Licences (representing almost 37% of revenue) grew by a total of over 20% with respect to the 3rd quarter of 2010, which had been particularly strong. Maintenance revenue (over 38% of total revenue) is in line with forecasts. Services revenue grew significantly, particularly in the United States.

Growth for the 3rd quarter was particularly strong in France and the USA, where some impressive new contracts have been signed. For the rest of Europe, the economic environment remains difficult, continuing the trend observed in the second quarter. However, clients' projects remain active and are expected to come to fruition in the final quarter of the year.

For the first 9 months of 2011, the group's performance has been good, with organic growth of 9.5%, a significant proportion of which is attributable to the Americas region. Cumulative licence growth reflects strong commercial activity since the beginning of 2011.
