costs.</p> <p>(v) BNPP's competitive position could be harmed if its reputation is damaged.</p> <p>(w) An interruption in or a breach of BNPP's information systems may result in material losses of client or customer information, damage to BNPP's reputation and lead to financial losses.</p> <p>(x) Unforeseen external events may disrupt BNPP's operations and cause substantial losses and additional costs.</p> <p>Issuer</p> <p>The main risks described above in relation to BNPP also represent the main risks for BNPP B.V., either as an individual entity or a company in the BNPP Group.</p> <p>Dependency Risk</p> <p>BNPP B.V. is an operating company. The assets of BNPP B.V. consist of the obligations of other BNPP Group entities. The ability of BNPP B.V. to meet its own obligations will depend on the ability of other BNPP Group entities to fulfil their obligations. In respect of securities it issues, the ability of BNPP B.V. to meet its obligations under such securities depends on the receipt by it of payments under certain hedging agreements that it enters with other BNPP Group entities. Consequently, Holders of BNPP B.V. securities will, subject to the provisions of the Guarantee issued by BNPP, be exposed to the ability of BNPP Group entities to perform their obligations under such hedging agreements.</p> <p>Market Risk</p> <p>BNPP B.V. takes on exposure to market risks arising from positions in interest rates, currency exchange rates, commodities and equity products, all of which are exposed to general and specific market movements. However, these risks are hedged by option and swap agreements and therefore these risks are mitigated in principle.</p> <p>Credit Risk</p> <p>BNPP B.V. has significant concentration of credit risks as all OTC contracts are acquired from its parent company and other BNPP Group entities. Taking into consideration the objective and activities of BNPP B.V. and the fact that its parent company is under supervision of the European Central Bank and the Autorité de Contrôle Prudentiel et de Résolution management considers these risks as acceptable. The long term senior debt of BNP Paribas is rated (A) by Standard & Poor's and (A1) by Moody's.</p> <p>Liquidity Risk</p> <p>BNPP B.V. has significant liquidity risk exposure. To mitigate this exposure, BNPP B.V. entered into netting agreements with its parent company and other BNPP Group entities.</p>
D.3	Key risks regarding the Securities	<p>In addition to the risks (including the risk of default) that may affect the Issuer's ability to fulfil its obligations under the Securities [or the Guarantor's ability to perform its obligations under the Guarantee], there are certain factors which are material for the purposes of assessing the risks associated with Securities issued under the Base Prospectus, including:</p> <p>Market Risks</p> <p>-the Securities are unsecured obligations;</p>

Element	Title	
		<p>-Securities including leverage involve a higher level of risk and whenever there are losses on such Securities those losses may be higher than those of a similar security which is not leveraged;</p> <p>-the trading price of the Securities is affected by a number of factors including, but not limited to, (in respect of Securities linked to an Underlying Reference) the price of the relevant Underlying Reference(s), time to redemption and volatility and such factors mean that the trading price of the Securities may be below the Cash Settlement Amount or value of the Entitlement;</p> <p>-exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities;</p> <p><i>Holder Risks</i></p> <p>-the meetings of Holders provisions permit defined majorities to bind all Holders;</p> <p>-in certain circumstances Holders may lose the entire value of their investment;</p> <p><i>Issuer/Guarantor Risks</i></p> <p>-Open End Certificates and OET Certificates do not have any pre-determined maturity and may be redeemed on any date determined by the relevant Issuer, in its sole and absolute discretion and investment in such Open End Certificates and OET Certificates entails additional risks compared with other Certificates due to the fact that the redemption date cannot be determined by the investor;</p> <p>-a reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Securities;</p> <p>-certain conflicts of interest may arise (see Element E.4 below);</p> <p><i>Legal Risks</i></p> <p>-the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities;</p> <p>-expenses and taxation may be payable in respect of the Securities;</p> <p>-the Securities may be redeemed in the case of illegality or impracticability and such redemption may result in an investor not realising a return on an investment in the Securities;</p> <p>-any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it;</p> <p><i>Secondary Market Risks</i></p> <p>-the only means through which a Holder can realise value from the Security prior to its Redemption Date is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to exercise or wait until redemption of the Securities to realise a greater value than its trading value);</p>

Element	Title	
		<p>-BNP Paribas Arbitrage S.N.C. is required to act as market-maker. In those circumstances, BNP Paribas Arbitrage S.N.C. will endeavour to maintain a secondary market throughout the life of the Securities, subject to normal market conditions and will submit bid and offer prices to the market. The spread between bid and offer prices may change during the life of the Securities. However, during certain periods, it may be difficult, impractical or impossible for BNP Paribas Arbitrage S.N.C. to quote bid and offer prices, and during such periods, it may be difficult, impracticable or impossible to buy or sell these Securities. This may, for example, be due to adverse market conditions, volatile prices or large price fluctuations, a large marketplace being closed or restricted or experiencing technical problems such as an IT system failure or network disruption.</p> <p><i>Risks relating to Underlying Reference Asset(s)</i></p> <p>-In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:</p> <p>-exposure to one or more share, similar market risks to a direct equity investment, global depository receipt ("GDR") or American depository receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.</p> <p><i>Risks relating to Specific types of products</i></p> <p>The following risks are associated with ETS Products:</p> <p>Leverage Products</p> <p>Investors may be exposed to a partial or total loss of their invested capital. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Securities when repayment falls due, an investor may lose all or part of his investment in the Securities.</p> <p>If the Guarantor is unable or unwilling to meet its obligations under the Guarantee when due, an investor may lose all or part of his investment in the Securities.</p> <p>In addition, investors may lose all or part of their investment in the Securities as a result of the terms and conditions of the Securities.</p>

Elément	Description de l'Elément	
		<p>macroéconomiques et de marché en Europe, qui ont connu des perturbations au cours des dernières années.</p> <p>En 2016, la croissance mondiale s'est stabilisée légèrement au-dessus de 3 %, malgré un tassement dans les pays avancés. Trois transitions importantes continuent d'influer sur les perspectives mondiales : la diminution de la croissance économique en Chine, les fluctuations des prix de l'énergie qui ont remonté en 2016 et un deuxième durcissement de la politique monétaire aux États-Unis dans le contexte d'une reprise interne résiliente. Il est à noter que les banques centrales de plusieurs grands pays développés continuent par ailleurs de maintenir des politiques monétaires accommodantes. Les prévisions économiques du FMI pour l'année 2017 tablent sur une reprise de l'activité mondiale, une croissance de la zone euro et du Japon qui ne devrait pas montrer d'amélioration notable, et un ralentissement du Royaume-Uni.</p> <p>Dans ce contexte, on peut souligner les deux risques suivants :</p> <p><i>Instabilité financière liée à la vulnérabilité des pays émergents</i></p> <p>Bien que l'exposition du Groupe BNP Paribas dans les pays émergents soit limitée, la vulnérabilité de ces économies peut conduire à des perturbations du système financier mondial qui toucheraient le Groupe et pourraient affecter ses résultats.</p> <p>On observe en 2016, dans les économies de nombreux pays émergents, une augmentation globale des engagements en devises de ces pays alors que les niveaux d'endettement (en devises comme en monnaie locale) sont déjà élevés. La hausse de cet endettement est surtout le fait du secteur privé. Par ailleurs, les perspectives d'un relèvement progressif des taux directeurs aux États-Unis (première hausse décidée par la Réserve Fédérale en décembre 2015, deuxième en décembre 2016), ainsi qu'une volatilité financière accrue liée aux inquiétudes autour de la croissance et de la montée du risque géo politique dans les pays émergents, ont contribué à un durcissement des conditions financières extérieures, à des sorties de capitaux, à de nouvelles dépréciations monétaires dans beaucoup de pays émergents et à une augmentation des risques pour les banques. Ceci pourrait conduire à de nouvelles dégradations de notations souveraines.</p> <p>Il existe toujours des risques de perturbations sur les marchés mondiaux (hausse des primes de risque, érosion de la confiance, déclin de la croissance, report ou ralentissement de la normalisation des politiques monétaires, baisse de la liquidité des marchés, problème de valorisation des actifs, baisse de l'offre de crédit et désendettement désordonné) qui pourraient affecter l'ensemble des établissements bancaires.</p> <p><i>Risques systémiques liés à la hausse de l'endettement et à la liquidité de marché</i></p> <p>En dépit des remontées constatées depuis la mi-2016, les taux restent bas, ce qui peut continuer de favoriser une prise de risque excessive chez certains acteurs du système financier : augmentation des maturités des financements et des actifs détenus, politique d'octroi de crédit moins sévère, progression des financements à effet de levier.</p> <p>Certains de ces acteurs (assureurs, fonds de pension, gestionnaires d'actifs, etc.) ont une dimension de plus en plus systémique et en cas de turbulences de marché (par exemple liées à une hausse brutale des taux et/ou un réajustement marqué des prix), ces acteurs pourraient être amenés à dénouer de larges positions dans un contexte où la liquidité de marché se révélerait relativement fragile.</p> <p>Par ailleurs, on constate une hausse de la dette (publique comme privée, dans les pays développés comme émergents) au cours des années récentes. Le risque afférent pourrait se matérialiser soit en cas de hausse brutale des taux d'intérêt, soit en cas d'un nouveau choc négatif de croissance.</p> <p><i>Législation et réglementations applicables aux institutions financières</i></p> <p>Les évolutions récentes et à venir des législations et réglementations applicables aux institutions financières peuvent avoir un impact significatif sur BNPP. Les mesures adoptées récemment ou qui sont (ou dont les mesures d'application sont) encore en projet, qui ont, ou</p>

		<p>sont susceptibles d'avoir un impact sur BNPP, comprennent notamment :</p> <ul style="list-style-type: none"> - les réformes dites structurelles comprenant la loi bancaire française du 26 juillet 2013, imposant aux banques une filialisation ou séparation des opérations dites "spéculatives" qu'elles effectuent pour compte propre de leurs activités traditionnelles de banque de détail, la "règle Volcker" aux États-Unis qui restreint la possibilité des entités bancaires américaines et étrangères de conduire des opérations pour compte propre ou de sponsoriser ou d'investir dans les fonds de capital investissement ("<i>private equity</i>") et les <i>hedge funds</i>, ainsi que les évolutions attendues en Europe ; - les réglementations sur les fonds propres : la directive européenne sur les exigences prudentielles IV ("CRD 4") et le règlement européen sur les exigences prudentielles ("CRR"), le standard international commun de capacité d'absorption des pertes ("<i>total-loss absorbing capacity</i>" ou "TLAC"), et la désignation de BNPP en tant qu'institution financière d'importance systémique par le Conseil de Stabilité Financière ; - le Mécanisme européen de Surveillance Unique ainsi que l'ordonnance du 6 novembre 2014 ; - la Directive du 16 avril 2014 relative aux systèmes de garantie des dépôts et ses actes délégués et actes d'exécution, la Directive du 15 mai 2014 établissant un cadre pour le Redressement et la Résolution des Banques, le Mécanisme de Résolution Unique instituant le Conseil de Résolution Unique et le Fonds de Résolution Unique ; - le Règlement final de la Réserve Fédérale des États-Unis imposant des règles prudentielles accrues pour les opérations américaines des banques étrangères de taille importante, notamment l'obligation de créer une société holding intermédiaire distincte située aux États-Unis (capitalisée et soumise à régulation) afin de détenir les filiales américaines de ces banques ; - Les nouvelles règles pour la régulation des activités de dérivés négociés de gré à gré au titre du Titre VII du <i>Dodd-Frank Wall Street Reform and Consumer Protection Act</i>, notamment les exigences de marge pour les produits dérivés non compensés et pour les produits dérivés sur titres conclus par les banques actives sur les marchés de dérivés ("<i>swap dealers</i>"), les principaux intervenants non bancaires sur les marchés de dérivés ("<i>major swap participants</i>"), les banques actives sur les marchés de dérivés sur titres ("<i>security-based swap dealers</i>") et les principaux intervenants non-bancaires sur les marchés de dérivés sur titres ("<i>major security-based swap participants</i>"), ainsi que les règles de la <i>U.S. Securities and Exchange Commission</i> imposant l'enregistrement des banques actives sur les marchés de dérivés sur titres et des principaux intervenants non-bancaires sur les marchés de dérivés sur titres ainsi que les obligations de transparence et de reporting des transactions de dérivés sur titres ; - la nouvelle directive européenne sur les marchés d'instruments financiers ("MiFID") et le règlement européen sur les marchés d'instruments financiers ("MiFIR"), ainsi que les réglementations européennes sur la compensation de certains produits dérivés négociés de gré-à-gré par des contreparties centrales et la déclaration des opérations de financement sur titres auprès de référentiels centraux. <p>Par ailleurs, dans ce contexte réglementaire renforcé, le risque lié au non-respect des législations et réglementations en vigueur, en particulier celles relatives à la protection des intérêts des clients, est un risque important pour l'industrie bancaire, qui s'est traduit par des pertes et amendes importantes. Au-delà de son dispositif de conformité qui couvre spécifiquement ce type de risque, le Groupe place l'intérêt des clients, et d'une manière plus générale des parties prenantes, au centre de ses valeurs. Le nouveau Code de conduite adopté par le Groupe en 2016 établit des valeurs et des règles de conduite détaillées dans ce domaine.</p> <p>Cyber-risque</p> <p>Au cours des années passées, les institutions du secteur financier ont été touchées par nombre de cyber incidents, notamment par des altérations à grande échelle de données compromettant la qualité de l'information financière. Ce risque perdure aujourd'hui et BNPP, tout comme d'autres établissements bancaires s'est mise en ordre de marche afin de mettre en place des dispositifs permettant de faire face à des cyber attaques propres à détruire ou à endommager des données et des systèmes critiques et à gêner la bonne conduite des opérations. Par ailleurs, les autorités réglementaires et de supervision prennent des initiatives visant à promouvoir l'échange d'informations en matière de cyber sécurité et de cyber criminalité, à améliorer la</p>

Section D - Risques

Elément	Description de l'Elément	
D.2	Principaux risques propres à l'Emetteur et au Garant	<p>Les acquéreurs prospectifs de Tires émis en vertu de ce Prospectus de Base devraient avoir l'expérience concernant les options et les transactions d'options et devraient comprendre les risques des transactions impliquant les Titres. Un investissement dans les Titres présente certains risques qui devraient être pris en considération avant qu'une décision d'investissement soit prise. Il existe certains risques pouvant affecter la capacité de l'Emetteur à remplir ses engagements en vertu des Titres ou la capacité du Garant à remplir ses engagements en vertu de la Garantie, dont certains sont en dehors de son contrôle. Plus particulièrement, l'Emetteur et le Garant, ensemble avec le Groupe BNPP, sont exposés aux risques inhérents à ses activités, tels que décrits ci-dessous :</p> <p>Garant</p> <p>Huit principaux risques, tels que définis dans la version anglaise du document de référence et rapport financier annuel 2016, sont inhérents aux activités de BNPP:</p> <p>(1) <i>Risque de crédit</i> - le risque de crédit est défini comme la conséquence liée à la probabilité que l'emprunteur ou une contrepartie ne remplisse pas ses obligations conformément aux conditions convenues. L'évaluation de cette probabilité de défaut et du taux de recouvrement du prêt ou de la créance en cas de défaut est un élément essentiel de l'évaluation de la qualité du crédit.</p> <p>(2) <i>Titrisation en portefeuille bancaire</i> - La Titrisation est une opération ou un montage par lequel le risque de crédit associé à une exposition ou à un ensemble d'expositions est subdivisé en tranches, et qui présente les caractéristiques suivantes :</p> <ul style="list-style-type: none"> - les paiements effectués dans le cadre de l'opération ou du montage dépendent de la performance de l'exposition ou de l'ensemble d'expositions d'origine ; - la subordination des tranches détermine la répartition des pertes pendant la durée du transfert de risque. <p>Tout engagement pris dans le cadre d'une structure de titrisation (y compris les dérivés et les lignes de liquidité) est considéré comme une exposition de titrisation. L'essentiel de ces engagements est en portefeuille bancaire prudentiel.</p> <p>(3) <i>Risque de contrepartie</i> - Le risque de contrepartie est la manifestation du risque de crédit à l'occasion d'opérations de marché, d'investissements, et/ou de règlements. Ces opérations comprennent les contrats bilatéraux, c'est-à-dire de gré à gré (over-the-counter – OTC) ainsi que les contrats compensés auprès d'une chambre de compensation. Le montant de ce risque varie au cours du temps avec l'évolution des paramètres de marché affectant la valeur potentielle future des transactions concernées.</p> <p>Il correspond au risque que la contrepartie ne puisse pas honorer ses obligations de verser à la Banque l'intégralité de la valeur actualisée des flux d'une transaction dans le cas où la Banque est un bénéficiaire net. Le risque de contrepartie est également lié au coût de remplacement d'un instrument dérivé en cas de défaut de la contrepartie. Il peut être considéré comme un risque de marché en cas de défaut ou comme un risque contingent. Le risque de contrepartie résulte à la fois des activités bilatérales de BNP Paribas avec ses clients et des activités de clearing au travers d'une chambre de compensation ou d'un compensateur externe.</p> <p>(4) <i>Risque de marché</i> - Le risque de marché est le risque de perte de valeur provoqué par une évolution défavorable des prix ou des paramètres de marché, que ces derniers soient directement observables ou non.</p> <p>Les paramètres de marché observables sont, sans que cette liste soit exhaustive, les</p>

Elément	Description de l'Elément	
		<p>taux de change, les cours des valeurs mobilières et des matières premières négociables (que le prix soit directement coté ou obtenu par référence à un actif similaire), le prix de dérivés ainsi que tous les paramètres qui peuvent être induits de ceux-là, comme les taux d'intérêt, les marges de crédit, les volatilités ou les corrélations implicites ou d'autres paramètres similaires.</p> <p>Les paramètres non observables sont ceux fondés sur des hypothèses de travail comme les paramètres contenus dans les modèles ou basés sur des analyses statistiques ou économiques qui ne sont pas vérifiables sur le marché.</p> <p>Dans les portefeuilles de négoce obligataire, les instruments de crédit sont valorisés sur la base des taux obligataires et des marges de crédit, lesquels sont considérés comme des paramètres de marché au même titre que les taux d'intérêt ou les taux de change. Le risque sur le crédit de l'émetteur de l'instrument est ainsi un composant du risque de marché, appelé risque émetteur.</p> <p>L'absence de liquidité est un facteur important de risque de marché. En cas de restriction ou de disparition de la liquidité, un instrument ou un actif marchand peut ne pas être négociable ou ne pas l'être à sa valeur estimée, par exemple du fait d'une réduction du nombre de transactions, de contraintes juridiques ou encore d'un fort déséquilibre de l'offre et de la demande de certains actifs.</p> <p>Le risque relatif aux activités bancaires recouvre le risque de perte sur les participations en actions d'une part, et le risque de taux et de change relatifs aux activités d'intermédiation bancaire d'autre part.</p> <p>(5) <i>Risque de liquidité</i> - Le risque de liquidité est le risque que BNPP ne puisse pas honorer ses engagements ou dénouer ou compenser une position en raison de la situation du marché ou de facteurs idiosyncratiques (i.e. spécifiques à BNP Paribas), dans un délai déterminé et à un coût raisonnable.</p> <p>Le risque de liquidité traduit le risque de BNPP de ne pas pouvoir faire face à des flux nets sortants de trésorerie y compris liés à des besoins en collatéral, sur l'ensemble des horizons du court terme au long terme.</p> <p>Ce risque peut provenir de la diminution de sources de financement, de tirages sur des engagements de financement, de la réduction de liquidité de certains actifs, de l'augmentation des appels de marge en cash ou en collatéral. Il peut être lié à l'établissement lui-même (risque de réputation) ou à des facteurs extérieurs (risques sur certains marchés).</p> <p>Le risque de liquidité du Groupe BNPP est suivi dans le cadre d'une politique de liquidité globale validée par le Comité ALM Groupe. Celle-ci repose sur des principes de gestion définis pour s'appliquer en situation courante et en situation de crise. La situation de liquidité du Groupe est évaluée à partir d'indicateurs internes et de ratios réglementaires.</p> <p>(6) <i>Risque opérationnel</i> - Le risque opérationnel est le risque de perte résultant de processus internes défectueux ou inadéquats ou d'événements externes, qu'ils soient de nature délibérée, accidentelle ou naturelle. Sa gestion repose sur l'analyse de l'enchaînement cause - événement - effet.</p> <p>Les processus internes sont notamment ceux impliquant le personnel et les systèmes informatiques. Les inondations, les incendies, les tremblements de terre, les attaques terroristes sont des exemples d'événements externes. Les événements de crédit ou de marché comme les défauts ou les changements de valeur n'entrent pas dans le champ d'analyse du risque opérationnel.</p> <p>Le risque opérationnel recouvre la fraude, les risques en lien avec les ressources humaines, les risques juridiques, les risques de non-conformité, les risques fiscaux,</p>

Elément	Description de l'Elément	
		<p>les risques liés aux systèmes d'information, la fourniture de services financiers inappropriés (conduct risk), les risques de défaillance des processus opérationnels y compris les processus de crédit, ou l'utilisation d'un modèle (risque de modèle), ainsi que les conséquences pécuniaires éventuelles liées à la gestion du risque de réputation.</p> <p>(7) <i>Risque de non-conformité et de réputation</i> - Le risque de non-conformité est défini dans la réglementation française comme le risque de sanction judiciaire, administrative ou disciplinaire, de perte financière significative ou d'atteinte à la réputation, qui naît du non-respect de dispositions propres aux activités bancaires et financières, qu'elles soient de nature législative ou réglementaire, nationales ou européennes directement applicables ou qu'il s'agisse de normes professionnelles et déontologiques, ou d'instructions de l'organe exécutif prises, notamment, en application des orientations de l'organe de surveillance.</p> <p>Par définition, ce risque est un sous-ensemble du risque opérationnel. Cependant, certains impacts liés au risque de non-conformité peuvent représenter davantage qu'une pure perte de valeur économique et peuvent nuire à la réputation de l'établissement. C'est pour cette raison que BNPP traite le risque de non-conformité en tant que tel.</p> <p>Le risque de réputation est le risque d'atteinte à la confiance que portent à l'entreprise ses clients, ses contreparties, ses fournisseurs, ses collaborateurs, ses actionnaires, ses superviseurs ou tout autre tiers dont la confiance, à quelque titre que ce soit, est une condition nécessaire à la poursuite normale de l'activité.</p> <p>Le risque de réputation est essentiellement un risque contingent à tous les autres risques encourus par BNPP.</p> <p>(8) <i>Risque de souscription d'assurance</i> - BNP Paribas Cardif est exposé aux risques suivants :</p> <ul style="list-style-type: none"> - le risque de marché, risque de pertes de valeur liées aux mouvements défavorables des marchés financiers. Ces mouvements défavorables se reflètent notamment par des variations de prix (taux de change, obligations, actions et commodités, produits dérivés, immobilier, etc.) et résultent de fluctuations des taux d'intérêt, des spreads, des volatilités ou des corrélations ; - le risque de crédit, risque de pertes liées à la qualité de crédit des émetteurs de titres, des contreparties ou de tout autre débiteur auquel la société est exposée. Parmi les débiteurs, les risques associés aux instruments financiers (y compris les banques dans lesquelles la société détient des dépôts) et les risques associés à des créances liées à l'activité d'assurance (collecte des primes, soldes de réassurance, etc.) sont distingués en deux catégories : le risque de crédit d'actifs et le risque de crédit de passifs ; - le risque de souscription, risque de pertes de valeur liées aux fluctuations soudaines et imprévues des prestations. Selon le type d'activité (vie, non vie), il résulte d'évolutions statistiques, macroéconomiques ou comportementales ainsi que de la survenance de phénomènes liés à la santé publique ou à des catastrophes ; - le risque opérationnel est le risque de pertes résultant de l'inadéquation ou la défaillance des processus internes, des défaillances informatiques ou d'événements extérieurs, accidentels ou naturels. Ces événements extérieurs comprennent les événements d'origine humaine et ceux d'origine naturelle. <p>(a) Des conditions macroéconomiques et de marché difficiles ont eu et pourraient</p>

		<p>continuer à avoir un effet défavorable significatif sur les conditions dans lesquelles évoluent les établissements financiers et en conséquence sur la situation financière, les résultats opérationnels et le coût du risque de BNPP.</p> <p>(b) Le référendum au Royaume-Uni sur la sortie de l'Union européenne pourrait générer des incertitudes significatives, de la volatilité et des changements importants sur les marchés économiques et financiers européens et mondiaux et avoir alors un effet défavorable sur l'environnement dans lequel la BNPP évolue.</p> <p>(c) Du fait du périmètre géographique de ses activités, BNPP pourrait être vulnérable aux contextes ou circonstances politiques, macroéconomiques ou financiers d'une région ou d'un pays.</p> <p>(d) L'accès de BNPP au financement et les coûts de ce financement pourraient être affectés de manière défavorable en cas de résurgence des crises financières, de détérioration des conditions économiques, de dégradation de notation, d'accroissement des spreads de crédit des États ou d'autres facteurs.</p> <p>(e) Toute variation significative des taux d'intérêt est susceptible de peser sur les revenus ou sur la rentabilité de BNPP.</p> <p>(f) Un environnement prolongé de taux d'intérêt bas comporte des risques systémiques inhérents et la sortie d'un tel environnement comporte également des risques.</p> <p>(g) La solidité financière et le comportement des autres institutions financières et acteurs du marché pourraient avoir un effet défavorable sur BNPP.</p> <p>(h) Les fluctuations de marché et la volatilité exposent BNPP au risque de pertes substantielles dans le cadre de ses activités de marchés et d'investissements.</p> <p>(i) Les revenus tirés des activités de courtage et des activités générant des commissions sont potentiellement vulnérables à une baisse des marchés.</p> <p>(j) Une baisse prolongée des marchés peut réduire la liquidité et rendre plus difficile la cession d'actifs. Une telle situation pourrait engendrer des pertes significatives.</p> <p>(k) Des mesures législatives et réglementaires prises ces dernières années, en particulier en réponse à la crise financière mondiale pourraient affecter de manière substantielle BNPP ainsi que l'environnement financier et économique dans lequel elle opère.</p> <p>(l) BNPP est soumise à une réglementation importante et fluctuante dans les juridictions où elle exerce ses activités.</p> <p>(m) En cas de non-conformité avec les lois et règlements applicables, BNPP pourrait être exposée à des amendes significatives et d'autres sanctions administratives et pénales, et pourrait subir des pertes à la suite d'un contentieux privé, en lien ou non avec ces sanctions.</p> <p>(n) Risques liés à la mise en oeuvre des plans stratégiques de BNPP.</p> <p>(o) BNPP pourrait connaître des difficultés relatives à l'intégration des sociétés</p>

		<p>acquises et pourrait ne pas réaliser les bénéfices attendus de ses acquisitions.</p> <p>(p) Une intensification de la concurrence, par des acteurs bancaires et non bancaires, pourrait peser sur ses revenus et sa rentabilité.</p> <p>(q) Toute augmentation substantielle des provisions ou tout engagement insuffisamment provisionné pourrait peser sur les résultats et sur la situation financière de BNPP.</p> <p>(r) Les politiques, procédures et méthodes de gestion du risque mises en oeuvre par BNPP pourraient l'exposer à des risques non identifiés ou imprévus, susceptibles d'occasionner des pertes significatives.</p> <p>(s) Les stratégies de couverture mises en place par BNPP n'écartent pas tout risque de perte.</p> <p>(t) Des ajustements apportés à la valeur comptable des portefeuilles de titres et d'instruments dérivés de BNPP ainsi que de la dette de BNPP pourraient avoir un effet sur son résultat net et sur ses capitaux propres.</p> <p>(u) Le changement attendu des principes comptables relatifs aux instruments financiers pourrait avoir un impact sur le bilan de BNPP ainsi que sur les ratios réglementaires de fonds propres et entraîner des coûts supplémentaires.</p> <p>(v) Tout préjudice porté à la réputation de BNPP pourrait nuire à sa compétitivité.</p> <p>(w) Toute interruption ou défaillance des systèmes informatiques de BNPP, pourrait provoquer des pertes significatives d'informations relatives aux clients, nuire à la réputation de BNPP et provoquer des pertes financières.</p> <p>(x) Des événements externes imprévus pourraient provoquer une interruption des activités de BNPP et entraîner des pertes substantielles ainsi que des coûts supplémentaires.</p> <p>Emetteur</p> <p>Les risques principaux décrits au-dessus relativement à BNPP constituent également les risques principaux pour BNPP B.V., soit en qualité d'entité individuelle ou en tant que société du Groupe BNPP</p> <p><i>Risque de dépendance</i></p> <p>BNPP B.V. est une société opérationnelle. Les actifs de BNPP B.V. sont constitués des obligations des entités du Groupe BNPP. La capacité de BNPP B.V. à remplir ses propres obligations dépendra de la capacité des autres entités du Groupe BNPP à remplir les leurs. En ce qui concerne les titres qu'il émet, la capacité que BNPP B.V. a de remplir ses obligations en vertu de ces titres dépend de paiements qui lui sont dus au titre de certains contrats de couverture qu'il conclut avec d'autres entités du Groupe BNPP. En conséquence, les Titulaires de titres émis par BNPP B.V. bénéficieront des stipulations de la Garantie émise par BNPP, seront exposés à la capacité des entités du Groupe BNPP à remplir leurs obligations dans le cadre de ces contrats de couverture.</p> <p><i>Risque de marché</i></p> <p>BNPP B.V. est exposé aux risques de marché résultant de positions prises sur les taux</p>

		<p>d'intérêts, les taux de change, les matières premières et les produits sur actions, tous étant exposés aux fluctuations générales et spécifiques liées aux marchés. Cependant, ces risques sont couverts par des contrats d'option et d'échange de conditions d'intérêts et sont par conséquent et en principe réduits.</p> <p><i>Risque de crédit</i></p> <p>BNPP B.V. est exposé à une concentration de risque de crédit significative étant donné que tous les contrats financiers de gré à gré sont conclus avec sa maison-mère et d'autres entités du Groupe BNPP. Prenant en compte l'objectif et les activités de BNPP B.V. et le fait que sa maison-mère soit sous la supervision de la Banque Centrale Européenne et de l'Autorité de contrôle prudentiel et de résolution, la direction considère ces risques comme acceptables. La dette senior à long terme de BNP Paribas est notée (A) par Standard & Poor's et (A1) par Moody's.</p> <p><i>Risque de liquidité</i></p> <p>BNPP B.V. a une exposition significative au risque de liquidité. Pour réduire cette exposition, BNPP B.V. a conclu des conventions de compensation avec sa société-mère et les autres entités du Groupe BNPP.</p>
D.3	Principaux risques propres aux Titres	<p>En plus des risques (y compris le risque de défaut) qui peuvent affecter la capacité de l'Emetteur de satisfaire à ses obligations en vertu des Titres [ou la capacité du Garant pour exécuter ses obligations en vertu de la Garantie,] certains facteurs sont considérés comme matériels dans le cadre de risques associés aux Titres émis en vertu du présent Prospectus de Base, notamment</p> <p><i>Risques de Marché</i></p> <ul style="list-style-type: none"> -les Titres sont des obligations non assorties de sûretés, -les Titres incluant un effet de levier impliquent un niveau de risque plus élevé et, en cas de pertes sur ces Titres, ces titres peuvent être supérieurs à ceux d'un titre similaire qui n'inclut aucun effet de levier, -le cours de négociation des Titres est affecté par plusieurs facteurs, y compris, mais sans caractère limitatif, (concernant les Titres liés à un Sous-Jacent de Référence) le cours du ou de(s) Sous-Jacent(s) de Référence, la durée restant à courir jusqu'au remboursement et la volatilité, et ces facteurs signifient que le cours de négociation des Titres peut être inférieur au Montant de Remboursement Final, -dans de nombreux cas, l'exposition au Sous-Jacent de Référence découlera du fait que l'Emetteur concerné conclut des accords de couverture et, en ce qui concerne les Titres indexés sur un Sous-Jacent de Référence, les investisseurs potentiels sont exposés à la performance de ces accords de couverture et aux événements pouvant affecter ces accords, et, par conséquent, la survenance de l'un ou l'autre de ces événements peut affecter la valeur des Titres, <p><i>Risques liés aux Titulaires</i></p> <ul style="list-style-type: none"> -les clauses relatives aux assemblées générales des Titulaires permettent à des majorités définies de lier tous les Titulaires, -Dans certaines circonstances, les Titulaires peuvent perdre la valeur intégrale de leur investissement. <p><i>Risques liés à l'Emetteur/au Garant</i></p> <ul style="list-style-type: none"> -Les Certificats Open End et les Certificats OET n'ont aucune échéance prédéterminée et peuvent être remboursés à toute date déterminée par l'Emetteur concerné, discrétionnairement, et l'investissement dans ces Certificats Open End et ces Certificats OET entraîne des risques additionnels par rapport à d'autres Certificats, en raison du fait que la date de remboursement

		<p>ne peut pas être déterminée par l'investisseur,</p> <p>-une réduction de la notation (éventuelle) accordée aux titres d'emprunt en circulation de l'Emetteur ou du Garant (s'il y a lieu) par une agence de notation de crédit pourrait entraîner une réduction de la valeur de négociation des Titres,</p> <p>-certains conflits d'intérêts peuvent surgir (voir Elément E.4 ci-dessous),</p> <p><i>Risques Juridiques</i></p> <p>-la survenance d'un cas de perturbation additionnel ou d'un cas de perturbation additionnel optionnel peut conduire à un ajustement des Titres, à un remboursement anticipé ou peut avoir pour conséquence que le montant payable à la date de remboursement prévue soit différent de celui qui devrait être payé à ladite date de remboursement prévue, de telle sorte que la survenance d'un cas de perturbation additionnel et/ou d'un cas de perturbation additionnel optionnel peut avoir un effet défavorable sur la valeur ou la liquidité des Titres,</p> <p>-des frais et impôts peuvent être payables sur les Titres,</p> <p>-les Titres peuvent être remboursés en cas d'illégalité ou autre impossibilité pratique, et cette annulation ou ce remboursement peut avoir pour conséquence qu'un investisseur ne réalise aucun retour sur son investissement dans les Titres,</p> <p>-toute décision judiciaire, tout changement de la pratique administrative ou tout changement de la loi anglaise ou de la loi française, selon le cas, intervenant après la date du Prospectus de Base, pourrait avoir un impact défavorable significatif sur la valeur des Titres ainsi affectés,</p> <p><i>Risques liés au marché secondaire</i></p> <p>-le seul moyen permettant à un Titulaire de réaliser la valeur d'un Titre avant sa Date de Remboursement, selon le cas, consiste à le vendre à son cours de marché au moment considéré sur un marché secondaire disponible, et il peut n'y avoir aucun marché secondaire pour les Titres (ce qui pourrait signifier qu'un investisseur doit attendre jusqu'au remboursement des Titres pour réaliser une valeur supérieure à sa valeur de négociation),</p> <p>-BNP Paribas Arbitrage S.N.C. est tenue d'agir comme teneur de marché. Dans ces circonstances, BNP Paribas Arbitrage S.N.C. s'efforcera de maintenir un marché secondaire pendant toute la durée de vie des Titres, sous réserve des conditions normales de marché et soumettra au marché des cours acheteur et des cours vendeur. L'écart (spread) entre le cours acheteur et le cours vendeur peut évoluer au long de la durée de vie des Titres. Néanmoins, durant certaines périodes il peut être difficile, irréalisable ou impossible pour BNP Paribas Arbitrage S.N.C. de coter des prix "bid" et "offer" et en conséquence il peut être difficile, irréalisable ou impossible d'acheter ou vendre ces Titres durant ces périodes. Cela peut être dû, par exemple, à des conditions défavorables sur le marché, à des prix volatiles ou à des fluctuations importantes du prix, à la fermeture d'une place financière importante ou à des problèmes techniques, tels que la défaillance ou le dysfonctionnement d'un système informatique ou celui d'un réseau internet.</p> <p><i>Risques relatifs au(x) Sous-Jacent(s) de Référence</i></p> <p>-En outre, il existe des risques spécifiques liés aux Titres qui sont indexés sur un Sous-Jacent de Référence (y compris des Titres Hybrides), et un investissement dans ces Titres entraînera des risques significatifs que ne comporte pas un investissement dans un titre de créance conventionnel. Les facteurs de risque liés aux Titres indexés sur un Sous-Jacent de Référence incluent :</p> <p>-l'exposition à une ou plusieurs actions, des risques de marché similaires à ceux liés à un investissement direct dans un titre de capital, global depositary receipt ("GDR") ou American depositary receipt ("ADR"), des cas d'ajustement potentiels ou des événements exceptionnels affectant les actions, un dérèglement du marché ou le défaut d'ouverture d'une bourse, qui peuvent avoir un effet défavorable sur la valeur et la liquidité des Titres, et le fait que</p>

		<p>l'Emetteur ne fournira pas d'informations post-émission sur le Sous-Jacent de Référence.</p> <p><i>Risques liés à des catégories spécifiques de produits</i></p> <p>Les risques suivants sont liés aux Produits ETS</p> <p>Produits à effet de levier</p> <p>Les investisseurs peuvent être exposés à une perte partielle ou totale de leur investissement. Le rendement de ces Titres dépend de la performance du ou des Sous-Jacent(s) de Référence, plus particulièrement en fonction du niveau de remboursements automatiques anticipés. De plus le rendement peut dépendre d'autres facteurs de marché comme les taux d'intérêt, les volatilités implicites des Sous-Jacents de Référence et le temps restant avant le remboursement. L'effet de levier sur les Titres peut être positif ou négatif.</p>
D.6	Avertissement sur le risque	<p>Voir Elément D.3 ci-dessus.</p> <p>En cas d'insolvabilité de l'Emetteur ou si ce dernier est autrement incapable de rembourser les Titres ou n'est pas disposé à les rembourser à leur échéance, un investisseur peut perdre tout ou partie de son investissement dans les Titres.</p> <p>Si le Garant est dans l'incapacité de remplir ses engagements en vertu de la Garantie à leur échéance, ou n'est pas disposé à les remplir, un investisseur peut perdre tout ou partie de son investissement dans les Titres.</p> <p>En outre, les investisseurs peuvent perdre tout ou partie de leur investissement dans les Titres en conséquence de l'application des modalités des Titres.</p>

E.4	Intérêt de personnes physiques et morales pouvant influencer sur l'émission/l'offre	Exception faite de ce qui est mentionné ci-dessus, aucune personne intervenant dans l'émission des Titres ne détient, à la connaissance de l'Emetteur, un intérêt pouvant influencer sensiblement sur l'offre, y compris des intérêts conflictuels.
E.7	Dépenses facturées à l'investisseur par l'Emetteur	Il n'existe pas de dépenses facturées à l'investisseur par l'Emetteur.

UITGIFTE SPECIFIEKE SAMENVATTING VAN HET PROGRAMMA IN VERBAND MET DIT BASISPROSPECTUS

Er worden samenvattingen gemaakt van onderdelen die moeten worden meegedeeld en "Onderdelen" worden genoemd. Deze onderdelen worden opgesomd in de secties A - E (A.1 - E.7). Deze samenvatting bevat alle Onderdelen die in een samenvatting voor dit soort Schuldeffecten, Emittenten en de Garantieverstrekters moeten zijn opgenomen. Omdat een aantal Onderdelen niet moeten worden behandeld, kunnen er hiaten zijn in de opeenvolging van de nummers van de Onderdelen. Het is mogelijk dat inzake een bepaald Onderdeel geen relevante informatie kan worden gegeven, ook al moet een dergelijk Onderdeel gelet op de aard van de Schuldeffecten, de Emittenten, en Garantieverstreker(s) in de samenvatting worden opgenomen. In dit geval moet in de samenvatting een korte beschrijving van het Onderdeel worden opgenomen met de vermelding "Niet van toepassing".

Onderdeel	Titel	
B.19/ B.4b	Informatie m.b.t. tendensen	<p>Macroeconomische omgeving</p> <p>De bedrijfsresultaten van BNPP worden beïnvloed door de macro-economische en marktomgeving. Gezien de aard van de activiteiten van de BNPP is zij bijzonder gevoelig voor de macro-economische en marktomstandigheden in Europa, die de laatste jaren weleens uitdagend waren en storingen hebben ondervonden.</p> <p>In 2016 stabiliseerde de wereldwijde groei net boven de 3% ondanks de veel lagere groei in de geavanceerde economieën. Drie grote transitie blijven de wereldwijde vooruitzichten beïnvloeden: afnemende economische groei in China, fluctuerende energieprijzen die in 2016 stegen en een tweede aanscherping van het monetair beleid in de Verenigde Staten in de context van een veerkrachtig binnenlands herstel. Opgemerkt dient te worden dat de centrale banken van enkele grote ontwikkelde landen accommoderend monetair beleid blijven volgen. Economische voorspellingen van de IMF voor 2017 duiden op een herstel van de wereldwijde activiteit, geen grote verbetering in de groei van de eurozone en Japan en een vertraging in het Verenigd Koninkrijk.</p> <p>In die context kunnen er twee risico's aangewezen worden:</p> <p><i>Financiële instabiliteit door de kwetsbaarheid van opkomende landen</i></p> <p>Hoewel de blootstelling van de BNP Paribas Group naar opkomende landen beperkt is, kan de kwetsbaarheid van deze economieën leiden tot verstoringen in het wereldwijde financiële systeem die van invloed kunnen zijn op de Group en mogelijk hun resultaten wijzigen.</p> <p>In 2016 was er een brede toename van de in vreemde valuta luidende verplichtingen van de economieën van veel opkomende markteconomieën zichtbaar op het moment dat schuldenniveaus (zowel in vreemde als nationale valuta) reeds hoog waren. De particuliere sector was de grootste bron van de toename van deze schuld. Verder hebben het vooruitzicht van een geleidelijke toename van de Amerikaanse belangrijkste tarieven (de Federal Reserve Bank heeft de eerste verhoging doorgevoerd in december 2015 en een tweede in december 2016) en toegenomen financiële volatiliteit afkomstig van zorgen om de groei en toenemend geopolitiek risico in opkomende markten bijgedragen aan een verkrapping van externe financiële omstandigheden, toegenomen kapitaaluitvoer, verdere valutaontwaarding in veel opkomende markten en verhoogde risico's voor banken. Deze factoren kunnen leiden tot verdere afwaarderingen van de status van landen.</p> <p>Er bestaat nog steeds het risico op verstoringen op wereldwijde markten (stijgende risicopremies, erosie van vertrouwen, afnemende groei, uitstel of vertraging van normalisatie van monetair beleid, afnemende liquiditeit in markten, problemen bij het waarderen van activa, afname in kredietvoorziening en wanordelijk ontschulden) dat van invloed kan zijn op alle bankinstellingen.</p> <p><i>Systemische risico's met betrekking tot toegenomen schuld en marktliquiditeit</i></p> <p>Ondanks de opleving vanaf half 2016 blijft de rente laag wat sommige spelers in het financiële systeem aan kan blijven zetten tot het nemen van overmatig risico: toegenomen looptijden van financiering of activa in bezit, minder steng beleid voor het toekennen van leningen, toename in financiering met vreemd vermogen.</p> <p>Sommige spelers (verzekeringsmaatschappijen, pensioenfondsen, activabeheerders enz.) brengen een toenemende systemische dimensie met zich mee en in het geval van marktturbulentie (gekoppeld bijvoorbeeld aan een plotselinge toename in rentepercentages en/of een scherpe prijscorrectie) kunnen zij beslissen grote posities te ontbinden in een omgeving van reëel zwakke marktliquiditeit.</p> <p>In de afgelopen jaren is er ook een toename in schulden opgemerkt (publiek en particulier, zowel in ontwikkelde als opkomende landen). Het hieruit voortvloeiende risico kan zich ofwel voordoen bij een piek in de rente of een verdere negatieve groeischok.</p> <p>Wetgeving en regelgeving van toepassing op financiële instellingen</p>

Onderdeel	Titel	
		<p>Recente en toekomstige veranderingen in de wetgeving en richtlijnen die van toepassing zijn op financiële instellingen hebben veel invloed op BNPP. Maatregelen die recent zijn aangenomen of die (of de toepassingsmaatregelen ervan) nog een ruwe versie zijn, die invloed hebben of mogelijk hebben op BNPP kunnen zijn:</p> <ul style="list-style-type: none"> - de structurele hervormingen die bestaan uit de Franse bankierswet van 26 juli 2013 die eist dat banken filialen opzetten of "speculatieve" bedrijfseigen activiteiten scheiden van hun traditionele bankactiviteiten, de "Volcker regel" in de VS die bedrijfseigen transacties, sponsorschap en beleggingen in private equity fondsen en hedgefondsen door Amerikaanse en buitenlandse banken verbiedt en komende, mogelijke veranderingen in Europa; - richtlijnen betreffende kapitaal: Richtlijn Kapitaalvereisten IV ("CRD 4")/ de Verordening Kapitaalvereisten ("CRR"), de internationale norm voor het vermogen om verlies te absorberen ("TLAC") en aanmerking van BNPP als financiële instelling dat van systemisch belang is door de Raad voor financiële stabiliteit; - het Europees Enkel Toezichhoudend Mechanisme en de verordening van 6 november 2014; - de Richtlijn van 16 april 2014 met betrekking tot depositogarantiesystemen en de delegatie- en invoeringsbesluiten, de Richtlijn van 15 mei 2014 met daarin een Bankherstel- en Resolutieraamwerk, het Enkele Resolutie Mechanisme voor het instellen van het Enkele Resolutiebestuur en het Enkele Resolutiefonds; - de Final Rule van de Amerikaanse Federal Reserve die strengere regels oplegt op de Amerikaanse transacties van grote buitenlandse banken, voornamelijk de verplichting tot het opzetten van een afzonderlijke, intermediaire holding in de VS (gekapitaliseerd en onderhevig aan regelgeving) voor hun Amerikaanse dochtermaatschappijen; - de nieuwe regels voor de regulering van over-de-toonbank derivatieve activiteiten overeenkomstig Hoofdstuk VII van de Dodd-Frank Wall Street Reform and Consumer Protection Act, voornamelijk margevereisten niet-vrijgemaakte derivaatproducten en de derivaten van aandelen die verhandeld worden door swapdealers en belangrijke op aandelen gebaseerde swapdeelnemers en de regels van het Amerikaanse Securities and Exchange Commission waarvoor de registratie van banken en grote swapdeelnemers verplicht is die actief zijn op derivatenmarkten alsmede de transparantie en rapportage van derivatentransacties; - de nieuwe Richtlijn betreffende markten voor financiële instrumenten ("MiFID") en Vordering betreffende markten voor financiële instrumenten ("MiFIR") en Europese regels met betrekking tot het vrijmaken van sommige over-de-toonbank derivatenproducten door gecentraliseerde tegenpartijen en het onthullen van aandelen gefinancierde transacties aan gecentraliseerde organen. <p>Daarbij komt dat in de huidige strengere regelgevende context het risico van het niet nakomen van bestaande wetten en richtlijnen, vooral met betrekking tot de bescherming van de belangen van klanten, een groot risico vormt voor de bankensector, mogelijk leidend tot grote verliezen en boetes. Naast dit nalevingssysteem, dat specifiek dit soort risico dekt, plaatst de Group het belang van zijn klanten, en breder gezien dat van zijn belanghebbenden, in de kern van zijn waarden. De nieuwe Gedragscode die in 2016 door de Group is ingesteld bevat gedetailleerde waarden en gedragsregels op dit gebied.</p> <p>Cyberrisico</p> <p>In de afgelopen jaren hebben financiële instellingen te maken gekregen met een aantal cyberincidenten, die vooral betrekking hadden op grootschalige wijzigingen van gegevens die de kwaliteit van financiële informatie ingevaar brachten. Dit risico is ook vandaag de dag aanwezig en BNPP heeft, net als andere banken, maatregelen genomen om systemen te implementeren die cyberaanvallen tegengaan die gegevens en cruciale systemen kunnen vernietigen of beschadigen en de activiteiten kunnen ophouden. Daarnaast hebben de regelgevende en toezichhoudende autoriteiten initiatieven genomen om de uitwisseling van informatie over cyberbeveiliging en cybercriminaliteit te bevorderen om zo de beveiliging aan technologische infrastructures te verbeteren en effectieve herstelplannen op te stellen na een cyberincident.</p>

Section D - Risico's

Onderdeel	Titel	
D.2	Voornaamste risico's met betrekking tot de Emittent en de Garantieverstrekker	<p>Mogelijke kopers van Schuldeffecten uitgegeven onder dit Basisprospectus moeten ervaren worden met betrekking tot opties en optietransacties en moeten de risico's van transacties begrijpen die komen kijken bij Schuldeffecten. Het beleggen in Schuldeffecten leidt tot bepaalde risico's waarmee rekening gehouden moet worden voordat er een beleggingsbeslissing wordt genomen. Bepaalde risico's kunnen van invloed zijn op het vermogen van de Emittent om aan zijn verplichtingen onder de Schuldeffecten te voldoen of het vermogen van de Garantieverstrekker om aan zijn verplichtingen onder de Garantie (in het geval van Schuldeffecten uitgegeven door BNPP B.V.) te voldoen, waarvan sommige buiten zijn controle liggen. In het bijzonder wordt de Emittent (en de Garantieverstrekker), in het geval van Schuldeffecten uitgegeven door BNPP B.V.), samen met de BNPP Groep, blootgesteld aan de risico's die verband houden met zijn activiteiten, zoals hieronder wordt beschreven:</p> <p>Garantieverstrekker</p> <p>Zoals aangegeven in het Registratiedocument (in het Engels) en Financieel Jaarverslag van 2016 van BNPP zijn acht hoofdrisicocategorieën inherent aan de activiteiten van BNPP:</p> <p>(1) <i>Kredietrisico</i> - Kredietrisico is het gevolg voortvloeiend uit de waarschijnlijkheid dat een lener of tegenpartij niet aan deze verplichtingen kan voldoen in overeenstemming met de overeengekomen voorwaarden. De waarschijnlijkheid van default en het verwachte herstel van de lening of debiteur in het geval van default zijn belangrijke bestanddelen van de kredietkwaliteitsbeoordeling.</p> <p>(2) <i>Effectisering in het Bankboek</i> - Effectisering betekent een transactie of plan waarbij het kredietrisico dat verband houdt met blootstelling of pool van blootstellingen is verdeeld, hebben de volgende kenmerken:</p> <ul style="list-style-type: none"> - betalingen gedaan in de transactie of het plan hangen af van de prestaties van de blootstelling of pool van blootstellingen; - de subordinatie van schijven bepaalt de verspreiding van verliezen gedurende de levensduur van de risico-overdracht. <p>Alle toezeggingen (met inbegrip van derivaten en liquiditeitslijnen) gedaan voor een effectisering moeten behandeld worden als effectiseringsblootstelling. De meeste van die toezeggingen worden genoteerd in het prudentiële bankboek;</p> <p>(3) <i>Tegenpartij kredietrisico</i> - Tegenpartij kredietrisico is de vertaling van het kredietrisico dat opgesloten ligt in financiële transacties, investeringen en/of betalingstransacties tussen tegenpartijen. Die transacties omvatten bilaterale overeenkomsten zoals over-de toonbank (OTC) derivatenovereenkomsten alsmede overeenkomsten aangegaan via clearinginstuten. Het bedrag van dit risico kan verschillen in de loop van de tijd in lijn met veranderende marktparameters die dan van invloed is op de vervangingswaarde van de betrokken transacties;</p> <p>Tegenpartijrisico ligt in het geval dat een tegenpartij zijn verplichtingen niet na kan komen om de Bank de volledige aanwezige waarde van de stromen te betalen met betrekking tot een transactie of een portefeuille waarvoor de Bank een netto-ontvanger is. Tegenpartijkredietrisico is ook gekoppeld aan de vervangingskosten van een derivaat of portefeuille in het geval de tegenpartij zijn betalingsverplichting niet na kan komen. Dus kan het als marktrisico gezien worden in geval van het niet nakomen van de betalingsverplichting of een onvoorzien risico. Tegenpartijrisico vloeit voort uit zowel bilaterale activiteiten van BNP Paribas met klanten als verrekeningsactiviteiten via een verrekenkantoor of een externe verrekenaar.</p> <p>(4) <i>Marktrisico</i> - Marktrisico's het risico op verlies van waarde door nadelige trends in marktprijzen of -parameter, ofwel direct observeerbaar of niet.</p> <p>Observeerbare marktparameters omvatten, maar zijn niet beperkt tot,</p>

		<p>wisselkoersen, prijzen van schuldeffecten en grondstoffen (ofwel genoteerd of verkregen door referentie naar een vergelijkbare activum), prijzen van derivaten en andere parameters die rechtstreeks hieruit getrokken kunnen worden, zoals interestvoeten, kredietspreidingen, volatiliteiten en geïmpliceerde correlaties en andere vergelijkbare parameters.</p> <p>Niet-observeerbare factoren zijn de factoren die gebaseerd op werkende aannames, zoals parameters in modellen of gebaseerd op statistische of economische analyses, niet-zeker te stellen in de markt.</p> <p>In vaste inkomsten handelsboeken, kredietinstrumenten worden gewaardeerd op basis van de opbrengsten van bonds en kredietspreidingen, die marktparameters op dezelfde manier vertegenwoordigt als interestvoeten of wisselkoersen. Het kredietrisico dat voortvloeit uit het schuldinstrument van de emittent is dus een bestanddeel van marktrisico bekend als emittentrisico.</p> <p>Liquiditeit is een belangrijk bestanddeel van marktrisico. In tijden van beperkte of geen liquiditeit, kunnen instrumenten of goederen niet verhandelbaar zijn tegen hun geschatte waarde. Dit kan bijvoorbeeld voortvloeien uit lage transactievolumes, wekelijks restricties of een sterke disbalans tussen vraag en aanbod voor bepaalde activa.</p> <p>Het marktrisico met betrekking tot bankactiviteiten omvat het risico van verlies op aandelen aan de ene kant en de risico's van rente en wisselkoersen die voortvloeien uit intermediaire activiteiten van banken aan de andere kant;</p> <p>(5) <i>Liquiditeitsrisico</i> - Liquiditeitsrisico is het risico dat BNPP niet in staat is zijn verplichtingen na te komen of om een positie te af te wikkelen of af te handelen vanwege de marktomgeving of idiosyncratische factoren (d.w.z. specifiek voor BNP Paribas) binnen een gegeven tijds kader en tegen redelijke kosten.</p> <p>Liquiditeitsrisico weerspiegelt het risico dat de BNPP Group niet in staat is om aan huidige of toekomstige voorzienbare en onvoorzienbare contante of dekkingsvereisten te voldoen, over alle tijdspannes, van korte tot lange termijn.</p> <p>Dit risico kan voortvloeien uit de vermindering van financieringsmiddelen, verlagen van financieringsafspraken, een verlaging van de liquiditeit van bepaalde middelen of een toename in contante of dekkingsopvragingen. Het kan te maken hebben met de bank zelf (reputatierisico) of met externe factoren (risico's in sommige markten).</p> <p>Het liquiditeitsrisico van de BNPP Group valt onder een wereldwijd liquiditeitsbeleid goedgekeurd door de ALM-commissie van de Group. Dit beleid is gebaseerd op managementprincipes die erop gericht zijn dat ze zowel bij normale omstandigheden als tijdens een liquiditeitscrisis van toepassing zijn. De liquiditeitspositie van de Group wordt beoordeeld op basis van interne indicatoren en wetgevende ratio's.</p> <p>(6) <i>Operationeel risico</i> - Operationeel risico is het risico op verlies door ongeschikte of falende interne processen of door externe gebeurtenissen expres, per ongeluk of natuurrampen. Beheer van operationeel risico is gebaseerd op een analyse van de "oorzaak - gebeurtenis - gevolg" keten.</p> <p>Interne processen die leiden tot operationeel risico kan betrekking hebben op werknemers en/of IT-systemen. Externe gebeurtenissen omvatten, maar zijn niet beperkt tot, overstromingen, brand, aardbevingen en terroristische aanvallen. Krediet of marktgebeurtenis, zoals een default of fluctuaties in waarde vallen niet binnen het bereik van operationeel risico.</p> <p>Operationeel risico omvat fraude, personeelszakenrisico's, juridische risico's, niet-nalevingsrisico's, belastingrisico's, informatiesysteemrisico's, gedragsrisico's</p>

		<p>(risico's met betrekking tot het verstrekken van onvoldoende financiële dienstverlening), risico met betrekking tot defecten in besturingsprocessen, inclusief leningprocedures of modelrisico's alsmede mogelijke financiële implicaties die voortvloeien uit het beheer van reputatierisico's.</p> <p>(7) <i>Nalevings- en reputatierisico</i> - Nalevingsrisico wordt gedefinieerd in Franse richtlijnen als het risico op wettelijke, administratieve of disciplinaire sancties, op groot financieel verlies of reputatieschade waar een bank mee te maken kan krijgen als gevolg van het niet naleven van nationale of Europese wetten en richtlijnen, gedragscodes en normen van goede praktijken die van toepassing zijn op bank- en financiële activiteiten of instructies die gegeven zijn door een bestuursorgaan, vooral ten aanzien van het toepassen van richtlijnen uitgevaardigd door een toezichhoudend orgaan.</p> <p>Per definitie is dit risico een subcategorie van operationeel risico. Aangezien bepaalde implicaties van nalevingsrisico echter meer dan alleen een puur financieel verlies met zich meebrengt en daadwerkelijk de reputatie van een instituut kan schande, behandelt de BNPP nalevingsrisico's afzonderlijk.</p> <p>Reputatierisico is het risico van schade toebrengen aan het vertrouwen dat geplaatst is in een bedrijf door zijn klanten, tegenpartijen, leveranciers, werknemers, aandeelhouders, toezichhouders en andere belanghebbenden wiens vertrouwen in een essentiële voorwaarde is voor het bedrijf om zijn dagelijkse werkzaamheden uit te voeren.</p> <p>Reputatierisico is primair gekoppeld aan alle andere risico's die door de BNPP gedragen worden;</p> <p>(8) Verzekeringsrisico's - BNP Paribas Cardif wordt blootgesteld aan de volgende risico's:</p> <ul style="list-style-type: none"> - markt risico, risico van financieel verlies voortvloeiend uit ongunstige bewegingen van financiële markten. Deze ongunstige bewegingen worden opmerkelijk zichtbaar in koersen (valutawisselkoersen, obligatiekoersen, aandelenkoersen en grondstofprijzen, derivatenkoersen, onroerend goedprijzen...) en wordt afgeleid van fluctuaties in rente, kredietspreidingen, volatiliteit en correlaties. - kredietrisico, risico op verlies voortvloeiend uit fluctuaties in de kredietwaardigheid van emittenten van aandelen, tegenpartijen en schuldenaren aan wie de verzekeringen en herverzekeringen worden blootgesteld. Onder de schuldenaren worden de risico's die verband houden met financiële instrumenten (inclusief de banken waar het Bedrijf geld heeft ingelegd) en risico's die verband houden met vorderingen gegenereerd door de verzekeringstechnische activiteiten (innen van premies, herstel van herverzekering...) onderverdeeld in twee categorieën: "Activakredietrisico" en "Passivakredietrisico". - verzekeringstechnisch risico is het risico van financieel verlies veroorzaakt door een plotselinge, onverwachte toename in verzekeringsclaims. Afhankelijk van het type verzekeringsbedrijf (leven, niet-leven), kan dit risico statistisch, macroeconomisch of gedrag zijn of kan betrekking hebben op publieke gezondheid of rampen. - operationeel risico is het risico op verlies voortvloeiend uit de ontoereikendheid of het falen van interne processen, IT-storingen of opzettelijke externe gebeurtenissen, zowel per ongeluk als natuurlijk. De in deze definitie genoemde externe gebeurtenissen omvatten rampen van menselijke of natuurlijke aard. <p>(a) Moeilijke markt- en economische omstandigheden hebben in de toekomst een wezenlijke negatieve impact gehad en kunnen dit in de toekomst blijven hebben op</p>

		<p>de omgeving waarin financiële instellingen actief zijn en dus ook op de financiële positie, resultaten en risicokosten van de BNPP.</p> <p>(b) Het referendum van het Verenigd Koninkrijk om de Europese Unie te verlaten kan leiden tot veel onzekerheid, volatiliteit en verstoring op de Europese en bredere financiële markten en kan dus een nadelig effect hebben op de omgeving waarin BNPP actief is.</p> <p>(c) Vanwege het geografische bereik van hun activiteiten, kan BNPP kwetsbaar zijn voor landelijke of regionaal specifieke politieke, macroeconomische en financiële omgevingen of omstandigheden.</p> <p>(d) De toegang van BNPP tot en de kost van financiering kunnen negatief beïnvloed worden door een herhaling van financiële crises, die op haar beurt de economische omstandigheden verslechtert, en verdere ratingverlagingen, toenames in kredietspreidingen of andere factoren teweeg kan brengen.</p> <p>(e) Significante wijzigingen in de interestvoet kunnen een negatieve invloed hebben op de inkomsten of winstgevendheid van BNPP.</p> <p>(f) De langere verblijf in een omgeving met lage rente brengt inherente systeemrisico's met zich mee en het verlaten van een dergelijke omgeving brengt ook risico's met zich mee.</p> <p>(g) De degelijkheid en het gedrag van andere financiële instellingen en marktdeelnemers kunnen een negatieve invloed hebben op BNPP.</p> <p>(h) BNPP kan significante verliezen lijden op haar handels- en investeringsactiviteiten omwille van marktfluctuaties en volatiliteit.</p> <p>(i) BNPP kan minder inkomsten genereren van haar brokerage-activiteiten en andere activiteiten die gebaseerd zijn op commissielonen en vergoedingen gedurende een verminderde marktactiviteit.</p> <p>(j) Langdurig verminderde dalingen van de markten kunnen liquiditeit in de markten verminderen, wat het moeilijker maakt om activa te verkopen en wat mogelijk tot significante verliezen kan leiden.</p> <p>(k) Wetten en richtlijnen die in de afgelopen jaren zijn aangenomen, voornamelijk als antwoord op de wereldwijde financiële crisis, kunnen een significante impact hebben op BNPP en de financiële en economische omgeving waarin het actief is.</p> <p>(l) BNPP is onderworpen aan uitgebreide en evoluerende regelgevende regimes in de rechtsgebieden waarin zij actief is.</p> <p>(m) BNPP kan substantiële boetes opgelegd krijgen en andere administratieve en criminele fouten voor niet-naleving van geldende wetten en richtlijnen en kan ook verlies leiden bij gerelateerde (of niet-gerelateerde) rechtszaken met particuliere partijen.</p> <p>(n) Er zijn risico's verbonden aan het invoeren van de strategische plannen van BNPP.</p>

Onderdeel	Titel	
		<p>(o) BNPP kan moeilijkheden ondervinden om verworven ondernemingen te integreren en kan niet in staat blijken voordelen te realiseren die verwacht werden van haar verwervingen.</p> <p>(p) Intense concurrentie door banken en niet-banken kunnen een nadelig effect hebben op de inkomsten en winstgevendheid van BNPP.</p> <p>(q) Een substantiële toename in nieuwe provisies of een daling van het niveau van voorheen aangehouden provisies kan een negatieve invloed hebben op de operationele resultaten van BNPP en haar financiële positie.</p> <p>(r) BNPP's beleid inzake risico-management, -procedures en -methodes, kan het blootstellen aan ongeïdentificeerde of niet-geanticipeerde risico's die tot significante verliezen kunnen leiden.</p> <p>(s) BNPP's hedging-strategieën kunnen mogelijks verliezen niet voorkomen.</p> <p>(t) Aanpassingen aan de boekwaarde van de aandelen- en derivatenportefeuilles van BNPP en de schulden van BNPP zelf kunnen van invloed zijn op het nettoinkomen en het vermogen van de aandeelhouders.</p> <p>(u) De verwachte wijzigingen in de boekhoudkundige principes met betrekking tot financiële instrumenten kunnen van invloed zijn op de balans en de regelgevende kapitaalratio en leidt tot aanvullende kosten.</p> <p>(v) De competitieve positie van BNPP kan beschadigd worden indien haar reputatie beschadigd wordt.</p> <p>(w) Een onderbreking van de informatiesystemen van BNPP kunnen resulteren in materieel verlies van klantinformatie, schade aan de reputatie van BNPP en kan leiden tot financieel verlies.</p> <p>(x) Onvoorziene externe gebeurtenissen kunnen de activiteiten van BNPP verstoren en significante verliezen en bijkomende kosten veroorzaken.</p> <p>Emittenten</p> <p>De grootste risico's die hierboven beschreven worden met betrekking tot BNPP vormen ook de belangrijkste risico's voor BNPP, B.V., zowel als een individuele entiteit of een bedrijf in de BNPP Groep</p> <p><i>Afhankelijkheidsrisico</i></p> <p>BNPP B.V. is een actieve werkmaatschappij. De activa van BNPP B.V. bestaan uit de verplichtingen van andere BNPP Groep-entiteiten. Het vermogen van BNPP B.V. om aan haar eigen verplichtingen te voldoen, hangt af van het vermogen van andere BNPP Groep-entiteiten om aan hun verplichtingen te voldoen. Met betrekking tot effecten die worden uitgegeven, geldt dat het vermogen van BNPP B.V. om aan de verplichtingen die voortkomen uit die effecten te voldoen, afhankelijk is van de ontvangst van betalingen afkomstig van hedgingovereenkomsten die BNPP B.V. afsluit met andere BNPP Groep-entiteiten. Als gevolg hiervan zullen Houders van BNPP B.V., afhankelijk van de bepalingen van de Garantie afgegeven door BNPP, blootgesteld worden aan het vermogen van BNP Groep-entiteiten om hun verplichtingen uit te voeren die voortvloeien uit dergelijke hedgingovereenkomsten.</p> <p><i>Marktrisico</i></p>

Onderdeel	Titel	
		<p>BNPP B.V. stelt zich bloot aan marktrisico's die voortvloeien uit posities in interestvoeten, wisselkoersen, grondstoffen en aandelenproducten, die allemaal blootgesteld worden aan algemene en specifieke marktbevingen. Deze risico's worden echter gehedged door optie- en swapovereenkomsten en worden deze risico's in principe gemigreerd.</p> <p><i>Kredietrisico</i></p> <p>BNPP B.V. concentreert zich voor een groot deel op kredietrisico's aangezien alle OTC-overeenkomsten van het moederbedrijf en andere BNPP Groep-entiteiten worden overgenomen. Het doel en de activiteiten van BNPP B.V. in overweging genomen alsmede het feit dat het moederbedrijf onder supervisie staat van de Europese Centrale Bank en de Autorité de Contrôle Prudentiel et de Résolution vindt het management dat deze risico's aanvaardbaar zijn. De lange termijn senior schuld van BNP Paribas is beoordeeld als A door Standard & Poor's en A1 door Moody's.</p> <p><i>Liquiditeitsrisico</i></p> <p>BNPP B.V. wordt in grote mate blootgesteld aan liquiditeitsrisico's. Om dit risico af te dekken, is BNPP B.V. netting-overeenkomsten aangegaan met het moederbedrijf en andere BNPP Groep-entiteiten.</p>
