A contract worth around €90 million

Alstom to supply steam turbine generator unit for a 650 MW power plant located near Suez, Egypt

Alstom has secured an order worth approximately €90 million from the East Delta Electricity Production Co. (EDEPC Inc.) for the supply of equipment for a 650 MW steam cycle thermal power plant at a site located in the vicinity of Suez city, 150 km east of Cairo, Egypt. The plant will directly provide electricity to more than half million people residing in the Suez city district and will also be connected to the National Grid. It will be commissioned in 2015.

The scope of the contract includes engineering, manufacturing, erection and commissioning of the steam turbine and generator including auxiliaries like the condenser and the delivery of spare parts.

EDEPC provides electricity for the eastern part of the country from areas like the Mediterranean city of Damietta until Egypt's southern border with Sudan. Alstom has previously supplied equipment to EDEPC for their Damietta combined cycle and the Attaka steam power plant projects.

Alstom's total installed base in Egypt is approximately 4.5 GW having supplied its power generation equipment to projects such as the Abu Quir, El Tebbin and Sidi Krir steam power plants and Cairo North, Nubaria III, Kureimat and Talkha gas-fired plants.

About Alstom

Alstom is a global leader in the world of power generation, power transmission and rail infrastructure and sets the benchmark for innovative and environmentally friendly technologies. Alstom builds the fastest train and the highest capacity automated metro in the world, provides turnkey integrated power plant solutions and associated services for a wide variety of energy sources, including hydro, nuclear, gas, coal and wind, and it offers a wide range of solutions for power transmission, with a focus on smart grids. The Group employs 92,000 people in around 100 countries. It had sales of €20 billion and booked close to €22 billion in orders in 2011/12.
