PSA Peugeot Citroën to launch precautionary recall on selected range of Peugeot 107s & Citroën C1s

Toyota has announced a recall campaign on 8 of its models in Europe to solve a potential accelerator pedal issue.

PSA Peugeot Citroën has decided, in line with its stringent quality policy, to launch a similar programme for a selected range of Peugeot 107s and Citroën C1s which are produced in cooperation with Toyota in a shared plant.

This precautionary recall concerns less than 10% of Peugeot 107s and Citroën C1s in circulation in Europe, ie 97 000 vehicles.

Customers concerned will shortly receive written notification.
