U.S. DoD Awards USEUCOM BPA to SES Space & Defense

Under a multi-year Blanket Purchase Agreement, SES Space & Defense will provide multi-orbit, multi-band commercial satellite services to USEUCOM leveraging an agnostic SATCOM network

Reston, Va., 9 December 2024 – SES's wholly-owned subsidiary, SES Space & Defense, has been awarded a five-year Blanket Purchase Agreement (BPA) through Space Systems Command (SSC) with the help of the United States Space Force's Commercial Satellite Communications Office (CSCO) with a ceiling value of USD 117 million in support of the United States European Command (USEUCOM) delivering multi-orbit, multi-band satellite capabilities.

To meet enduring and emerging mission requirements in the USEUCOM Area of Responsibility (AOR), SES Space & Defense partnered with several industry-leading players to provide managed service using UHF, L, C, X, Ku and Mil-Ka bands in the USEUCOM Region. The company will also provide Risk Management Framework-accredited commercial teleport and terrestrial transport backhaul services to Government Entry Points (GEP). Under the BPA, SES Space & Defense will deliver program management support, bandwidth management, network monitoring, and the opportunity to procure ancillary equipment such as remote Very Small Aperture Terminals (VSATs).

"This BPA will accelerate access to acquiring COMSATCOM services for the DoD in the USEUCOM Area of Responsibility region," said David Fields, President and CEO, SES Space & Defense. "To support the DoD needs we have assembled a team comprised of the best in the industry to deliver multi-band, multi-orbit COMSATCOM capabilities that provide alternate SATCOM paths for greater network resiliency and flexibility required to achieve mission success."

About SES Space & Defense

SES Space & Defense is a wholly-owned subsidiary of SES and is exclusively focused on building, managing, and supporting the most advanced satellite network solutions for the U.S. Government. SES Space & Defense uses a proven multi-operator network integration and management capability, a broad global terrestrial network, as well as access to SES's multi-orbit satellite fleet. It also offers U.S. Department of Defense customers the essential tools in cybersecurity for mission-critical operations, coupled with a proven track record in governance and compliance. SES Space & Defense operates under a proxy board, enabling it to support classified projects, and it has participated in the U.S. Government satcom sector for nearly five decades. Further information can be found at: www.sessd.com.

About SES

SES has a bold vision to deliver amazing experiences everywhere on Earth by distributing the highest quality video content and providing seamless data connectivity services around the world. As a provider of global content and connectivity solutions, SES owns and operates a geosynchronous orbit fleet and medium earth orbit (GEO-MEO) constellation of satellites, offering a combination of global coverage and high performance services. By using its intelligent, cloud-enabled network, SES delivers high-quality connectivity solutions anywhere on land, at sea or in the air, and is a trusted partner to telecommunications companies, mobile network operators, governments, connectivity and cloud service providers, broadcasters, video platform operators and content owners around the world. The company is headquartered in Luxembourg and listed on Paris and Luxembourg stock exchanges (Ticker: SESG). Further information is available at: www.ses.com
