Press Release - Paris, March 22, 2018

## Paragon ID secures £2.2m order to supply Oyster Cards

**Paragon ID (Euronext Paris - FR0011980077 - PID)**, the leading provider of identification solutions for Transport, e-ID, Traceability and Brand Protection, has secured a new contract to manufacture Oyster Cards for Transport for London (TfL), the government body responsible for the transport system in Greater London. The contract, worth £2.2 million, will see the business continue to produce the iconic smart cards throughout 2018.

Oyster cards are rechargeable smart cards used to easily pay for journeys on bus, Tube, tram, DLR, London Overground, TfL Rail, River Bus and most National Rail services in London. Millions of journeys are made daily using the Oyster Card<sup>1</sup>, making it one of the most popular for anyone wishing to access public transport in the capital.

Paragon ID is one of few ITSO certified smart ticketing specialists in the country with manufacturing facilities in the UK and across Europe. The company offers a complete range of solutions (magnetic and contactless tickets, smart cards, secure personalisation services, terminals, mobile applications, etc.) for the public transport sector, guaranteeing security and speed at access control points in hundreds of cities worldwide.

Paragon ID supports transport operators in their gradual migration from traditional paper-based tickets to RFID enabled smart products such as smart tickets, smart cards or Host Card Emulation (HCE) solutions for smartphone-based ticketing.

### **Julien Zuccarelli, Julien Zuccarelli, Paragon ID CEO, says:**

« We are very pleased to continue our relationship with Transport for London and to count them among our growing list of customers in the mass transit sector. Oyster Cards are one of the greatest examples of smart ticketing technology in the world, and through this success, we are reaffirming our leadership position in this sector. »

---
