

### ***BioAlliance Pharma reacquires the rights to Loramyc® in Europe***

Paris, February 27, 2009 – BioAlliance Pharma SA (Euronext Paris: BIO), the specialty pharmaceutical company focused on the treatment of opportunistic infections in cancer and AIDS, today announced the termination of the licensing agreement signed in 2007 with SpeBio (a joint venture with SpePharm). The exclusive license in European Union countries other than France covered the distribution of Loramyc®, a muco-adhesive buccal tablet for treating in oropharyngeal candidiasis, a type of infected mucositis, in immunodepressed patients.

Today, BioAlliance Pharma has initiated legal proceedings in Paris against SpeBio for violation of the latter's contractual obligations and in order to obtain appropriate compensation for losses suffered as a result of delays in commercialization and sale of Loramyc®.

BioAlliance Pharma is confident in ensuring the continued Europe-wide commercialization of Loramyc® directly in selected countries and through specialist oncology partners in other countries.

*«Loramyc® has been a clear success in France during its first year on sale and we believe in the product's potential in markets throughout Europe»,* stated Dominique Costantini, President and CEO of BioAlliance.

## **About BioAlliance Pharma**

As a preferred partner for hospital-based specialists, BioAlliance Pharma is a specialty biopharmaceutical company which develops and markets innovative products, especially in the fields of opportunistic infections and chemotherapy complications. In areas where medical needs are insufficiently met, our targeted approaches help overcome drug resistance and improve patient health & quality of life. BioAlliance Pharma's ambition is to become a leading European player in these fields by coupling innovation to patient needs.
