

**XIRING will be attending
the CARTES & IDentification 2011 trade show**

Suresnes, France, November 8, 2011 – XIRING, a security solutions provider for electronic transactions, announces that it will be attending the CARTES & IDentification trade show that will be taking place from November 15 through 17, 2011, at the Parc des Expositions in Paris-Nord Villepinte. The company will be at the heart of e-Health and e-ID innovation and new technologies during this event.

This opportunity will allow XIRING to present its entire line of security solutions for e-Health and e-ID systems, which are strategic markets in which the company has a solid foothold in France and is developing a presence internationally. In addition, following its success at the MILIPOL exhibition, XIRING will present its portable terminal for checking secure ID documents that provides performance as well as being light and compact.

XIRING will be showing its Witeo solution, specifically designed for the authentication of healthcare professionals in hospitals, with original ergonomics. Witeo is an innovative combination of several technologies created to meet the needs of users who are mobile within an establishment, while meeting security requirements. It includes a wireless cardholder and a base connected to a workstation. The Witeo solution is compatible with the CPSv3 French healthcare-professional card and can be adapted to any comparable environment, particularly European hospitals setting up e-medical records.

XIRING's booth will be located in Hall 4, row J31, at the Paris-Nord Villepinte Parc des Expositions (France). The trade show will take place from 9:30 am to 6:30 pm on November 15, 16 and 17 (closing at 5 pm on November 17). For more information: www.cartes.com.

About XIRING

XIRING, a security solutions provider for electronic transactions, develops security software embedded in smart card readers and terminals for strong authentication and electronic signatures. XIRING is the market leader in SESAM-Vitale healthcare terminals for generating and signing electronic medical claim forms or for updating healthcare cards in France and also works alongside authorities in the field of healthcare system dematerialization in international markets. In the area of electronic identity (e-ID), XIRING proposes a broad range of solutions for public authority staff and citizens to meet the latest market challenges with secure electronic identity document systems: electronic national identity cards, electronic passports, public transport cards and professional cards. XIRING is listed on the Alternext compartment of the NYSE-Euronext Paris stock exchange. For further information: www.xiring.com
