

Faiveley Transport wins a contract with Bombardier to equip Swiss intercity trains with air conditioning units and couplers

Bombardier has awarded Faiveley Transport with a large contract to equip 59 long distance regional trains (436 cars) with automatic and semi-permanent couplers and sophisticated air conditioning units.

This is the largest order that Faiveley Transport has received for a couplers application and confirms the reliability and compact design of these products.

The air conditioning application includes both cab and saloon units equipped with specific pressure protection systems.

Delivery of prototypes will begin in December 2011 followed by series production in 2014-2019.

Faiveley Transport confirms its commitment to further developing its presence in the Swiss market, following its recent acquisition of Urs Dolder, a heating specialist for the railway industry.

FAIVELEY TRANSPORT, A WORLD LEADER IN THE RAIL INDUSTRY

About Faiveley Transport

Faiveley Transport, a specialist player in the global market for high-tech components for rail systems, is extending its range of products across seven business lines: air conditioning, power information & control, passenger access systems, platform screen doors, braking, couplers and customer service.

Boasting the most comprehensive range of equipment and services in the market, Faiveley Transport's mission is to supply the railway industry, operators and rail maintenance organizations the world over.

As a supplier, the Faiveley Transport Group comprehensively covers the value chain, from design to production, marketing and services.

Faiveley Transport is a provider of high value-added services combined with excellent levels of quality and safety to guarantee customers the highest levels of product availability.

Faiveley Transport stands out from its competitors by its flexibility, reliability and capacity to innovate.
