Unleashing the Potential of an Empowered World

SES issues new White Paper - Global connectivity from SES Networks is maximising opportunities for people and businesses everywhere

Luxembourg, 11 September 2017 – SES Networks, the dedicated SES business providing global managed data services, opens a world of opportunities with the approach outlined in the new SES White Paper “Transcending Connectivity”.

The SES Networks business model described in the White Paper, combined with the revolutionary new O3b mPOWER system (click [here](#) for more information), will ensure that customers always get the best experience.

“The creation of SES Networks not only benefits SES customers, but is also contributing to meaningful improvements in the lives of millions of people around the world,” the White Paper explains. “By making reliable and high-performance connectivity accessible regardless of location or ground infrastructure, the digital divide will decrease exponentially.”

SES Networks delivers flexibility and scalability by tailoring solutions for each sector it serves, consulting with customers, managing the quality of experience very closely, and providing intelligent connectivity solutions. It does this using a unique high-performance satellite service that combines its Geostationary Earth Orbit (GEO) satellites with its Medium Earth Orbit (MEO) O3b fleet. The O3b mPOWER system will build on this foundation and enable SES Networks to deliver cloud-scale connectivity and high power data services to users all around the world.

“SES Networks delivers networked communication services where none existed before,” the White Paper details. “This brings three positive outcomes - breaking limitations on performance, enabling businesses globally to participate in the digital economy, and empowering people and governments to accelerate development.”

About SES

SES is the world-leading satellite operator and the first to deliver a differentiated and scalable GEO-MEO offering worldwide, with more than 50 satellites in Geostationary Earth Orbit (GEO) and 12 in Medium Earth Orbit (MEO). SES focuses on value-added, end-to-end solutions in two key business units: SES Video and SES Networks. The company provides satellite communications services to broadcasters, content and internet service providers, mobile and fixed network operators, governments and institutions. SES's portfolio includes ASTRA, O3b and MX1, a leading media service provider that offers a full suite of innovative digital video and media services. SES is listed on the Euronext Paris and Luxembourg Stock Exchange (ticker: SESG). Further information available at: www.ses.com
