Alstom signs €150 million Long-Term Service Agreement for Lumut Power Plant in Malaysia

Alstom has signed a 11-year Long Term Service Agreement (LTSA) worth approximately €150 million, with Teknik Janakuasa Sdn. Bhd. (TJSB), the wholly owned O&M subsidiary company of Malakoff Corporation Berhad, Malaysia's largest independent power producer (IPP).

The LTSA covers all nine GT13E2 Gas Turbines and the scope includes the supply of new hot gas path components and provision of reconditioning services for all major inspections over the term of the contract. The Lumut power plant is located in Segari in the state of Perak, west of the Peninsula Malaysia. It consists of three combined-cycle blocks each equipped with three GT 13E2 units running on natural gas with oil as back-up fuel. With a total electricity output of 1943 MW, it is the largest GT13E2-based combined cycle power plant worldwide.

This contract follows an earlier 7-year service agreement with TJSB for the Lumut plant, which has been in operation since 2004. *"The extension of the service contract at Lumut reflects TJSB's confidence in Alstom's support and our successful performance. The well proven cooperation between TJSB and Alstom will ensure continued safe operation and high availability of the Lumut power plant,"* remarked Hans-Peter Meer, Senior Vice President, Alstom Thermal Services.

About Alstom

Alstom is a global leader in the world of power generation, power transmission and rail infrastructure and sets the benchmark for innovative and environmentally friendly technologies. Alstom builds the fastest train and the highest capacity automated metro in the world, provides turnkey integrated power plant solutions and associated services for a wide variety of energy sources, including hydro, nuclear, gas, coal and wind, and it offers a wide range of solutions for power transmission, with a focus on smart grids. The Group employs 92,000 people in around 100 countries, and had sales of € 20.9 billion in 2010/11.
