To support its expansion and gather together in the same spot all Parisian staff working for AKKA Product Engineering and Process, AKKA IT and Systems and AKKA I&S (formerly Coframi), AKKA Technologies has chosen Levallois as the site of its new building

These new premises with a surface area of 2,880 sq.m will house the 150 Paris staff members that are today working on three different sites: Galilée (Paris 16), Saint Mandé and Suresnes.

As the jobsite is progressing as planned, AKKA teams are scheduled to move into the new building by June 2009.

2008 Objectives have been confirmed

2008 has delivered the results expected in the roadmap. AKKA Technologies can therefore confirm that it is on track to achieving the following objectives:

- **Revenue in excess of 380 M€ for the full year,**
- **A growth rate (excluding Coframi) above 13%.**
- **Income from operations should be nearly similar to that achieved in the first half of 2008**.

Next Press Release: Revenue 2008, 12 February 2009 after the closing session at the Paris Bourse

AKKA Technologies, an engineering and technology consultant, provides guidance to key accounts in the industrial and service sectors in executing the different stages of their project, from R&D to study to mass production.
AKKA Technologies, through its expertise in complementary business lines, delivers added value to its clients in sectors such as automotive, aeronautics, space/defense, consumer electronics, telecommunications, chemicals, pharmaceuticals, steelmaking, energy, rail, naval activities and services.
Thanks to its highly mobile teams and international positioning, AKKA Technologies is involved in cutting-edge projects worldwide.

As of 30 September 2008, the Group employed 5,400 staff and over 40 sites in France, Belgium, Italy, UK; Switzerland Morocco and Rumania.
