DBT unveils the 1st 150 kW universal ultra-fast charging station at the Paris Motor Show

DBT (ISIN Code: FR0013066750 – Ticker: ALDBT), the European leader in fast-charging stations for electric vehicles, has presented a new generation of terminals, making it the first manufacturer on the continent to offer a multi-standard ultra-fast charging station.

The NG150, an innovative new charger that can deliver up to three times the output of current fast-charging stations, was unveiled by the French SME at the 2016 Paris Motor Show from Thursday 29 September. Drawing on twenty-five years of experience and expertise, this latest generation of stations is ahead of its time and market.

Responding to recent announcements by car manufacturers and their promise of even greater autonomy for tomorrow's electric and hybrid vehicles, DBT has risen to the challenge and, from spring 2017, will deliver a new range of charging stations that are more powerful, faster, and more compatible with existing and future models alike.

Hervé Borgolz, Chairman and Chief Executive Officer of DBT, said: *"The project we presented during our IPO is now well underway and today we are pleased to be able to unveil the latest addition in a new range of flagship products that will ensure we retain our position as a front-runner on the electric vehicles market. The deployment of ever faster charging stations that are capable of recharging a battery in under 20 minutes is crucial for the development of electric vehicles. With this new range of products, DBT is able to anticipate the arrival of a new generation of electric vehicles with high-capacity batteries that guarantee more miles of range for less charging times. We are very excited to be able to present this extremely innovative product to our clients and partners."*

3 X THE CAPACITY, 3 X THE SPEED

Universal, modular energy

The NG150 supercharger can deliver up to 150 kW per vehicle or up to 50 kW to 3 vehicles at the same time. It is already compatible with all electric vehicles on the market, whatever the charging standard used: DC charging, CHAdeMO and COMBO CCS, AC alternative charging.

- Developed by DBT, designed for operators and users

Capitalising on its unique experience of more than 1,800 fast-charging stations across Europe, DBT has also drawn on its expertise in managing charging infrastructures to equip the NG150 with cutting-edge functionalities:

- constantly plugged-in;
- intuitive user interface which is easy to use;
- touch screen;
- secure bank payments;
- intelligent management for charging systems.

- Remote control

DBT exploits all of the technology available to allow network managers even greater interaction with its stations, and guarantees their reliability with advanced preventative maintenance programmes:

- display of real-time performance indicators;
- remote control and updates;
- simplified maintenance;
- connected services;
- technical assistance and maintenance service managed by SERVICE DBT.

- Universal

DBT worked closely with the CHAdeMO and CharIN charging associations and car manufacturers before embarking on the design of its latest range of ultra-fast charging stations to ensure the compatibility of new products with current and future models.

- Made in France

All DBT charging stations are developed and manufactured at the industrial facility in Douai in the north of France, and 95% of its industrial partners and suppliers are French or European.

PARIS MOTOR SHOW PREMIERE

The NG150 will be given an exclusive premiere at the Paris Motor Show at the Porte de Versailles from 1 to 16 October 2016.

Come and visit DBT which will be sharing a stand with AVERE in Pavillon 3.

ABOUT DBT

Set up in 1990, DBT is an industry reference in professional electrical equipment (access control bollards, power distribution units, current transformers) and the European leader in fast-charging stations for electric vehicles.

The Group designs, manufactures and sells one of the most high-performance and comprehensive ranges of charging stations on the market, with standard (3-8 hours), semi-fast (1 to 3 hours) and fast-charging (20 to 30 minutes) terminals that are adapted to all types of uses and needs. With a fleet of over 17,000 charging stations, 1,876 of which are high-speed stations, DBT serves more than 450 active clients including Auchan, Autogrill, BP, EDF, Eurotunnel, Ikea, McDonald's, Nissan, Sodetrel, and the Bordeaux, Paris and Neuilly-sur-Seine town councils, etc.

Awarded the label of "Innovative Company" by Bpifrance, DBT posted turnover of €10.0 million in 2015/16. Based in Douai, the Group employs 74 members of staff.
