

Press release

SES JOINS THE CLINTON GLOBAL INITIATIVE (CGI)

Luxembourg, 24 September 2014 – SES S.A. (NYSE Euronext Paris and Luxembourg Stock Exchange: SESG) announced today that it has become a member of the Clinton Global Initiative (CGI), an initiative of the Clinton Foundation.

At the 2014 CGI Annual Meeting, held in New York City, SES announced its Commitment to Action, in the form of the e-health platform SATMED.

SATMED is a satellite-enhanced, cloud-computing based Telemedicine platform that aims to improve the access to and simplify the use of e-health. SATMED will provide a range of e-health services at different levels: satellite connectivity for remote areas with no internet connectivity, e-health and m-health tools developed with the support of doctors, and tools developed by international communities for providing universal access to e-care, e-learning, e-health administration, and e-health financing. SATMED will also provide access to cloud services for secure data storage, exchange, and data backup.

SES is developing SATMED in close cooperation with several Non-Governmental Organisations (NGOs), namely Friendship, German Doctors, Médecins Sans Frontières, Archemed, and Fondation Follerau Luxembourg. During a pilot phase, the complete system, incorporating satellite terminal equipment and software platform, will be deployed to partner organisations, including NGOs, hospitals, medical universities, and other health care providers that are active in resource-poor areas. Up to 15 satellite terminals will be installed in project locations in Bangladesh, Benin, Eritrea, Guinea, the Philippines, and Sierra Leone. Partner organisations will use SATMED to improve access to medical care, reinforce their medical training programmes, make health management more effective and quality assured, and/or upgrade their collection, management, and visualisation of data.

About SATMED

SATMED is built with the active input from several technical and medical universities and research institutes in Europe; it brings together expertise in the field of e-health, telecommunication and cloud services. Moreover, the project is tailored to the needs of the global health community by the active involvement of NGOs, medical universities and hospitals from Europe, Asia and Africa. Most of the e-health tools that are provided by the platform are open source, developed by international communities and with proven value. Further information under: <http://satmed.lu/>

About SES

SES is a world-leading satellite operator with a fleet of more than 50 geostationary satellites. The company provides satellite communications services to broadcasters, content and internet service providers, mobile and fixed network operators and business and governmental organisations worldwide.

SES stands for long-lasting business relationships, high-quality service and excellence in the broadcasting industry. The culturally diverse regional teams of SES are located around the globe and work closely with customers to meet their specific satellite bandwidth and service requirements.

SES (NYSE Euronext Paris and Luxembourg Stock Exchange: SESG) holds participations in Ciel in Canada and QuetzSat in Mexico, as well as a strategic participation in satellite infrastructure start-up O3b Networks. Further information under: www.ses.com.

About the Clinton Global Initiative

Established in 2005 by former U.S. President Bill Clinton, the Clinton Global Initiative convenes global leaders to create and implement solutions to the world's most pressing challenges. CGI Annual Meetings have brought together more than 180 heads of state, 20 Nobel Prize laureates, and hundreds of CEO's of leading companies, heads of foundations and NGOs, major philanthropists, and members of the media. To date, members of the CGI community have made more than 2,900 commitments, which are already improving the lives of more than 430 million people in over 180 countries

CGI also convenes CGI America, a meeting focused on collaborative solutions to economic recovery in the United States, and CGI University (CGI U), which brings together undergraduate and graduate students to address pressing challenges in their community or around the world.
