EDF Energies Nouvelles signs a new power purchase agreement in the United States

EDF Energies Nouvelles announces it has signed a 20-year power purchase agreement (PPA) with Pacific Gas and Electric Company (PG&E). This agreement, for a capacity of up to 100MW, is related to the electricity generation of the Shiloh III wind facility to be built in California.

Located in Solano County, California, the Shiloh III wind farm will reach a capacity of 60 to 100 MW and will be developed, built and owned by enXco, the US subsidiary of EDF Energies Nouvelles.

This project follows on the 150 MW Shiloh II wind facility, which has been commissioned in 2009 and which benefits from a PPA with PG&E as well.

The PPA related to the Shiloh III wind project is subject to the approval of the California Public Utilities Commission (CPUC).

The signature of this new contract, which follows on the recent Lakefield (Minnesota, 201 MW) and Pacific Wind (California, 140 MW) PPA announcements, illustrates continued momentum of EDF Energies Nouvelles' activities in the US.

About EDF Energies Nouvelles

With operations in Europe and North America, EDF Energies Nouvelles is a market leader in green electricity production. With a development focused on wind energy for several years and more recently on solar photovoltaic, the Group is also present in other segments of the renewable energies market: small hydro, marine energy, biomass, biofuel and biogas. In addition, the Group is expanding in the distributed renewable energies sector.

EDF Energies Nouvelles, 50 %-owned by the EDF Group, is listed in Euronext Paris since November 2006 (code "EEN", ISIN code: FR0010400143).
