

Press release

Amoéba announces the publication of its Universal Registration Document 2025

Chassieu (France), 18 March 2026 – 6 p.m. - Amoéba (FR0011051598 - ALMIB), an industrial greentech specialized in the development of natural microbiological solutions based on the patented use of amoebae, announces that it has made available to the public and filed with the French Financial Markets Authority (Autorité des Marchés Financiers (AMF)) today its 2025 Universal Registration Document, under number D.26-0108.

The Universal Registration Document 2025, for the financial year ending 31 December 2025, includes in particular:

- The 2025 annual financial report, consisting of the consolidated financial statements, the annual financial statements, the management report and the related statutory auditors' reports;
- The report on corporate governance drawn up by the Board of Directors.

The Universal Registration Document 2025 can be consulted on the company's website at the following address <https://amoeba-nature.com/> in the "Investor" / "Financial documents" / "2025 Universal Registration Document" section.

About Amoéba:

Founded in 2010, Amoéba is a green tech company based in Chassieu (Lyon, France) that aims to become a major player in microbiological risk treatment through the patented use of amoebae in the plant protection and cosmetics sectors.

With unique expertise protected by numerous patents, Amoéba is currently the only company authorised to use the *Willaertia amoeba* industrially for biocontrol and cosmetic applications. To the Company's knowledge, it is also the only company capable of producing it on an industrial scale in volumes compatible with commercial applications, in order to offer a viable alternative to the chemical products widely used today.

Amoéba is currently focusing on the global biocontrol market for plant protection and the cosmetics market. As the marketing of plant protection products is subject to obtaining local regulatory approvals, the Company has taken the necessary regulatory steps and submitted applications for approval in Europe and the United States. The active substance has already been approved in the United States in 2022 and received a positive and final report from the EFSA in Europe. Product registration was obtained in 2025 for the United States and is expected in 2026 in France and then in other targeted European countries.

The cosmetic application does not require prior approval from a competent authority in Europe or the United States. The cosmetic ingredient is already listed on the INCI (International Nomenclature of Cosmetic Ingredients) list, paving the way for its commercialisation worldwide, except in China, where local approval is required.

Amoéba is listed on Euronext Growth (ALMIB). The company is a member of the Bpifrance Excellence network and is eligible for the PEA-PME scheme. For more information, visit www.amoeba-nature.com.
