

Press release

SES TO TEST BROADCAST REAL MADRID VS. BARCELONA FOOTBALL MATCH IN ULTRA HIGH DEFINITION

LUXEMBOURG, 20 November 2015 -- SES S.A. (NYSE Euronext Paris and Luxembourg Stock Exchange: SESG) announced today that it will test broadcast Saturday's Real Madrid vs. Barcelona football match in Ultra High Definition (Ultra HD) via SES's ASTRA 1L satellite at 19.2 degrees East. The transmission is part of the Ultra HD technical tests being conducted by SES, Movistar+ and other industry partners.

"A test live broadcast of a football match in Ultra High Definition marks another milestone in the introduction of this new technology in Spain, as well as in Europe, and shows the readiness of the Ultra HD ecosystem," said Luis Sahún, General Manager of Spain at SES. "Thanks to satellite and its ability to cost-effectively deliver the best quality content to a large audience, it is only a matter of time before the live broadcast of Ultra HD content becomes part of our daily TV viewing experience."

About SES

SES (NYSE Euronext Paris and Luxembourg Stock Exchange: SESG) is the world-leading satellite operator with a fleet of more than 50 geostationary satellites. The company provides satellite communications services to broadcasters, content and internet service providers, mobile and fixed network operators and business and governmental organisations worldwide.

SES stands for long-lasting business relationships, high-quality service and excellence in the satellite industry. The culturally diverse regional teams of SES are located around the globe and work closely with customers to meet their specific satellite bandwidth and service requirements.

SES holds a participation in O3b Networks, a next generation satellite network combining the reach of satellite with the speed of fibre. Further information available at: www.ses.com.
