
PRESS RELEASE

AREVA to manufacture 32 steam generators for EDF

Paris, September 28, 2011

Following its international call for bids launched in 2010, EDF today selected AREVA to supply 32 of the 44 steam generators to be installed in France's 1300 MW power plants. The future order will be worth around 1.1 billion euros.

This decision confirms AREVA's position as a reference supplier for the world's leading nuclear power company.

According to the schedule drawn up by EDF, 16 steam generators are to be delivered in July 2016, eight in January 2017 and a further eight in January 2018. AREVA has already secured the necessary supplies and manufacturing capability at its Chalon Saint Marcel and Le Creusot plants.

Reacting to the announcement, Luc Oursel, CEO of AREVA declared: *"AREVA put its best efforts into meeting EDF's requirements. I am delighted with this exceptional order which testifies to EDF's confidence in our ability to honor our commitments in a particularly short space of time. This decision from our long-standing customer and partner recognizes in our view the quality of our offer which is built first and foremost on France's industrial excellence"*.

MORE ABOUT

AREVA supplies solutions for power generation with less carbon. Its expertise and unwavering insistence on safety, security, transparency and ethics are setting the standard, and its responsible development is anchored in a process of continuous improvement.

Ranked first in the global nuclear power industry, AREVA's unique integrated offering to utilities covers every stage of the fuel cycle, nuclear reactor design and construction, and related services. The group is also expanding in renewable energies – wind, solar, bioenergies, hydrogen and storage – to be one of the top three in this sector worldwide in 2012.

With these two major offers, AREVA's 48,000 employees are helping to supply ever safer, cleaner and more economical energy to the greatest number of people.
