What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and whether knock-in or knock out features apply. Auto-callable Products include automatic early redemption mechanisms. Depending on the applicable formula, if an automatic early redemption event occurs investors may be exposed to a partial loss of their investment. Investors may be exposed to a partial or total loss of their investment.

2. Risks related to the underlying and its disruption and adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment.

Exposure to shares, similar market risks to a direct investment in an equity, potential adjustment events or extraordinary events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Les valeurs mobilières font-elles l'objet d'une garantie ?

Nature et de la portée de la garantie

Les obligations en vertu de [l'acte de garantie/la garantie] sont des obligations senior préférées (au sens de l'article L.613-30-3-1-3° du Code monétaire et financier) et non assorties de sûretés de BNPP et viendront au même rang que toutes ses autres obligations présentes et futures senior préférées et non assorties de sûretés, soumises à des exceptions qui peuvent au cours du temps être obligatoires en vertu du droit français.

Dans le cas où BNPP fait l'objet d'un renflouement interne, mais sans que BNPP B.V. n'en fasse l'objet, les obligations et/ou montants dus par BNPP, au titre de la garantie devront être réduits afin de prendre en compte toutes les modifications ou réductions appliquées aux dettes de BNPP résultant de l'application du renflouement interne de BNPP par toute autorité de régulation compétente (y compris dans le cas où la garantie elle-même ne fait pas l'objet d'un tel renflouement interne).

Le Garant garantit inconditionnellement et irrévocablement à chaque Titulaire de titres que si, pour une raison quelconque, BNPP B.V. ne paie pas une somme payable par elle ou n'exécute pas une autre obligation relative à une Garantie à la date spécifiée pour ce paiement ou cette exécution, le Garant, conformément aux Conditions, paiera cette somme dans la devise dans laquelle ce paiement est dû en fonds immédiatement disponibles ou, selon le cas, exécutera ou fera exécuter l'obligation concernée à la date d'échéance de cette exécution.

Quels sont les principaux risques spécifiques aux valeurs mobilières ?

Principaux facteurs de risque spécifiques aux valeurs mobilières

Il existe également des risques associés aux Titres, y compris :

1. Risques relatifs à la structure des Titres:

Le rendement de ces Titres dépend de la performance du ou des Sous-Jacents de Référence et de l'application ou non des mécanismes de barrière activante ou désactivante. Les Produits Auto-callable comprennent des mécanismes de remboursement anticipé automatique. En fonction de la formule applicable, si un événement de remboursement anticipé automatique se réalise, les investisseurs peuvent être exposés à une perte partielle de leur investissement. Les investisseurs peuvent être exposés à une perte partielle ou totale de leur investissement.

2. Risques relatifs au Sous-Jacent ainsi qu'à ses Perturbations et Ajustements:

À la différence d'un investissement direct dans une ou des Actions, des Actions Composées, des GDR et/ou des ADR composant la ou les Références Sous-jacentes (collectivement la/les « Action(s) »), un investissement dans des Titres Actions ne donne pas droit aux Titulaires de voter ou de recevoir des dividendes ou des distributions (sauf stipulation contraire dans les Conditions Définitives). Par conséquent, le rendement des Titres Actions ne sera pas le même que celui d'un investissement direct dans la ou les Actions concernées et pourrait être inférieur à celui d'un investissement direct.

Dans le cas de Titres Indexés sur Action : l'exposition à une ou plusieurs actions (y compris des actions qui sont attachées les unes aux autres et qui sont négociées

comme une seule unité (les "Actions Jumelées")), des risques de marché similaires à ceux liés à un investissement direct dans un titre de capital, des cas d'ajustement potentiels ou des événements exceptionnels affectant les actions, un dérèglement du marché ou le défaut d'ouverture d'une bourse, qui peuvent avoir un effet défavorable sur la valeur et la liquidité des Titres.

3. Risques liés aux marchés des Titres:

Le cours des Titres peut être affecté par un certain nombre de facteurs dont, notamment, le prix, la valeur ou le niveau de la ou des Références Sous-jacentes, le temps restant jusqu'à la date de remboursement prévue des Titres, la volatilité réelle ou implicite associée à la ou aux Références Sous-jacentes et le risque de corrélation de la ou des Références Sous-jacentes concernées. La possibilité que la valeur et le cours des Titres fluctuent (de manière positive comme négative) dépend d'un certain nombre de facteurs, que les investisseurs doivent examiner attentivement avant d'acheter ou de vendre des Titres.

4. Risques juridiques:

Les modalités des Titres contiendront des dispositions relatives à la convocation d'assemblées générales des titulaires de ces Titres, afin d'examiner des questions affectant leurs intérêts en général. Ces dispositions permettront à des majorités définies de lier tous les titulaires, y compris ceux qui n'auront pas assisté et voté à l'assemblée concernée et ceux qui auront voté d'une manière contraire à celle de la majorité.
