

## Sharp improvement in business in third-quarter 2024-2025 (up 10.7%)

### Full-year outlook revised upwards

In € million <i>Unaudited figures</i>	2023-2024 <sup>1</sup>	2024-2025	Change
<b>1<sup>st</sup> half</b>	<b>365.8</b>	<b>346.0</b>	<b>-5.4%</b>
<b>3<sup>rd</sup> quarter</b>	<b>169.5</b>	<b>187.6</b>	<b>+10.7%</b>
<b>9 months</b>	<b>535.2</b>	<b>533.6</b>	<b>-0.3%</b>

**Plastivaloire Group posted strong third-quarter 2024-2025 (April-June 2025) results, with turnover up by 10.7% to €187.6 million (up 13.1% at constant exchange rates).**

**This better-than-expected performance is due to brisk production rates in both the Automotive and Industries divisions and demonstrates the Group's resilience in a persistently challenging economic climate.**

Quarterly turnover for the **Automotive** division (parts and tooling) amounted to €160.0 million, up 10.8%, reflecting the confirmed ramp-up of new programs. Following on from the previous quarter, the **Industries** division achieved more positive momentum, recording turnover of €27.7 million, up 10.4%. The Automotive and Industries divisions accounted for 85.3% and 14.7% of the Group's third-quarter turnover, respectively.

By geographic region, Europe<sup>2</sup> represented turnover of €162.8 million (up 11.3% or 12.0% at constant exchange rates), while the Americas (United States and Mexico) returned to growth, posting quarterly turnover of €24.9 million (up 6.9%, or 20.1% at constant exchange rates).

**The solid third-quarter performance enables the Group to offset the delay recorded at the start of the financial year, bringing nine-month turnover to €533.6 million, virtually unchanged from the previous year (down 0.3%) and grew slightly by +0.8% at constant exchange rates.**

**Automotive** division turnover was virtually stable (up 0.2% year-on-year) over the nine months, at €445.4 million. The **Industries** division limited its decline to 2.8% over the nine months to €88.3 million, with a positive trend over the last two quarters. The Automotive and Industries divisions represented 83.5% and 16.5% of the Group's nine-month turnover, respectively.

<sup>1</sup> Restatements for 2023-2024 concern the reclassification of the businesses sold in 2024 as discontinued operations, for comparability reasons.

<sup>2</sup> Including activities in Tunisia and Turkey.

Turnover in Europe was up 1.2% over the first nine months, amounting to €467.2 million (up 1.5% at constant exchange rates). Turnover in the Americas region (United States and Mexico) continues its downward trend, totaling €66.4 million (down 9.8%, or 3.4% at constant exchange rates).

### **Full-year outlook revised upwards**

Taking into account the solid performance in the third quarter and the production rates announced by customers, Plastivaloire Group is revising its 2024-2025 turnover target upwards to around €690 million (vs. “around €665 million” previously). Plastivaloire anticipates an annual EBITDA margin in excess of 8% (vs. “around 8%” announced previously). The Group remains vigilant and is continuing its efforts to adapt its cost and financing structure to its business level.

**Antoine Doutriaux, Chief Executive Officer of Plastivaloire Group**, said: “Despite the persistently sluggish economic climate, we achieved a good third quarter, marked by a sharp increase in business for both the Automotive and Industries divisions. This performance is a reflection of our positioning on promising programs. We anticipate that our business should hold up well this year in a still uncertain environment, and that our EBITDA margin will improve. The whole Company remains fully focused on strengthening our long-term economic fundamentals.”
