About METabolic EXplorer - www.metabolic-explorer.com

METabolic EXplorer is a biological chemistry company which was incorporated in 1999. Its goal is to help industrial businesses deal with the heralded "end of oil", so that they can continue to manufacture but in a sustainable way.

Based on the tried and tested principle of industrial fermentation, METabolic Explorer's solutions circumvent the problems posed by today's burdensome and expensive petrochemical processes via the use of a wide range of renewable, sustainable raw materials. By optimizing the metabolic yield of non-pathogenic bacteria in a contained, controlled environment, the company facilitates the production of chemical compounds used in a wide range of everyday goods (paints, solvents, adhesives and textile fibres) and industrial products (such as surgical thread and animal feed).

METabolic EXplorer is currently focusing its alternative biological solutions (implemented by the development of renewable, fermentation-based bioprocesses) on the production of five compounds that together have an estimated, annual, end-market value of €11 billion. The company's strategy will be implemented worldwide via limited-exclusivity industrial alliances and joint-ventures with key players in the chemicals industry.

METabolic Explorer, based in Clermont-Ferrand, France, is listed on Euronext Paris (Euronext C, METEX) and features in the SBF 250 and CAC Small 90 indexes.
