DBT selected to supply fast charging stations to regional utility *Syndicat Départemental d'Énergie d'Ille-et-Vilaine* in conjunction with Bouygues Energies & Services

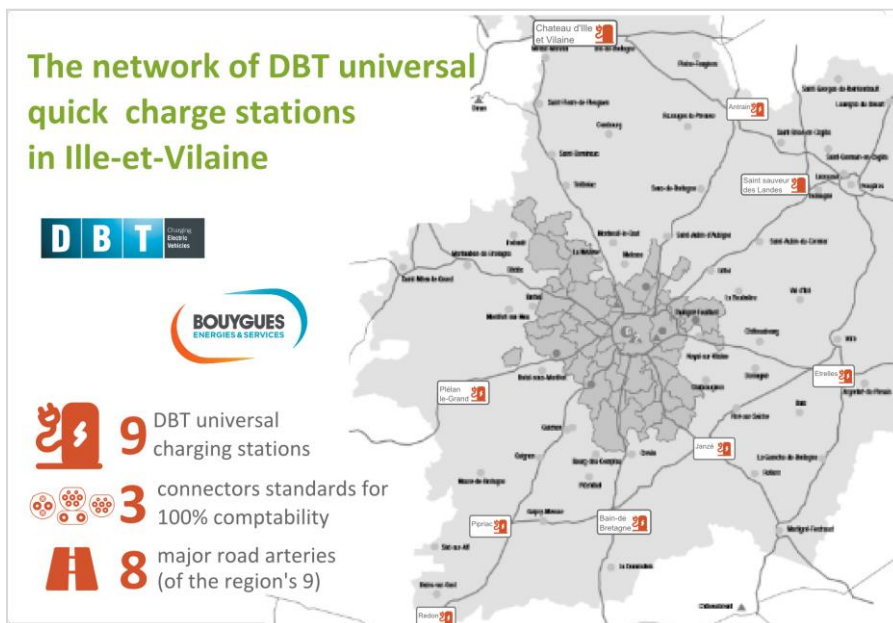

DBT (ISIN: FR0013066750 – Ticker: ALDBT), the European market leader in quick charge stations for electric vehicles, will supply the Département of Ille-et-Vilaine with nine universal quick charge stations by the end of 2016, in partnership with Bouygues Energies & Services.

Nine DBT “béa”s

The regional utility SDE35¹ has launched a plan to deploy electric vehicle charging stations, naming them “BÉA”s (“bornes électriques pour automobiles”).

It has selected DBT to supply 9 universal quick charge stations, in conjunction with Bouygues Energies & Services which will provide installation and supervision services.

The DBT stations will allow a user to fully charge their vehicle in less than 30 minutes using any of the three standard connectors available: COMBO CCS, CHAdeMO or AC Z.E.Ready. In keeping with its strategy, DBT is guaranteeing 100% compatibility with all electric vehicles currently on the market.

The charging stations will be custom-branded and will be strategically located on the Département's major road arteries.

1 Syndicat Départemental d'Énergie d'Ille-et-Vilaine

Innovative charging stations powered by 100% renewable electricity

Thanks to DBT technology and the Alizé supervision system provided by Bouygues Energies & Services, users will be able to:

- log in, and charge their vehicle using their BÉA account card;
or directly via the mobile app Alizécharge (available from July 1, 2016);
- see the availability of charging stations in real time;
- book a slot remotely.

The regional utility *Syndicat départemental d'énergie d'Ille-et-Vilaine* buys the electricity to power the charging stations from Enercoop. Enercoop is a cooperative that sources power exclusively from producers of renewable electricity.

Hervé Borgoltz, DBT's Chairman & CEO, comments on this news:

"This new commercial success confirms the pertinence of our strategy which is focused on rolling out universal quick charge stations. With this infrastructure we will be able to widen the use of electric vehicles, regardless of vehicle make and connection standards, and not just in major urban centres. This message was positively echoed at the last Conference of Mayors and Local Authorities and confirms our highly favourable prospects going forward."

Marc Paboef, Services Development Officer, North-West Region, at Bouygues Energies et Services, says:

"Bouygues Energies & Services has some 10,000 charging stations installed or being installed across France. And at the core of its offer is ease of use: it has developed a comprehensive suite of services, from network engineering to various options for operating them. Twenty-one networks in France have now put their trust in Bouygues to offer users station-geolocation, booking, easy-payment, and subscription services."

ABOUT BOUYGUES Energies & Services

A Bouygues Construction subsidiary, Bouygues Energies & Services offers integrated energy, digital and service solutions. It serves public and private clients in the energy network, transport and digital infrastructure sector, as well as in the tertiary and industrial sectors. It designs, installs, maintains and operates bespoke technical systems that enable its clients to deliver quality living and working environments for users while controlling their energy consumption over the long term. Bouygues Energies & Services employs 13,000 people in France, the UK, Switzerland, Africa and Canada. It generated EUR 2.3 billion in sales in 2015. The market leader in electric mobility in France, Bouygues Energies & Services has installed 5,500 of the country's total 9,400 electric vehicle charging stations, and will operate several hundred of them in 2016.

ABOUT DBT

Founded in 1990 by Hervé Borgoltz, DBT Group is a recognized player in professional electrical equipment (access control terminals, power distribution terminals, current transformers) and is the European leader in quick charge stations for electric vehicles.

The Group designs, builds and markets a comprehensive range of charging stations, among the most efficient and broadest ranges in the market, for every type of use, from normal charging (3 to 8 hrs), to semi-fast (1 to 3 hrs) and quick charging (20 to 30 mins). DBT has an installed park of more than 16,500 charging stations including 1,697 quick-charge terminals, and 450 active customers including Auchan, Autogrill, BP, EDF, Eurotunnel, Ikea, Kiwi, McDonald's, Nissan, Sodetrel, the cities of Bordeaux, Paris, Neuilly-sur-Seine, etc.

Recognized as an "Innovative Enterprise" by Bpifrance, DBT generated €17.2 million in revenues in 2014/15. Based in Douai, the Group has 62 employees.
