

Press release

Aix en Provence, July 6, 2015

THEOLIA keeps on growing and orders wind turbines for one of its projects in France

As previously announced, THEOLIA is actively pursuing the implementation of its project portfolio in France.

Last week, the Group signed a contract for the purchase of 9 wind turbines for the Chemin Perré project, located on the Nogentais community of communes, on the territory of the towns of Montpothier and Villenauxe-la-Grande, in the Aube French department. The contract also includes associated maintenance services, securing the costs of maintenance over fifteen years.

The unit capacity of the selected wind turbine model reached 2 MW, bringing the total installed capacity of the wind farm to 18 MW.

The future wind farm will generate green electricity that will cover the domestic electricity needs of approximately 21,000 households each year.

Construction works will start in the second half of 2015 and commissioning is expected during the second half of 2016.

About THEOLIA

THEOLIA is an independent producer of wind energy, active over the entire wind value chain. The Group develops, builds and operates wind farms in four countries: Germany, France, Morocco and Italy. In total, the Group operates 1,192 MW for its own account and for third parties.
