

Store Electronic Systems (SES) and RGIS partner to provide next generation retail solutions

Paris, June 10th, 2014 – SES, the leader in Electronic Shelf Labeling systems (ESL) for retailers worldwide, and RGIS, LLC, the global market leader in inventory and data collection, announced a new global partnership on the first day of the FMI Connect conference in Chicago.

“Retailers are looking to move further into the digitization and automation of store operations, and the RGIS-SES partnership will accelerate the adoption of these advanced solutions,” said Charles Jackson, VP Strategy & Business Development & CEO SES America. The partnership will focus on the key operational areas that omnichannel retailers need – reducing out-of-stocks (OOS), real-time product availability, and improving in-store customer experiences. Advanced functionality such as geolocation and stock picking is based on SES’ new interactive ESL Graphic-Tag range.

“Both companies are the best in the industry in their core areas of expertise and serve many top-tier retailers,” said JD Bouchard, SVP Canada and Global Specialty Services. He added that *“It is a very logical evolution that these two companies are partnering to support the next generation of retailer needs. In addition to finding new ways to work through SmartSpace®, our state-of-the-art macro space solution, RGIS will provide professional installation services for SES’s Electronic Shelf Labels to ensure rapid and efficient installation across a retailer’s entire footprint.”*

The partnership is global in scope and extends to all segments of retail, including both grocers and non-food retailers.

About RGIS

Turn your next inventory event into an opportunity to get smarter with your space. RGIS takes you beyond the count with integrated inventory services that include store surveys, space management, store remodels and resets, RFID solutions and asset optimization. With proven successes in all aspects of retail, healthcare and manufacturing inventory, it’s no surprise that more organizations, in more places, trust RGIS to provide the information and insight they need to fully understand their assets and make better business decisions.

About Store Electronic Systems

Store Electronic Systems is the leader in Electronic Shelf Labeling systems (ESL) for large-scale food and non-food retailers. The Group designs, markets and installs all the system’s components (software and communication platform, displays, mounts), thus providing clients with a turnkey solution. The range of products and services offered by SES allows retailers to manage pricing dynamically, while significantly improving store productivity and developing new contactless uses for consumers.
