EDF Energies Nouvelles commissions the Arnprior solar plant in Canada

EDF EN Canada, the Canadian subsidiary of EDF Energies Nouvelles, announces the commissioning of the 23.4 MWp Arnprior Solar plant in Ontario. It represents the first achievement of the Group in Canada.

This ground mount solar plant consists of more than 300,000 thin-film solar panels, provided by manufacturer First Solar. This facility has been developed on two adjacent properties as part of the Ontario's Renewable Energy Standard Offer Program, and benefit from a feed-in tariff for twenty years. The electricity generated will provide local electricity service via the Hydro One distribution grid.

This first achievement of EDF Energies Nouvelles in Canada lies within the Group's strategy to expand its photovoltaic business in Europe and in North America.

About EDF Energies Nouvelles

With operations in Europe and North America, EDF Energies Nouvelles is a market leader in green electricity production. With a development focused on wind energy for several years and more recently on solar photovoltaic, the Group is also present in other segments of the renewable energies market: small hydro, marine energy, biomass, biofuel and biogas. In addition, the Group is expanding in the distributed renewable energies sector. EDF Energies Nouvelles, 50 %-owned by the EDF Group, is listed in Euronext Paris since November 2006 (code "EEN", ISIN code: FR0010400143).
