EDF Energies Nouvelles commissions 26 MW in the United Kingdom

EDF Energies Nouvelles has announced the commissioning of the Bicker wind farm in the Fenlands. This new 26 MW wind farm is the sixth project completed by the Group in this region of north-east England.

The Bicker wind farm in Lincolnshire comprises 13 wind turbines, each with 2 MW in unit capacity. They were supplied by German manufacturer REpower.

Complementing the Glassmoor, Deeping, Red House, Red Tile and Walkway wind farms already in service, this new project represents the latest phase of the construction programme comprising over 100 MW in the Fenlands that was launched in 2005.

The Bicker wind farm is owned equally by EDF Energies Nouvelles and EDF Energy via EDF Energy Renewables. This joint venture was set up in June 2008 to fulfil their joint ambitions in green electricity generation in the United Kingdom.

Including the Bicker wind farm, EDF Energies Nouvelles and EDF Energy now own a combined total of 147.4 MW in service in the United Kingdom (123.2 MW owned by EDF Energies Nouvelles and 24.2 MW by EDF Energy).

About EDF Energies Nouvelles

With operations in nine European countries and in the United States, EDF Energies Nouvelles is a market leader in renewable energies. With a development focused on wind energy for several years and more recently on solar photovoltaic, now a second priority avenue of development, the Group is also present in other segments of the renewable energies market: small hydro, biomass, biofuel and biogas. In addition, the Group is expanding its presence in the distributed renewable energies sector in partnership with EDF.

EDF Energies Nouvelles is a 50 %-owned subsidiary of the EDF Group. Since November 2006, EDF Energies Nouvelles is listed in Euronext Paris, code "EEN", ISIN code: FR0010400143).
