What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and the capital protection applies only at Maturity.

2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Quels sont les principaux risques spécifiques aux valeurs mobilières ?

Principaux facteurs de risque spécifiques aux valeurs mobilières

Il existe également des risques associés aux Titres, y compris :

1. Risques relatifs à la structure des Titres:

Le rendement de ces Titres dépend de la performance du ou des Sous-Jacents de Référence et la protection du capital ne s'applique qu'à échéance.

2. Risques relatifs au Sous-Jacent ainsi qu'à ses Perturbations et Ajustements:

Les Titres Indice sont liés à la performance d'un indice sous-jacent (un « Indice »), qui peut faire référence à diverses classes d'actifs comme des actions, des obligations, des taux de change ou des données de prix de biens, ou peuvent faire référence à une combinaison de classes d'actifs. Les investisseurs dans des Titres Indice sont exposés au risque d'un large ensemble de circonstances ce qui fait que la performance des actifs sous-jacents de l'Indice n'est pas celle attendue en comparaison avec un investissement dans des titres de créance classiques. Par conséquent, la probabilité que le rendement d'un investissement dans des Titres Indice soit affecté négativement est plus élevée que pour un investissement dans des titres de créance classiques.

L'exposition à un ou plusieurs indices, un cas d'ajustement et de perturbation du marché ou le défaut d'ouverture d'une bourse peuvent avoir un effet défavorable sur la valeur et la liquidité des Titres

3. Risques liés aux marchés des Titre:

Le cours des Titres peut être affecté par un certain nombre de facteurs dont, notamment, le prix, la valeur ou le niveau de la ou des Références Sous-jacentes, le temps restant jusqu'à la date de remboursement prévue des Titres, la volatilité réelle ou implicite associée à la ou aux Références Sous-jacentes et le risque de corrélation de la ou des Références Sous-jacentes concernées. La possibilité que la valeur et le cours des Titres fluctuent (de manière positive comme négative) dépend d'un certain nombre de facteurs, que les investisseurs doivent examiner attentivement avant d'acheter ou de vendre des Titres.

4. Risques juridiques:

Les modalités des Titres contiendront des dispositions relatives à la convocation d'assemblées générales des titulaires de ces Titres, afin d'examiner des questions affectant leurs intérêts en général. Ces dispositions permettront à des majorités définies de lier tous les titulaires, y compris ceux qui n'auront pas assisté et voté à l'assemblée concernée et ceux qui auront voté d'une manière contraire à celle de la majorité.
