

PRESS RELEASE DECEMBER 16, 2021

STRATEGIC PARTNERSHIP WITH EUROFINS FOR GENETIC TESTING

Villejuif, France, December 16, 2021, 5:45 p.m. - PREDILIFE (Euronext Growth: ALPRE FR0010169920), a specialist in innovative disease risk prediction solutions for personalised medicine, announces that it has signed a contract with EUROFINS for its genetic tests.

EUROFINS will perform genotyping of saliva samples collected by PREDILIFE. The samples provided will be analysed using Illumina chips, the world leader in the field, which can analyse between 700,000 and 1 million polymorphisms per sample. PREDILIFE will analyse these data to estimate the individual risks of the main pathologies, starting with cancers : breast, lung, colon, prostate, melanoma and cardio vascular diseases.

EUROFINS's industrial capacities can allow the analysis of several thousands of patients each month, thus accompanying the growth of PREDILIFE.

« I am delighted to have the support of EUROFINS in this medical adventure. The deployment of our predictive tests will be able to rely on the industrial capacities and the excellent brand image of this laboratory » concludes Stéphane Ragusa, CEO and founder of PREDILIFE.

About PREDILIFE

PREDILIFE is a pioneer in the design and development of predictive tests, which can enable each individual to define his or her risk profile for the occurrence of serious diseases. It uses artificial intelligence methods applied to clinical, genetic and imaging medical data. PREDILIFE markets MammoRisk® in Europe, a breast cancer risk prediction test and a multi-pathology prediction assessment.
