GENTICEL APPOINTS EUMEDIX AS STRATEGIC ADVISOR TO SUPPORT COMPANY'S ACCESS TO INNOVATIVE DRUG CANDIDATES

Favorable Safety Profile of Genticel's Technology observed at 18 Months in DSMB Review of Phase 2 Trial with GTL001

Genticel (Euronext Paris & Brussels: FR00011790542 – GTCL), a clinical-stage biotechnology company and developer of innovative immunotherapies to prevent cancers caused by the human papillomavirus (HPV), today announced that it has engaged Eumedix, a leading European corporate finance specialist, as strategic advisor.

In accordance with the direction announced last January, Eumedix will support Genticel in evaluating its strategic options, with a particular focus on facilitating the Company's access to innovative drug candidates. Genticel will be carrying out this process in parallel with the assessment of its current HPV program.

The Company also announced that the independent Data Safety and Monitoring Board (DSMB) found no safety concerns in the ongoing phase 2 trial with GTL001, which is an important result for its partnership with Serum Institute of India Ltd in other vaccine applications.

Benedikt Timmerman, PhD, Chief Executive Officer of Genticel concluded: *"Eumedix assisted Genticel during our IPO in 2014 and we are very pleased to rely again on its expertise in the final stages of acquiring advanced drug development assets with the potential to drive new growth in Genticel."*

About Eumedix

About Gentigel

Aiming to solve a public health issue.

Among the 300 million women around the world currently infected with HPV, 500,000 new cases of cervical cancer are identified each year and 275,000 women succumb to the disease. 70% of cervical cancer cases are caused by 2 HPV types and Gentigel aims to eliminate them at an early stage with GTL001, its first-in-class immunotherapeutic candidate. GTL001 clinical efficacy is being evaluated in a 24-month proof of concept Phase 2 trial in Europe.

Offering a promising technological platform.

Gentigel's versatile platform, Vaxiclase, is well suited for the development of immunotherapies against multiple infectious or cancerous diseases. A partnership on the use of Vaxiclase has already been established with Serum Institute of India Ltd (SILL), the largest producer of vaccine dose worldwide. This agreement covers territories outside of the USA and Europe, and could generate up to \$57 million in revenues for Gentigel, before royalties on sales, It will enable SILL to develop acellular multivalent combination vaccines against a variety of infectious diseases, including whooping cough.
