

NEW SUCCESS FOR INTRASENSE

Intrasense inks a global OEM agreement with IMAGE Information Systems

Paris (France), November 12, 2013: Intrasense, a global leader in multimodal medical imaging software, announces a global OEM agreement with the German company IMAGE Information System, a global player in PACS.

The strategic agreement sets the framework for integrating Intrasense's Myrian® platform into IMAGE's PACS offering, resulting in a new offering named IQ-VIEW PRO 4D. The solution features advanced visualization tools for multimodal image processing and will be proposed to IMAGE's clients. It answers the need for state-of-the-art imaging workstations seamlessly integrated within the PACS and combines 3D image reconstruction tools, 4D analysis functions and advanced clinical modules. It is aimed at helping radiologist perform accurate diagnosis and follow-up pathologies such as cancer and chronic diseases.

Patrick Mayette, Intrasense CEO notes: *"With the modularity of Myrian® and its advanced clinical modules, IQ-VIEW PRO 4D provides an affordable and scalable solution to hospitals and medical imaging centers of any size. The solution will be proposed to the installed base and the new customers of IMAGE. Its seamless integration in IMAGE's offering provides their customers with a solution that combines a powerful PACS with advanced imaging applications in one packaged solution."*

The two companies' partnership stems from of a shared vision and their global market presence. Each is known for their customer-centric approach and has received numerous certifications and awards for their products. IMAGE's customers can now benefit from a solution that combines the state-of-the-art technologies and the expertise of both companies.

"This partnership enables Intrasense to leverage its market presence not only in Germany and throughout Europe but also in the United States, where IMAGE has a strong foothold, and in the rest of the World," adds Patrick Mayette.

Dr. Arpad Bischof, Managing Director of IMAGE, says: *"This is a special combination of company values and synergies to create a powerful PACS with world-class reading & post-processing solution. With Intrasense, we have found the perfect partner to meet the ever-growing demands of today's medical imaging market."*

About IMAGE Information Systems:

IMAGE Information Systems (IMAGE) is an international group with offices in the United States and Europe specializing in complete, easy-to-use and affordable solutions for medical imaging. IMAGE has installations of their user-friendly RIS or PACS at more than 5000 user sites worldwide. In addition to their PACS and RIS, IMAGE develops and provides an integrated nuclear medicine solutions as well as high-quality medical display solutions. IMAGE has a special expertise in the field of teleradiology, medical interfaces and optimal integration of digital solutions into medical processes.
