

Business update and outlook

The Plastivaloire Group provides an update on its business outlook in an environment that is evolving more than ever:

- With a still unfavourable and uncertain global environment for the automotive industry, the Plastivaloire Group is adjusting its business outlook for the financial year. The Group now expects revenue for the 2024-2025 financial year to be around €665m (compared with "around €700m" initially, i.e. a variation of -5%);
- In this context, the Group is pursuing its adaptation measures in order to limit the impact of the slowdown in activity on its profitability. The Group has therefore announced the finalisation of the job-saving plan announced last November, which will be accompanied by the closure of the Langeais (France) test centre site. Several employees have accepted internal mobility proposals, which will limit the number of employees concerned to less than 15.

The Plastivaloire Group is keeping a close eye on developments in the US tariff situation, although it is not yet possible to measure the impact, particularly on global automotive production. The Group points out that it is already present in the United States, with 2 plants located in Kentucky and Michigan to serve the local market.
