SES SIGNS CAPACITY DEAL WITH ALRUYA TO MEET GROWING CONNECTIVITY DEMANDS OF LIBYAN OIL AND GAS INDUSTRY

Luxembourg, 12 March 2014 – SES (NYSE Euronext Paris and Luxembourg Stock Exchange: SESG) announced today that it has signed a capacity deal with Alruya, a leading system integrator and VSAT operator based in Libya, to deliver connectivity to oil and gas fields in the country.

Alruya will utilise the capacity on SES's NSS-7 satellite at 20 degrees West to provide high-speed internet access and voice over IP services over its VSAT network to its corporate customers' offsite oil and gas locations in Libya.

"We are pleased to have found a new partner in SES, which has enabled us to provide seamless connectivity to our customers. Not only is SES's NSS-7 coverage over Libya optimal, but also the professional SES team has made it easy for us to ramp up and double our capacity in the last few months," said Murad Tantush, CEO of Alruya.

"In a vast country such as Libya, which has harsh terrain and limited infrastructure, satellite is seen as the most reliable form of connectivity - and demand for data connectivity is on the increase. We are honoured that Alruya has decided to work with us and we will continue to work closely with them to understand their needs and provide them the capacity they need to grow their expanding business," said Hussein Oteifa, General Manager Middle East at SES.
