

CBI continues to implement its ACE strategy during February 2026

- **In February, measured in Bitcoin, the yield from mining servers remained strong compared to the prior month, reflecting stable network conditions and continued operational optimization**
- **With Bitcoin trading at around \$70,000, the annualized return is in the range of 7% to 10%, offering attractive returns despite the persistent volatility of the Bitcoin price**
- **Given the returns obtained, CBI has decided to prioritize Bitcoin mining in the short term, while working with Blockware Solutions on a new activity to extend the mining platform to server rentals for artificial intelligence**

Paris, France, March 9, 2026, at 8:00 a.m. CET (CBI, Euronext Growth Paris: FR0014007LWO – ALCBI; OTCQB: CBIPF) – CRYPTO BLOCKCHAIN INDUSTRIES (“CBI”) continues to implement its ACE strategy during February 2026. The performance of mining servers, measured in bitcoins, remains solid, reflecting the effectiveness of the group's operating model in a still volatile market environment. With the price of bitcoin hovering around \$70,000, the annual return on mining is in the range of 7% to 10%. CBI is maintaining its policy of holding onto Bitcoins (“hodl”) in order to preserve its exposure to a potential market rebound. CBI reaffirms its ambition to continue the gradual expansion of its server fleet, adding servers dedicated to artificial intelligence.

In February 2026, Crypto Blockchain Industries (CBI) continued to leverage the strength and reliability of its Bitcoin mining infrastructure, supported by the consistent implementation of its operational plan. Measured in Bitcoin, server production remained at a high level compared to January 2026, benefiting from network momentum and continuous efficiency improvements.

Measured in US dollars, the annualized return remains in the range of 7% to 10% for a Bitcoin price of around \$70,000. This performance reflects ongoing control of operating costs, the energy efficiency of the deployed infrastructure, and the effectiveness of optimization measures implemented across mining operations. CBI considers this level of annualized return to be in line with its long-term objectives in the context of a volatile crypto-asset environment.

This profitability is likely to increase or decrease depending on the price of Bitcoin, which directly influences the value of commissions received, the cost of electricity, and the Bitcoin network difficulty rate, which measures the complexity of mining a Bitcoin block. The resale price of servers is not taken into account in these estimates.

Composition of the portfolio of crypto-assets and similar assets, including mining servers

CBI's portfolio of crypto-assets and related assets remains significant, with a goal of steady accumulation. This portfolio consists mainly of bitcoins produced by its mining activities, as well as assets related to production infrastructure, such as mining servers. It also includes fiat currency reserves, which the group plans to allocate in accordance with its capital deployment policy.

In line with the ACE (Acquire, Create, Earn) strategy, this approach aims to provide CBI with increased capabilities to pursue its international expansion, strengthen its sustainable credibility in the blockchain ecosystem, and consolidate its strategic presence in priority markets, particularly in North America.

Tokens created by CBI itself are not valued and kept for -0-.

It should be noted that certain listed crypto-assets are held for periods exceeding twelve months, in line with a deliberately long-term investment perspective.

February 28, 2026	Quantities	Unit Price	Total Valuation
Main crypto-assets and assimilated			
Bitcoin (*)	30.94	\$67,270	\$2,081,290
Bitcoin (Mining rewards / Server sales)	12.87	\$67,270	\$865,761
Bitmain Asics & S21 servers (**)	724	n/a	\$4,415,720
BNB (CEA Industries shares - Ticker BNC)	49,505	\$3.75	\$185,644
ETH	3.3	\$1,966.02	\$6,501
Solana	850	\$84.53	\$71,840
USDT / USDC	5,748	\$1.00	\$5,748

KTG (***)	26,500,000	Token CBI	Token CBI
CTS (****)	420,000,000	Token CBI	Token CBI
Total valuation (US\$)			\$7,908,072

(*) The price of Bitcoin and all other crypto assets is taken at the close of trading on February 31 2026

(**) Amounts invested in S21+, S21 XP, and S21 Hydro servers, net of disposals

(***) Projects in partnership with third parties - Only the CBI share is reflected in this table.

(****) i.e.: 100 million already allocated in full ownership to CBI; 320 million representing CBI's share in the balance of tokens not yet allocated

Disclaimers

The completion of CBI's projects, as well as their operating budget and financing plan, remain fundamentally subject to major uncertainties, and failure to achieve the underlying assumptions may have a material and adverse impact on the value of CBI's assets and liabilities. In addition, investing in crypto-assets involves risks related in particular to their intrinsic volatility that could have an impact on CBI's financial performance. CBI considers it useful to remember that the past performance of crypto-assets is not a guarantee of future performance. A detailed description of the risks associated with an investment in CBI securities can be found in the Company's financial reports available on CBI's website.

About CRYPTO BLOCKCHAIN INDUSTRIES SA

CRYPTO BLOCKCHAIN INDUSTRIES ("CBI") is a French company listed on Euronext Growth (compartment E2), whose objective is to build the largest possible portfolio of Bitcoins and other crypto-assets by purchasing them at a price below the market by applying the ACE: ACQUIRE strategy, the purchase mainly of Bitcoins on the market; CREATE, the creation of its own utility tokens in the fields of mining and other sectors of CBI activity; EARN, the acquisition of bitcoins at reduced cost via mining operations, as part of a long-term strategic partnership with Blockchain Solutions, one of the first Bitcoin miners in the United States.
