

Press Release – December 16th, 2013

GRID CONNECTION OF THE 1ST WIND FARM BUILT BY GLOBAL ECOPOWER

Aix-en-Provence (France), December 16th, 2013.

Global EcoPower (FR0011289198 - ALGEP), a turnkey constructor of power plants using renewable energy sources, is happy to announce the connection to the ERDF grid of the wind farm "La Guenelle" in the Marne department, with an installed capacity of 22 MW.

First wind farm built by Global EcoPower on behalf of third parties, the power plant of "La Guenelle" is located in the municipalities of Mairy-sur-Marne and Togny-aux-Bœufs in the Marne department (51). It consists of 11 Vestas V90 turbines of 2MW each. The mounting phase of all turbines was completed in time and the wind farm was connected to the grid on December 16th, 2013.

The plant of "La Guenelle" will produce 54 GWh / year, corresponding to the electricity consumption of 21,000 households (excluding heating) and allowing to avoid the emission of 14,000 tons of CO₂ per year.

The plant will be delivered to the project's owner, the company WP France 1, owned by the German group Leonidas Associates, at the end of the industrial commissioning which lasts for about 2 months.

Jean-Marie Santander, CEO of GEP:

"The grid connection of the first wind farm built turnkey by GEP marks a new success of the group's strategy of deployment in wind power and confirms the ability of our teams to complete projects, from construction to operation.

Two additional wind farms, currently under construction, will be connected to the grid in 2014. In addition, GEP aims for the realization of new operations with the objective to keep for its own account a part of the plants built, in order to own a portfolio of 100 MW wind capacity by 2019."

About Global EcoPower

Global EcoPower (GEP) is a "turnkey" constructor of power plants using renewable energies. GEP is listed on the NYSE Alternext Paris Market of NYSE Euronext (ISIN code: FR0011289198 - mnémo: ALGEP).
