

## Press release

### SES ENHANCES CONNECTIVITY FOR GOVERNMENTS AND INSTITUTIONS

*End-to-end services deliver to the growing needs of data-hungry applications*

LUXEMBOURG, 8 November 2016 -- SES S.A. (Euronext Paris and Luxembourg Stock Exchange: SESG) provides breakthrough connectivity solutions to governments and institutions. These organisations rely on connectivity for their increasingly data hungry applications, a need that SES is supplying. SES services are reliable, innovative, secure, high-quality, cost-effective, and customised. These six characteristics are described in detail inside the new SES White Paper, "SES Charts Rising Government Needs".

"In a sector where each situation requires different methods and technology," the White Paper states, "SES tailors its offering to provide the crucial support needed for the important projects of governments and institutions, both regionally and internationally."

"SES is at the epicentre of a suite of companies that take a global approach for product development and customer service," the White Paper explains, "forming a powerful collection of capacity, services, and solutions for the government and institutional sector."

"Together, the unique capabilities of SES detailed above make it distinct in the government and institutional arena," the White Paper concludes, "where it is not only responding to government needs but shaping the future of demand with services that go beyond capacity, and innovations that redefine possibility."

## About SES

SES (Euronext Paris and Luxembourg Stock Exchange: SESG) is the world-leading satellite operator, with more than 50 geostationary satellites (GEO) and, through its subsidiary O3b Networks, 12 medium Earth orbit satellites (MEO). Focusing on value-added, end-to-end solutions in four key market verticals (Video, Enterprise, Mobility and Government), SES provides satellite communications services to broadcasters, content and internet service providers, and mobile and fixed network operators, as well as business and governmental organisations worldwide. SES's fleet includes the ASTRA satellite system, which has the largest Direct-to-Home (DTH) reach in Europe. Through its ownership of O3b Networks, SES significantly enhances existing data capabilities, and is the first satellite provider to deliver a differentiated and scalable GEO-MEO offering worldwide. Another SES subsidiary, MX1, is a leading media service provider and offers a full suite of innovative digital video and media services.
