PART B - OTHER INFORMATION

1. Listing and Admission to trading - De listing

Application will be made for the Securities to be admitted to trading on the Multilateral Trading Facility of securitised derivatives financial instruments organised and managed by Borsa Italiana S.p.A. (the "**SeDeX MTF**").

2. Ratings

The Securities have not been rated.

The rating of the Issuer is A+ from Standard and Poor's.

The rating of the Guarantor is Aa3 from Moody's and A+ from Standard and Poor's.

As defined by Moody's, an "Aa" rating means that the obligations of the Issuer and the Guarantor under the Programme are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 3 indicates a ranking in the lower end of that generic rating category.

As defined by Standard & Poor's, an obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the relevant Issuer and Guarantor's capacity to meet its financial commitment on the obligation is still strong. The addition of a plus (+) or minus (-) sign shows relative standing within the major rating category.

Moody's and Standard & Poor's are established in the European Union and are registered under Regulation (EC) No. 1060/2009 (as amended).

3. Interests of Natural and Legal Persons Involved in the Issue

Save as described above and discussed in "*Risks*" section in the Base Prospectus, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the issue.

4. Performance of Underlying/Formula/Other Variable and Other Information concerning the Underlying Reference

See Base Prospectus for an explanation of effect on value of Investment and associated risks in investing in Securities.

Past and further performances of each Index are available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Index as well as the Conversion Rate may be obtained from the Calculation Agent by emailing investimenti@bnpparibas.com.

B.19/ B.4b	Trend information	<p>Macroeconomic environment</p> <p>Macroeconomic and market conditions affect BNPP's results. The nature of BNPP's business makes it particularly sensitive to macroeconomic and market conditions in Europe.</p> <p>In 2018, global growth remained healthy at around 3.7% (according to the IMF), reflecting a stabilised growth rate in advanced economies (+2.4% after +2.3% in 2017) and in emerging economies (+4.6% after +4.7% in 2017). Since the economy was at the peak of its cycle in large developed countries, central banks continued to tighten accommodating monetary policy or planned to taper it. With inflation levels still moderate, however, central banks were able to manage this transition gradually, thereby limiting the risks of a marked downturn in economic activity. Thus, the IMF expects the global growth rate experienced over the last two years to continue in 2019 (+3.5%) despite the slight slowdown expected in advanced economies.</p>

Element	Title	
		<p>In this context, the following two risk categories can be identified:</p> <p><i>Risks of financial instability due to the conduct of monetary policies</i></p> <p>Two risks should be emphasised: a sharp increase in interest rates and the current very accommodating monetary policy being maintained for too long.</p> <p>On the one hand, the continued tightening of monetary policy in the United States (which started in 2015) and the less-accommodating monetary policy in the euro zone (reduction in assets purchases started in January 2018, with an end in December 2018) involve risks of financial turbulence and economic slowdown more pronounced than expected. The risk of an inadequately controlled rise in long-term interest rates may in particular be emphasised, under the scenario of an unexpected increase in inflation or an unanticipated tightening of monetary policies. If this risk materialises, it could have negative consequences on the asset markets, particularly those for which risk premiums are extremely low compared to their historic average, following a decade of accommodating monetary policies (credit to non-investment grade corporates or countries, certain sectors of the equity and bond markets, etc.) as well as on certain interest rate-sensitive sectors.</p> <p>On the other hand, despite the upturn since mid-2016, interest rates remain low, which may continue to encourage excessive risk-taking among some players in the financial systemmarket participants: increased lengthening maturities of financings and assets held, less stringent credit policy for granting loans, and an increase in leveraged financings. Some players of these participants (insurance companies, pension funds, asset managers, etc.) entail have an increasingly systemic dimension and in the event of market turbulence (linked for instance example to a sudden sharp rise in interest rates and/or a sharp price correction) they may decide could be brought to unwind large positions in a relatively weak market liquidity.</p> <p><i>Systemic risks related to increased debt</i></p> <p>Macro-economically, the impact of an interest rate increase could be significant for countries with high public and/or private debt-to-GDP. This is particularly the case for certain European countries (in particular Greece, Italy, and Portugal), which are posting public debt-to-GDP ratios often above 100% but also for emerging countries.</p> <p>Between 2008 and 2018, the latter recorded a marked increase in their debt, including foreign currency debt owed to foreign creditors. The private sector was the main source of the increase in this debt, but also the public sector to a lesser extent, particularly in Africa. These countries are particularly vulnerable to the prospect of a tightening in monetary policies in the advanced economies. Capital outflows could weigh on exchange rates, increase the costs of servicing that debt, import inflation, and cause the emerging countries' central banks to tighten their credit conditions. This would bring about a reduction in forecast economic growth, possible downgrades of sovereign ratings, and an increase in risks for the banks. While the exposure of the BNP Paribas Group to emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the Group and potentially alter its results.</p> <p>It should be noted that debt-related risk could materialise, not only in the event of a sharp rise in interest rates, but also with any negative growth shocks.</p> <p><i>Laws and regulations applicable to financial institutions</i></p> <p>Recent and future changes in the laws and regulations applicable to financial institutions may have a significant impact on BNPP. Measures that were recently adopted or which are (or whose application measures are) still in draft format, that have or are likely to have an impact on BNPP notably include:</p> <ul style="list-style-type: none"> - regulations governing capital: the Capital Requirements Directive IV ("CRD 4")/the Capital Requirements Regulation ("CRR"), the international standard for total-loss-absorbing capacity ("TLAC") and BNPP's designation as a

Element	Title	
		<p>financial institution that is of systemic importance by the Financial Stability Board;</p> <ul style="list-style-type: none"> - the structural reforms comprising the French banking law of 26 July 2013 requiring that banks create subsidiaries for or segregate "speculative" proprietary operations from their traditional retail banking activities, the "Volcker rule" in the US which restricts proprietary transactions, sponsorship and investment in private equity funds and hedge funds by US and foreign banks; - the European Single Supervisory Mechanism and the ordinance of 6 November 2014; - the Directive of 16 April 2014 related to deposit guarantee systems and its delegation and implementing Decrees, the Directive of 15 May 2014 establishing a Bank Recovery and Resolution framework, the Single Resolution Mechanism establishing the Single Resolution Council and the Single Resolution Fund; - the Final Rule by the US Federal Reserve imposing tighter prudential rules on the US transactions of large foreign banks, notably the obligation to create a separate intermediary holding company in the US (capitalised and subject to regulation) to house their US subsidiaries; - the new rules for the regulation of over-the-counter derivative activities pursuant to Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, notably margin requirements for uncleared derivative products and the derivatives of securities traded by swap dealers, major swap participants, security-based swap dealers and major security-based swap participants, and the rules of the US Securities and Exchange Commission which require the registration of banks and major swap participants active on derivatives markets as well as transparency and reporting on derivative transactions; - the new Markets in Financial Instruments Directive ("MiFID II") and Markets in Financial Instruments Regulation ("MiFIR"), and European regulations governing the clearing of certain over-the-counter derivative products by centralised counterparties and the disclosure of securities financing transactions to centralised bodies. - the General Data Protection Regulation ("GDPR") came into force on 25 May 2018. This regulation aims to move the European data confidentiality environment forward and improve personal data protection within the European Union. Businesses run the risk of severe penalties if they do not comply with the standards set by the GDPR. This Regulation applies to all banks providing services to European citizens; and - the finalisation of Basel 3 published by the Basel committee in December 2017, introducing a revision to the measurement of credit risk, operational risk and credit valuation adjustment ("CVA") risk for the calculation of risk-weighted assets. These measures are expected to come into effect in January 2022 and will be subject to an output floor (based on standardised approaches), which will be gradually applied as of 2022 and reach its final level in 2027. <p>Moreover, in this tougher regulatory context, the risk of non-compliance with existing laws and regulations, in particular those relating to the protection of the interests of customers and personal data, is a significant risk for the banking industry, potentially resulting in significant losses and fines. In addition to its compliance system, which specifically covers this type of risk, the BNP Paribas Group places the interest of its customers, and more broadly that of its stakeholders, at the heart of its values. Thus, the code of conduct adopted by the BNP Paribas Group in 2016 sets out detailed</p>

Element	Title		
		<p>values and rules of conduct in this area.</p> <p>Cyber security and technology risk</p> <p>BNPP's ability to do business is intrinsically tied to the fluidity of electronic transactions as well as the protection and security of information and technology assets.</p> <p>The technological change is accelerating with the digital transformation and the resulting increase in the number of communications circuits, proliferation in data sources, growing process automation, and greater use of electronic banking transactions.</p> <p>The progress and acceleration of technological change are giving cybercriminals new options for altering, stealing, and disclosing data. The number of attacks is increasing, with a greater reach and sophistication in all sectors, including financial services.</p> <p>The outsourcing of a growing number of processes also exposes the Group to structural cyber security and technology risks leading to the appearance of potential attack vectors that cybercriminals can exploit.</p> <p>Accordingly, the BNP Paribas Group has a second line of defence within the Risk Function dedicated to managing technical and cyber security risks. Thus, operational standards are regularly adapted to support the Bank's digital evolution and innovation while managing existing and emerging threats (such as cyber-crime, espionage, etc.).</p>

Section D - Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with its activities, as described below:</p> <p>Guarantor</p> <p>Seven main categories of risk are inherent in BNPP's activities:</p> <ol style="list-style-type: none"> (1) <i>Credit Risk</i> - Credit risk is defined as the probability of a borrower or counterparty defaulting on its obligations to BNPP. Probability of default along with the recovery rate of the loan or debt in the event of default are essential elements in assessing credit quality. BNPP's risk-weighted assets subject to this type of risk amounted to EUR 504 billion at 31 December 2018. In accordance with the EBA recommendations, this category of risk also includes risks on equity investments, as well as those related to insurance activities; (2) <i>Operational risk</i> - Operational risk is the risk of loss resulting from failed or inadequate internal processes (particularly those involving personnel and information systems) or external events, whether deliberate, accidental or natural (floods, fires, earthquakes, terrorist attacks, etc.). Operational risks include fraud, human resources risks, legal and reputational risks, non-compliance risks, tax risks, information systems risks, risk of providing inadequate financial services (conduct risk), risk of failure of operational processes including credit processes, or from the use of a model (model risk), as well as potential financial consequences related to reputation risk management. BNPP's risk-weighted assets subject to this type of risk amounted to EUR 73 billion at 31 December 2018. (3) <i>Counterparty Risk</i> - Counterparty risk arises from BNPPs credit risk in the specific context of market transactions, investments, and/or settlements. The amount of this risk varies over time depending on fluctuations in market parameters affecting the potential future value of the transactions concerned. BNPP's risk-weighted assets subject to this type of risk amounted to EUR 27 billion at 31 December 2018. (4) <i>Market Risk</i> - Market risk is the risk of loss of value caused by an unfavorable trend in prices or market parameters. Market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether the price is directly quoted or obtained by reference to a comparable asset), the price of derivatives on an established market and all benchmarks that can be derived from market quotations such as interest rates, credit spreads, volatility or implicit correlations or other similar parameters. BNPP's risk-weighted assets subject to this type of risk amounted to EUR 20 billion at 31 December 2018. (5) <i>Securitisation risk</i> - Securitisation is a transaction or arrangement by which the credit risk associated with a liability or set of liabilities is subdivided into tranches. Any commitment made under a securitisation structure (including derivatives and liquidity lines) is considered to be a securitisation. The bulk of these commitments are in the prudential banking portfolio. BNPP's risk-

		<p>weighted assets subject to this type of risk amounted to EUR 7 billion at 31 December 2018.</p> <p>(6) <i>Risks related to deferred taxes and certain holdings in credit or financial institutions</i> - amounts below the prudential capital deduction thresholds generate risk-weighted assets amounting to EUR 17 billion at 31 December 2018.</p> <p>(7) <i>Liquidity risk</i> - Liquidity risk is the risk that BNPP will not be able to honor its commitments or unwind or offset a position due to market conditions or specific factors within a specified period of time and at a reasonable cost. It reflects the risk of not being able to cope with net cash outflows, including collateral requirements, over short-term to long-term horizons. The BNPP Group's specific risk can be assessed through its short-term liquidity ratio, which analyses the hedging of net cash outflows during a 30-day stress period.</p> <p>More generally, the risks to which the BNPP Group is exposed may arise from a number of factors related, among other things, to changes in its macroeconomic, competitive, market and regulatory environment or the implementation of its strategy, its business or its operations.</p> <p><i>Risks</i></p> <p>This section summarises the principal risks that BNPP currently considers itself to face. They are presented in the following categories: risks related to the macroeconomic environment, risks related to the market environment, regulatory risks and risks related to the implementation of BNPP's strategy, risks related to the management of BNPP's business, risks related to the BNPP's operations.</p> <p>(a) Adverse economic and financial conditions have in the past had and may in the future have impact on BNPP and the markets in which it operates.</p> <p>(b) Given the global scope of its activities, BNPP may be vulnerable to certain political, macroeconomic or financial risks in the countries and regions where it operates.</p> <p>(c) BNPP's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in credit spreads or other factors.</p> <p>(d) The prolonged low interest rate environment carries inherent systemic risks, and an exit from such environment also carries risks.</p> <p>(e) Significant interest rate changes could adversely affect BNPP's revenues or profitability.</p> <p>(f) The soundness and conduct of other financial institutions and market participants could adversely affect BNPP.</p> <p>(g) BNPP may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>(h) BNPP may generate lower revenues from commission and fee-based</p>

Element	Title	
		<p>businesses during market downturns.</p> <p>(i) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.</p> <p>(j) BNPP must ensure that its assets and liabilities properly match in order to avoid exposure to losses.</p> <p>(k) Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact BNPP and the financial and economic environment in which it operates.</p> <p>(l) BNPP could become subject to a resolution proceeding.</p> <p>(m) BNPP is subject to extensive and evolving regulatory regimes in the jurisdictions in which it operates.</p> <p>(n) BNPP may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.</p> <p>(o) Risks related to the implementation of BNPP's strategic plans.</p> <p>(p) BNPP may experience difficulties integrating acquired companies and may be unable to realise the benefits expected from its acquisitions.</p> <p>(q) BNPP is exposed to credit risk and counterparty risk.</p> <p>(r) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPP's results of operations and financial condition.</p> <p>(s) BNPP's hedging strategies may not prevent losses.</p> <p>(t) Adjustments to the carrying value of BNPP's securities and derivatives portfolios and BNPP's own debt could have an impact on its net income and shareholders' equity.</p> <p>(u) The credit ratings of BNPP may be downgraded, which would weigh on its profitability.</p> <p>(v) Intense competition by banking and non banking operators could adversely affect BNPP's revenues and profitability.</p> <p>(w) BNPP's risk management policies, procedures and methods, may leave it exposed to unidentified or unanticipated risks, which could lead to material losses.</p> <p>(x) An interruption in or a breach of BNPP's information systems may cause substantial losses of client or customer information, damage to BNPP's</p>

Element	Title	
		<p>reputation and financial losses.</p> <p>(y) BNPP's competitive position could be harmed if its reputation is damaged.</p> <p>Issuer</p> <p>The main risks described above in relation to BNPP also represent the main risks for BNPP B.V., either as an individual entity or a company in the BNPP Group.</p> <p><i>Dependency Risk</i></p> <p>BNPP B.V. is an operating company. The assets of BNPP B.V. consist of the obligations of other BNPP Group entities. The ability of BNPP B.V. to meet its own obligations will depend on the ability of other BNPP Group entities to fulfil their obligations. In respect of securities it issues, the ability of BNPP B.V. to meet its obligations under such securities depends on the receipt by it of payments under certain hedging agreements that it enters with other BNPP Group entities. Consequently, Holders of BNPP B.V. securities will, subject to the provisions of the Guarantee issued by BNPP, be exposed to the ability of BNPP Group entities to perform their obligations under such hedging agreements.</p> <p><i>Market Risk</i></p> <p>BNPP B.V. takes on exposure to market risks arising from positions in interest rates, currency exchange rates, commodities and equity products, all of which are exposed to general and specific market movements. However, these risks are hedged by option and swap agreements and therefore these risks are mitigated in principle.</p> <p><i>Credit Risk</i></p> <p>BNPP B.V. has significant concentration of credit risks as all OTC contracts are acquired from its parent company and other BNPP Group entities. Taking into consideration the objective and activities of BNPP B.V. and the fact that its parent company is under supervision of the European Central Bank and the Autorité de Contrôle Prudentiel et de Résolution management considers these risks as acceptable. The long term senior debt of BNP Paribas is rated (A+) by Standard & Poor's and (Aa3) by Moody's.</p> <p><i>Liquidity Risk</i></p> <p>BNPP B.V. has significant liquidity risk exposure. To mitigate this exposure, BNPP B.V. entered into netting agreements with its parent company and other BNPP Group entities.</p>
D.3	Key risks regarding the Securities	<p>In addition to the risks (including the risk of default) that may affect the Issuer's ability to fulfil its obligations under the Securities [or the Guarantor's ability to perform its obligations under the Guarantee], there are certain factors which are material for the purposes of assessing the risks associated with Securities issued under the Base Prospectus, including:</p> <p><i>Market Risks</i></p> <p>-the Securities are unsecured obligations;</p> <p>-Securities including leverage involve a higher level of risk and whenever there are losses on such Securities those losses may be higher than those of a similar security which is not leveraged;</p> <p>-the trading price of the Securities is affected by a number of factors including, but not limited to, (in respect of Securities linked to an Underlying Reference) the price of the</p>

Element	Title	
		<p>relevant Underlying Reference(s), time to redemption and volatility and such factors mean that the trading price of the Securities may be below the Cash Settlement Amount or value of the Entitlement;</p> <p>-exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities;</p> <p><i>Holder Risks</i></p> <p>-the meetings of Holders provisions permit defined majorities to bind all Holders;</p> <p>-in certain circumstances Holders may lose the entire value of their investment;</p> <p><i>Issuer/Guarantor Risks</i></p> <p>-a reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Securities;</p> <p>-certain conflicts of interest may arise (see Element E.4 below);</p> <p><i>Legal Risks</i></p> <p>-the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities;</p> <p>-expenses and taxation may be payable in respect of the Securities;</p> <p>-the Securities may be redeemed in the case of illegality or impracticability and such redemption may result in an investor not realising a return on an investment in the Securities;</p> <p>-any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it;</p> <p><i>Secondary Market Risks</i></p> <p>-the only means through which a Holder can realise value from the Security prior to its Redemption Date is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to exercise or wait until redemption of the Securities to realise a greater value than its trading value);</p> <p>-BNP Paribas Arbitrage S.N.C. is required to act as market-maker. In those circumstances, BNP Paribas Arbitrage S.N.C. will endeavour to maintain a secondary market throughout the life of the Securities, subject to normal market conditions and will submit bid and offer prices to the market. The spread between bid and offer prices may change during the life of the Securities. However, during certain periods, it may be difficult, impractical or impossible for BNP Paribas Arbitrage S.N.C. to quote bid and offer prices, and during such periods, it may be difficult, impracticable or impossible to buy or sell these Securities. This may, for example, be due to adverse market conditions, volatile prices or large price fluctuations, a large marketplace being closed or restricted or experiencing technical problems such as an IT system failure or</p>

Element	Title	
		<p>network disruption.</p> <p><i>Risks relating to Underlying Reference Asset(s)</i></p> <p>-In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include:</p> <p>-exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.</p> <p><i>Risks relating to Specific types of products</i></p> <p>The following risks are associated with ETS Products:</p> <p>Leverage Products</p> <p>Investors may be exposed to a partial or total loss of their invested capital. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Securities when repayment falls due, an investor may lose all or part of his investment in the Securities.</p> <p>If the Guarantor is unable or unwilling to meet its obligations under the Guarantee when due, an investor may lose all or part of his investment in the Securities.</p> <p>In addition, investors may lose all or part of their investment in the Securities as a result of the terms and conditions of the Securities.</p>

B.14	Dipendenza da altri	BNPP B.V. dipende da BNPP. BNPP B.V. è una società interamente controllata da

	soggetti del Gruppo	BNPP specialmente incaricata dell'emissione di titoli quali notes, warrants o certificati o altre obbligazioni che vengono sviluppate, definite e vendute agli investitori da altre società del Gruppo BNPP (inclusa BNPP). I titoli sono coperti attraverso l'acquisto di strumenti di copertura e/o titoli di garanzia da BNP Paribas ed entità di BNP Paribas, come descritto nell'Elemento D.2 di cui sotto. Si veda anche l'Elemento B.5 di cui sopra.
B.15	Principali attività	L'attività principale dell'Emittente consiste nell'emettere e/o acquisire strumenti finanziari di qualsiasi natura e nello stipulare contratti correlati per conto di vari enti nell'ambito del Gruppo BNPP.
B.16	Azionisti di controllo	BNP Paribas detiene il 100% del capitale sociale di BNPP B.V..
B.17	Rating	I rating del credito a lungo termine di BNPP B.V. è A+ con outlook stabile (S&P Global Ratings Europe Limited) e i rating del credito a breve termine di BNPP B.V. sono A-1 (S&P Global Ratings Europe Limited). Ai Titoli non è stato assegnato alcun giudizio di rating. Il rating di un titolo non costituisce una raccomandazione ad acquistare, vendere o detenere titoli, e può essere soggetto a sospensione, riduzione o ritiro in qualsiasi momento da parte dell'agenzia di rating che l'ha assegnato.
B.18	Descrizione della Garanzia	I Titoli emessi saranno garantiti incondizionatamente e irrevocabilmente da BNP Paribas (" BNPP " o il " Garante ") ai sensi di un atto di garanzia di diritto inglese stipulato da BNPP in data 3 giugno 2019, o in prossimità di tale data (la " Garanzia "). Nell'eventualità di un bail-in di BNPP ma non di BNPP B.V., le obbligazioni e/o gli importi dovuti da BNPP ai sensi della garanzia saranno ridotti per riflettere tale eventuale modifica o riduzione applicata alle responsabilità di BNPP e derivante dall'applicazione di una misura di bail-in di BNPP da parte di un organismo di vigilanza incaricato (anche nel caso in cui la garanzia non sia soggetta al bail-in). Le obbligazioni in conformità con la garanzia sono obbligazioni senior privilegiate (ai sensi dell'Articolo L.613-30-3-1-3° del Code monétaire et financier francese) e non garantite di BNPP e avranno pari priorità rispetto a ogni altra obbligazione non subordinata e non garantita presente e futura, fatte salve le eccezioni di volta in volta rese obbligatorie ai sensi del diritto francese.
B.19	Informazioni sui Garanti	
B.19/ B.1	Denominazione legale e commerciale del Garante	BNP Paribas.
B.19/ B.2	Domicilio/ forma giuridica / legislazione/ paese di costituzione	Il Garante è stato costituito nella forma di <i>société anonyme</i> (" <i>naamloze vennootschap</i> ") ai sensi della legge francese e ha ottenuto l'autorizzazione a operare quale banca. La sede legale al 16, boulevard des Italiens - 75009 Parigi, Francia.
B.19/ B.4b	Informazioni sulle tendenze	Contesto macroeconomico I risultati di BNPP sono influenzati dal contesto macroeconomico e di mercato. Data la natura della sua attività, BNPP è particolarmente sensibile alle condizioni macroeconomiche e di mercato in Europa. Nel 2018, la crescita globale si è mantenuta saldamente intorno al 3,7% (secondo il FMI), riflettendo un tasso di crescita stabile nelle economie avanzate (+2,4% dopo il +2,3% del 2017) e nelle economie emergenti (+4,6% dopo il +4,7% del 2017). Da quando l'economia dei maggiori paesi sviluppati ha segnato il picco del suo ciclo, le banche centrali hanno continuato a correggere la politica monetaria accomodante o a

		<p>pianificarne una progressiva riduzione. Con livelli d'inflazione ancora modesti, tuttavia, le banche centrali sono riuscite a gestire con gradualità questa transizione, limitando così i rischi di una contrazione dell'attività economica. Pertanto, nel 2019 il FMI prevede una conferma del tasso di crescita globale degli ultimi due anni (+3,5%), nonostante la lieve frenata attesa nelle economie avanzate).</p> <p>In questo scenario, possiamo identificare due tipologie di rischi:</p> <p><i>Rischi di instabilità finanziaria derivanti dalla gestione delle politiche monetarie</i></p> <p>Vanno evidenziati due ordini di rischi: un brusco aumento dei tassi d'interesse e il mantenimento per un periodo troppo esteso dell'attuale politica monetaria, di segno fortemente accomodante.</p> <p>Da una parte, la stabile stretta della politica monetaria negli Stati Uniti (iniziata nel 2015) e la politica monetaria meno accomodante nell'eurozona (la riduzione degli acquisti di titoli avviata a gennaio 2018 e conclusa a dicembre 2018) comporta rischi di turbolenze finanziarie e un rallentamento economico più marcato del previsto. Bisogna forte evidenziare soprattutto il rischio di un rialzo mal governato dei tassi d'interesse di lungo periodo, nello scenario di un aumento inatteso dell'inflazione o di una stretta non prevista delle politiche monetarie. Se si concretizzasse, questo rischio potrebbe ripercuotersi negativamente sui mercati finanziari e in particolare su quelli caratterizzati da premi per il rischio estremamente ridotti rispetto alle loro medie storiche, dopo un decennio di politiche monetarie accomodanti (crediti a società o paesi non-investment grade, alcuni settori dei mercati azionari e obbligazionari ecc.) oltre che su alcuni settori sensibili ai tassi d'interesse.</p> <p>D'altra parte, nonostante la ripresa registrata da metà 2016, i tassi di interesse restano bassi, il che potrebbe continuare a incoraggiare un'eccessiva assunzione di rischio tra alcuni operatori del sistema finanziario: allungamento delle scadenze di finanziamenti e attivi in portafoglio, politica meno restrittiva nella concessione di prestiti e un incremento dei finanziamenti tramite ricorso all'indebitamento. Alcuni di questi attori (compagnie assicurative, fondi pensione, asset manager ecc.) presentano una dimensione sempre più sistemica e, in caso di turbolenza dei mercati (associata per esempio a un brusco balzo dei tassi d'interesse e/o a una brusca correzione dei prezzi), potrebbero essere spinti a liquidare posizioni rilevanti in un mercato scarsamente liquido.</p> <p><i>Rischi sistemici correlati all'aumento del debito</i></p> <p>Da una prospettiva macroeconomica, l'impatto di un aumento dei tassi potrebbe essere considerevole per i paesi con un elevato rapporto fra il debito pubblico e/o privato e il PIL. È soprattutto il caso di alcuni paesi europei (in particolare la Grecia, l'Italia e il Portogallo), i cui indici di indebitamento rispetto al PIL superano spesso il 100%, ma sono coinvolti anche i paesi emergenti.</p> <p>Fra il 2008 e il 2018, questi ultimi hanno registrato un marcato incremento del loro debito, incluso il debito in valuta nei confronti di creditori esteri. Il settore privato ha rappresentato la principale fonte di questo debito, ma un contributo minore è giunto anche dal settore pubblico, specialmente in Africa. Sono paesi particolarmente vulnerabili alla prospettiva di una stretta monetaria nelle economie avanzate. I deflussi di capitale potrebbero incidere sui tassi di cambio, aumentare gli oneri per sostenere tale debito, importare inflazione e costringere le banche centrali dei paesi emergenti a una stretta delle condizioni di erogazione del credito. Si ridimensionerebbero le previsioni di crescita economica, potrebbero scendere i rating delle emissioni sovrane e, infine, si profilerebbero maggiori rischi per le banche. Malgrado l'esposizione contenuta del Gruppo BNP Paribas verso i mercati emergenti, la vulnerabilità di queste economie può generare turbolenze nel sistema finanziario globale in grado di coinvolgere il Gruppo e, potenzialmente, di alterarne i risultati.</p> <p>Va sottolineata la possibile emersione di un rischio legato al debito, non solo in caso di brusco rialzo dei tassi d'interesse bensì anche di eventuali shock negativi della</p>

Tale regolamento mira a far avanzare il quadro europeo in materia di riservatezza dei dati e migliorare la tutela dei dati personali nell'Unione europea. Le imprese rischiano pesanti penali in caso di mancato adeguamento agli standard definiti nel RGPD. Section D - Rischi

Elemento	Titolo	
D.2	Rischi fondamentali relativi agli Emittenti e ai Garanti	<p>I potenziali acquirenti dei Titoli emessi ai sensi del presente Prospetto di Base dovrebbero avere esperienze di investimento relativamente ad opzioni e negoziazione di opzioni e comprendere il rischio di negoziazione che i Titoli comportano. Un investimento in Titoli presenta alcuni rischi che dovrebbero essere valutati prima di effettuare ogni decisione di investimento. Alcuni rischi possono influenzare la capacità dell'Emittente di adempiere alle proprie obbligazioni sorte relativamente ai Titoli o la capacità del Garante di adempiere alle proprie obbligazioni relativamente alla Garanzia, alcuni dei quali sono indipendenti dal loro controllo. In particolare, l'Emittente e il Garante, congiuntamente al Gruppo BNPP, è esposto ai seguenti rischi, connessi alla sua attività:</p> <p>Garante</p> <p>Sette categorie principali di rischio sono inerenti alle attività di BNPP:</p> <ol style="list-style-type: none"> (1) <i>Rischio di Credito</i> - Il rischio di credito è definito come la probabilità che un debitore o una controparte non adempia alle proprie obbligazioni nei confronti di BNPP. La probabilità di insolvenza oltre che il tasso di recupero del prestito o debito in caso di insolvenza sono elementi essenziali nella valutazione della qualità del credito. Al 31 dicembre 2018 le attività di rischio ponderate di BNPP soggette a questo tipo di rischio ammontavano a 504 miliardi di EUR. In conformità con le raccomandazioni dell'EBA, questa categoria di rischio comprende anche i rischi sugli investimenti azionari, oltre che quelli relativi alle attività assicurative. (2) <i>Rischio operativo</i> - Per rischio operativo si intende il rischio di perdite derivanti da processi interni non funzionanti o inadeguati (in particolare quelli che coinvolgono personale e sistemi informativi) o da eventi esterni, siano essi intenzionali, accidentali o naturali (inondazioni, incendi, terremoti, attacchi terroristici ecc.). I rischi operativi comprendono la frode, i rischi per le risorse umane, i rischi legali e reputazionali, i rischi di non conformità, i rischi fiscali, i rischi dei sistemi informativi, il rischio di fornire servizi finanziari inadeguati (rischio di condotta), il rischio di fallimento dei processi operativi, compresi i processi di credito, o derivante dall'uso di un modello (rischio del modello), nonché le potenziali conseguenze finanziarie connesse alla gestione del rischio di reputazione. Al 31 dicembre 2018 le attività di rischio ponderate di BNPP soggette a questo tipo di rischio ammontavano a 73 miliardi di EUR. (3) <i>Rischio di controparte</i> - Il rischio di controparte deriva dal rischio di credito di BNPP nel contesto specifico delle operazioni di mercato, degli investimenti e/o dei regolamenti. L'ammontare di tale rischio varia nel tempo in funzione delle fluttuazioni dei parametri di mercato che influenzano il potenziale valore futuro delle operazioni interessate. Al 31 dicembre 2018 le attività di rischio ponderate di BNPP soggette a questo tipo di rischio ammontavano a 27 miliardi di EUR. (4) <i>Rischio di mercato</i> - Il rischio di mercato è il rischio di perdita di valore causato da un andamento sfavorevole dei prezzi o dei parametri di mercato. I parametri di mercato includono, ma non sono limitati a, tassi di cambio, prezzi di titoli e materie prime (sia quotati direttamente che ottenuti facendo riferimento a un'attività similare). (5) <i>Rischio di cartolarizzazione</i> - La cartolarizzazione è un'operazione o un accordo in base al quale il rischio di credito associato a una passività o a un insieme di passività è suddiviso in tranches. Qualsiasi impegno assunto

Elemento	Titolo	
		<p>nell'ambito di una struttura di cartolarizzazione (compresi i derivati e le linee di liquidità) è considerato una cartolarizzazione. La maggior parte di tali impegni è detenuta nel portafoglio bancario prudenziale. Al 31 dicembre 2018 le attività di rischio ponderate di BNPP soggette a questo tipo di rischio ammontavano a 7 miliardi di EUR.</p> <p>(6) <i>Rischi connessi alle imposte differite e a talune partecipazioni in istituzioni creditizie o finanziarie</i> - Gli importi inferiori alle soglie di deduzione prudenziale del capitale generano attività di rischio ponderate per un importo di 17 miliardi di EUR al 31 dicembre 2018.</p> <p>(7) <i>Rischio di liquidità</i> - Il rischio di liquidità è il rischio che BNPP non sarà in grado di onorare i propri impegni o smobilizzare o compensare una posizione a causa di condizioni di mercato o di fattori specifici entro un dato periodo di tempo e a un costo ragionevole. Riflette il rischio di non essere in grado di far fronte ai deflussi di cassa netti, compresi i requisiti collaterali, su orizzonti da breve a lungo termine. Il rischio specifico del Gruppo BNPP può essere valutato attraverso il suo indice di liquidità a breve termine, che analizza la copertura dei deflussi di cassa netti in un periodo di stress di 30 giorni.</p> <p>Più in generale, i rischi ai quali il Gruppo BNPP è esposto possono derivare da una serie di fattori legati, fra l'altro, all'evoluzione del contesto macroeconomico, competitivo, di mercato e normativo o all'attuazione della sua strategia, attività o operatività.</p> <p><i>Rischi</i></p> <p>La presente sezione sintetizza i rischi principali che BNPP ritiene attualmente di affrontare. Sono classificati nelle seguenti categorie: rischi legati al contesto macroeconomico, rischi legati al contesto di mercato, rischi regolamentari e rischi legati all'attuazione della strategia di BNPP, rischi legati alla gestione dell'attività di BNPP, rischi legati all'operatività di BNPP.</p> <p>(a) Condizioni economiche e finanziarie sfavorevoli hanno avuto in passato e potranno avere in futuro un impatto su BNPP e sui mercati in cui opera.</p> <p>(b) In considerazione della portata globale delle proprie attività, BNPP può essere esposta a determinati rischi politici, macroeconomici o finanziari nei paesi e nelle regioni in cui opera.</p> <p>(c) L'accesso di BNPP alla provvista e il costo di provvista potrebbero risentire di un ritorno della crisi finanziaria, del peggioramento delle condizioni economiche, di ulteriori riduzioni dei rating, dell'aumento degli spread o di altri fattori.</p> <p>(d) Lo scenario prolungato di tassi di interesse bassi comporta rischi sistemici impliciti e anche il superamento di questo scenario comporta rischi.</p> <p>(e) Mutamenti significativi dei tassi d'interesse potrebbero avere un impatto negativo sui ricavi o sulla redditività di BNPP.</p> <p>(f) La solidità e la condotta di altre istituzioni finanziarie e partecipanti del mercato potrebbero avere un impatto negativo su BNPP.</p>

Elemento	Titolo	
		(g) BNPP potrebbe subire perdite significative sulle sue attività di negoziazione e di investimento a causa di oscillazioni e della volatilità del mercato.
		(h) BNPP potrebbe generare ricavi inferiori dalle sue commissioni e provvigioni durante periodi di crisi dei mercati.
		(i) Il protrarsi della discesa dei mercati può ridurre la liquidità dei mercati, rendendo più difficile vendere attività e conducendo potenzialmente a perdite significative.
		(j) BNPP deve assicurarsi della corretta corrispondenza delle proprie attività e passività al fine di evitare l'esposizione a perdite.
		(k) Leggi e regolamenti adottati negli ultimi anni, soprattutto in risposta alla crisi finanziaria globale oltre che alle nuove proposte legislative, potrebbero avere un impatto significativo su BNPP e sul contesto finanziario ed economico in cui opera.
		(l) BNPP potrebbe essere oggetto di una procedura di risoluzione.
		(m) BNPP è soggetta a regimi di estesa regolamentazione in continua evoluzione nelle giurisdizioni in cui opera.
		(n) BNPP può incorrere in pesanti ammende e altre sanzioni amministrative e penali per il mancato adeguamento alle leggi e ai regolamenti applicabili; può inoltre subire perdite derivanti (o non derivanti) da controversie con privati.
		(o) Rischi associati all'attuazione dei piani strategici di BNPP.
		(p) BNPP potrebbe incontrare difficoltà nell'integrare le società acquisite e potrebbe non essere in grado di realizzare i benefici attesi dalle sue acquisizioni.
		(q) BNPP è esposto al rischio di credito e al rischio di controparte.
		(r) Un aumento sostanziale dei nuovi accantonamenti o un ammanco nel livello degli accantonamenti precedentemente registrati potrebbero avere un impatto negativo sui risultati operativi e sulla situazione finanziaria di BNPP.
		(s) Le strategie di copertura di BNPP potrebbero non impedire perdite.
		(t) Le rettifiche al valore di carico dei titoli e dei portafogli di derivati di BNPP e del suo debito potrebbero avere un impatto sull'utile netto e sul patrimonio netto.
		(u) I rating di credito di BNPP possono essere declassati, andando a incidere sulla sua redditività.
		(v) L'intensa competizione fra operatori bancari e non bancari potrebbe

Elemento	Titolo	
		<p>incidere negativamente sulle entrate e sulla redditività di BNPP.</p> <p>(w) Le politiche, procedure e modalità di gestione dei rischi di BNPP, possono esporre la stessa a rischi non identificati o imprevisti, che potrebbero causare perdite significative.</p> <p>(x) L'interruzione o la violazione dei sistemi informatici di BNPP potrebbe comportare la perdita sostanziale di informazioni inerenti ai clienti, danni alla reputazione di BNPP e conseguenti perdite finanziarie.</p> <p>(y) La posizione competitiva di BNPP potrebbe essere pregiudicata in caso di danneggiamento della sua reputazione.</p> <p>Emittenti</p> <p>I rischi principali sono descritti in precedenza relativamente a BNPP rappresentano anche i rischi principali cui è soggetta BNPP B.V., nonché ogni altra singola società o ente del Gruppo BNPP.</p> <p><i>Rischio derivante dai legami di dipendenza</i></p> <p>BNPP B.V. è una società operativa. Le attività di BNPP B.V. sono costituite dalle passività di altre società del Gruppo BNPP. La capacità di BNPP B.V. di adempiere alle proprie obbligazioni dipende dalla capacità delle altre società del Gruppo di adempiere alle loro obbligazioni. Relativamente ai titoli di sua emissione, la capacità di BNPP B.V. di adempiere alle obbligazioni sorte a fronte di tali titoli dipende dalla ricezione da parte di BNPP B.V. dei pagamenti effettuati ai sensi di alcuni accordi di copertura che sottoscrive con altre società del Gruppo BNPP. Pertanto, i Portatori dei titoli emessi da BNPP B.V., ai sensi della Garanzia emessa da BNPP, saranno esposti alla capacità delle società appartenenti al Gruppo BNP di adempiere alle proprie obbligazioni ai sensi di tali accordi di copertura.</p> <p><i>Rischio di Mercato</i></p> <p>BNPP B.V. assume esposizione al rischio di mercato derivanti da posizioni in tassi di interesse, tassi di cambio, prodotti azionari e materie prime, i quali sono tutti esposti a movimenti di mercato generali e specifici. Tuttavia, tali rischi sono coperti tramite sottoscrizione di contratti swap e opzioni e pertanto tali rischi sono da ritenersi mitigati, in linea di principio.</p> <p><i>Rischio di Credito</i></p> <p>BNPP B.V. ha una significativa concentrazione di rischio di credito in quanto tutti i contratti OTC sono acquistati dalla capogruppo e dalle altre società del Gruppo BNPP. In considerazione gli obiettivi e dell'attività di BNPP e la circostanza che la capogruppo è sottoposta alla supervisione della Banca Centrale Europea e della Autorité de Contrôle Prudentiel et de Résolution, tali rischi sono ritenuti accettabili dal management. Al debito senior a lungo termine di BNP Paribas è stato attribuito un rating A+ da Standard & Poor's e di Aa3 da Moody's.</p> <p><i>Rischio di Liquidità</i></p> <p>L'Emittente ha una significativa esposizione al rischio di liquidità. Al fine di attenuare tale esposizione l'Emittente ha concluso accordi di compensazione (netting agreements) con la capogruppo e altri soggetti appartenenti al Gruppo BNPP.</p>
D.3	Rischi chiave relativi ai Titoli	Oltre ai rischi (ivi incluso il rischio di inadempimento) che possono influenzare la capacità dell'Emittente di adempiere alle obbligazioni assunte relativamente ai Titoli o del Garante di adempiere alle obbligazioni assunte ai sensi della Garanzia, esistono

		<p>determinati fattori che sono significativi allo scopo di valutare i rischi associati ai Titoli emessi ai sensi del presente Prospetto di Base, ivi inclusi:</p> <p><i>Rischio di Mercato</i></p> <ul style="list-style-type: none"> -i Titoli sono obbligazioni non garantite; -i Titoli che operano con leva finanziaria comportano livello di rischio più alto e in caso di perdite su tali Titoli, tali perdite possono essere più elevate rispetto a quelle riportate su un titolo simile che non è oggetto di leva; -il prezzo di negoziazione dei Titoli è influenzato da vari fattori tra cui, a mero titolo esemplificativo (in relazione ai Titoli legati a un Sottostante di Riferimento), il prezzo del/i relativo/i Sottostante/i di Riferimento, il tempo restante alla scadenza o al rimborso e la volatilità, e tali fattori implicano che il prezzo di negoziazione dei Titoli può essere inferiore all'Importo del Rimborso Finale o all'Importo del Regolamento in Contanti o al valore del Diritto Spettante; -l'esposizione al Sottostante di Riferimento in molti casi sarà ottenuta tramite la stipula da parte dell'Emittente di accordi di copertura e, in relazione ai Titoli legati a un Sottostante di Riferimento, i potenziali investitori sono esposti all'andamento di questi accordi di copertura e ad eventi che possono avere un effetto sugli accordi di copertura e, di conseguenza, il verificarsi di uno di questi eventi può avere un effetto sul valore dei Titoli; <p><i>Rischi legati ai Portatori dei Titoli</i></p> <ul style="list-style-type: none"> -le disposizioni sulle assemblee dei Portatori consentono a maggioranze definite di vincolare tutti i Portatori; -In alcune circostanze i Portatori potrebbero perdere l'intero valore del loro investimento. <p><i>Rischi legati all'Emittente/Garante</i></p> <ul style="list-style-type: none"> -una riduzione dell'eventuale rating assegnato a titoli di debito in essere dell'Emittente o Garante (se applicabile) da parte di un'agenzia di rating potrebbe causare una riduzione del valore di negoziazione dei Titoli; -potrebbero sorgere conflitti di interessi (si veda l'Elemento E.4 che segue); <p><i>Rischi Legali</i></p> <ul style="list-style-type: none"> -il verificarsi di un ulteriore evento di turbativa o di un evento di turbativa ulteriore opzionale può portare a una rettifica dei Titoli, il rimborso anticipato può avere come conseguenza una differenza tra l'importo pagabile al momento del rimborso programmato e l'importo che si prevede sia pagato al momento del rimborso programmato e, di conseguenza, il verificarsi di un evento di turbativa ulteriore e/o di un evento di turbativa ulteriore opzionale può avere un effetto pregiudizievole sul valore o sulla liquidità dei Titoli; -i Titoli possono maturare spese e oneri fiscali; -i Titoli potrebbero essere liquidati nel caso di illegalità o impossibilità, e tale annullamento o liquidazione potrebbe avere come conseguenza il fatto che un investitore non realizzi un ritorno su un investimento nei Titoli; -una decisione giudiziaria o un mutamento di una prassi amministrativa o una modifica della legge inglese o francese, a seconda dei casi, successivi alla data del Prospetto di Base potrebbero avere un impatto sostanzialmente pregiudizievole sul valore dei Titoli da essi influenzati;

Elemento	Titolo	
		<p><i>Rischi legati al Mercato Secondario</i></p> <p>-l'unico mezzo attraverso il quale un Portatore può realizzare valore dal Titolo prima della sua Data di Rimborso consiste nella sua vendita al prezzo di mercato in vigore al momento dell'operazione in un mercato secondario disponibile, fermo restando che potrebbe non esistere alcun mercato secondario per i Titoli (il che potrebbe significare, per un investitore, dover attendere di esercitare il rimborso dei Titoli, al fine di realizzare un valore superiore rispetto al valore di scambio);</p> <p>-BNP Paribas Arbitrage S.N.C. è tenuta ad agire in veste di market-maker. In tali circostanze, BNP Paribas Arbitrage S.N.C. si adopererà al fine di mantenere un mercato secondario per l'intera durata in vita dei Titoli, in base alle normali condizioni di mercato, e proporrà al mercato prezzi di domanda e offerta. Lo scarto fra i prezzi di domanda e di offerta può variare durante la vita dei Titoli. Tuttavia, durante alcuni periodi, può risultare difficile, impraticabile o impossibile per BNP Paribas Arbitrage S.N.C. quotare prezzi di domanda e di offerta, e durante tali periodi può risultare difficile, impraticabile o impossibile acquistare o vendere questi Titoli. Ciò può dipendere, per esempio, da condizioni di mercato sfavorevoli, prezzi volatili o importanti fluttuazioni dei prezzi, la chiusura o la limitazione di una piazza importante o il verificarsi al suo interno di problemi tecnici quali un malfunzionamento dei sistemi informativi o un'interruzione della rete.</p> <p><i>Rischi relativi ai Sottostanti di Riferimento</i></p> <p>-Inoltre, esistono rischi specifici in relazione ai Titoli che sono legati a un Sottostante di Riferimento (inclusi Titoli Ibridi) e un investimento in tali Titoli comporterà rischi significativi non associati a un investimento in un titolo di debito tradizionale. I fattori di rischio relativi ai Titoli Legati a un Sottostante di Riferimento includono:</p> <p>-nel caso di Titoli Indicizzati, l'esposizione a uno o più indici, eventi di rettifica e turbative di mercato o la mancata apertura di una borsa, che potrebbero avere un effetto negativo sul valore e sulla liquidità dei Titoli.</p> <p><i>Rischi relativi ad alcune specifiche tipologie di prodotti</i></p> <p>I seguenti rischi sono associati a prodotti ETS:</p> <p>Prodotti a leva fissa</p> <p>Gli investitori possono essere esposti a una perdita parziale o totale dell'investimento. Il rendimento dei Titoli dipende dalla performance del/i Sottostante/i di Riferimento e dall'applicazione delle clausole di Estinzione Anticipata Automatica. Inoltre, il rendimento può dipendere da altri fattori di mercato come i tassi di interesse, la volatilità implicita del/i Sottostante/i di Riferimento e il tempo residuo prima della scadenza. L'effetto della leva finanziaria sui Titoli può avere un effetto positivo o negativo.</p>
D.6	Avvertenza relativa ai rischi	<p>Si veda l'Elemento D.3 che precede.</p> <p>Nel caso di insolvenza di un Emittente o qualora lo stesso non sia altrimenti in grado di, o disposto a, rimborsare i Titoli alla scadenza, un investitore potrebbe perdere tutto o parte del suo investimento nei Titoli.</p> <p>Qualora il Garante non sia in grado di, o non sia disposto a, adempiere le proprie obbligazioni ai sensi della Garanzia dovute alla scadenza, un investitore potrebbe perdere tutto o parte del suo investimento nei Titoli.</p> <p>Inoltre, gli investitori potrebbero perdere tutto o parte del loro investimento nei Titoli in conseguenza dei termini e condizioni dei Titoli stessi.</p>

E.2b	Ragioni dell'offerta e utilizzo dei proventi	I proventi netti dell'emissione dei Titoli andranno a far parte dei fondi generali dell'Emittente. Tali proventi potranno essere utilizzati per mantenere posizioni in contratti di opzioni o di <i>future</i> o altri strumenti di copertura
E.3	Termini e condizioni dell'offerta	Il prezzo di emissione dei Titoli è come indicato in C.20.
