## PART B - OTHER INFORMATION

### 1. Listing and Admission to trading - De listing

Application will be made for the Securities to be admitted to trading on the Multilateral Trading Facility of securitised derivatives financial instruments organised and managed by Borsa Italiana S.p.A. (the "**SeDeX MTF**").

### 2. Ratings

The Securities have not been rated.

The rating of the Issuer is A+ from Standard and Poor's.

The rating of the Guarantor is Aa3 from Moody's and A+ from Standard and Poor's.

As defined by Moody's, an "Aa" rating means that the obligations of the Issuer and the Guarantor under the Programme are judged to be upper-medium grade and are subject to low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 3 indicates a ranking in the lower end of that generic rating category.

As defined by Standard & Poor's, an obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the relevant Issuer and Guarantor's capacity to meet its financial commitment on the obligation is still strong. The addition of a plus (+) or minus (-) sign shows relative standing within the major rating category.

Moody's and Standard & Poor's are established in the European Union and are registered under Regulation (EC) No. 1060/2009 (as amended).

### 3. Interests of Natural and Legal Persons Involved in the Issue

Save as discussed in the "*Potential Conflicts of Interest*" paragraph in the "*Risks*" section in the Base Prospectus, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the issue.

### 4. Reasons for the Issue, Estimated Net Proceeds and Total Expenses

#### **Most material risk factors pertaining to the guarantor**

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.

#### **What are the key risks that are specific to the securities?**

#### **Most material risk factors specific to the securities**

There are also risks associated with the Certificates, including:

##### **1. Risk relating to the structure of the Certificates:**

**Leverage Products:** Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of knock-out and automatic early redemption features. Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until redemption. The effect of leverage on the Securities may be either positive or negative.

##### **2. Risk relating to the Underlying and its Disruption and Adjustments:**

Fluctuations in exchange rates are affected by complex political and economic factors, including governmental action to fix or support the value of a currency, regardless of other market forces. If the rate of issuance of exchange rate instruments (such as warrants, securities

or options relating to particular currencies or currency indices) increases, the value of Currency Securities in the secondary market will decline.

Holders of Currency Securities risk losing some or all of their investment if exchange rates of the relevant currency (or basket of currencies) do not move in the direction they had anticipated. Additionally, if Currency Securities are settled in a currency other than the Holder's home currency, the negative effects of exchange rate fluctuations will be greater: exposure to a currency, similar market risks to a direct currency investment and market disruption and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

### **3. Risks related to the trading markets of the Certificates:**

**Factors affecting the value and trading price of Securities:** The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

### **4. Legal risk:**

**Meeting of Holders:** The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Any Manager and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and the Guarantor and their affiliates in the ordinary course of business. Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

### **Quali sono i principali rischi specifici dei titoli?**

#### **Fattori di rischio più significativi specifici dei titoli**

Vi sono rischi associati ai Certificates, fa cui:

##### **1. Rischio relativo alla struttura dei Titoli:**

**Prodotti a scadenza predefinita:** Gli investitori possono essere esposti a una perdita parziale o totale dell'investimento. Il rendimento dei Titoli dipende dalla performance del/i Sottostante/i di Riferimento e dall'applicazione delle clausole di Knock-out e/o di Estinzione Anticipata Automatica. Inoltre, il rendimento può dipendere da altri fattori di mercato come i tassi di interesse, la volatilità implicita del/i Sottostante/i di Riferimento e il tempo residuo prima della scadenza. L'effetto della leva finanziaria sui Titoli può avere un effetto positivo o negativo.

##### **2. Rischio relativo al Sottostante e sua Disgregazione e Rettifiche:**

Le fluttuazioni dei tassi di cambio sono influenzate da complessi fattori politici ed economici, comprese le azioni governative volte a fissare o sostenere il valore di una valuta, indipendentemente da altre forze di mercato. Se il tasso di emissione di strumenti di cambio (quali warrant, titoli o opzioni relativi a valute particolari o indici di valuta) aumenta, il valore dei Titoli di valuta nel mercato secondario diminuirà.

I detentori di titoli in valuta rischiano di perdere parte o tutto il loro investimento se i tassi di cambio della valuta pertinente (o paniere di valute) non si muovono nella direzione prevista. Inoltre, se i Titoli di valuta sono regolati in una valuta diversa dalla valuta nazionale del Detentore, gli effetti negativi delle fluttuazioni dei tassi di cambio saranno maggiori: esposizione ad una valuta, analoghi rischi di mercato ad un investimento valutario diretto e turbative di mercato e il rischio che l'Emittente non fornisca informazioni post-emissione in relazione al Sottostante di Riferimento.

##### **3. Rischi relativi ai mercati di negoziazione dei Titoli:**

**Fattori che influenzano il valore e il prezzo di negoziazione dei Titoli:** Il prezzo di negoziazione dei Titoli può essere influenzato da una serie di fattori tra cui, a titolo esemplificativo ma non esaustivo, il prezzo, il valore o il livello dei riferimenti sottostanti, il tempo rimanente fino alla data di rimborso programmata dei Titoli, l'effettiva o implicita volatilità associata ai riferimenti sottostanti e al rischio di correlazione dei riferimenti sottostanti pertinenti. La possibilità che il valore e il prezzo di negoziazione dei Titoli fluttuino (positivamente o negativamente) dipende da una serie di fattori, che gli investitori dovranno considerare attentamente prima di acquistare o vendere Titoli.

##### **4. Rischi legali:**

**Assemblee:** I termini dei Titoli conterranno disposizioni per la convocazione di assemblee dei portatori di tali Titoli per valutare questioni aventi un impatto sui loro interessi in generale. Tali disposizioni consentono a maggioranze definite di vincolare tutti i portatori, inclusi i portatori che non abbiano partecipato e votato all'assemblea del caso e i titolari che abbiano votato in maniera contraria alla maggioranza.

## **Sezione D - Informazioni fondamentali sull'offerta pubblica dei titoli e/o sull'ammissione alla negoziazione in un mercato regolamentato**
