

PRESS RELEASE

AREVA signed a contract with the South Korean utility KHNP for the replacement of six stators

Paris, April 14, 2014

AREVA has been awarded a contract by Korea Hydro & Nuclear Power (KHNP), subsidiary of the Korea Electric Power Corporation (KEPCO) for the supply and the replacement of six stators for the Kori Nuclear Power Plant Units 3 and 4.

These components insure the reliability of the reactor coolant pump which is a fundamental element for the safe and efficient operation of the reactor's primary circuit.

AREVA will design and manufacture the six stators in the facility located at Jeumont, in Northern France. The delivery and replacement operations are expected to begin in June 2015 and finish in 2018.

This contract is part of the "Forward Alliance" program offers products and solutions developed by AREVA to support utilities in the optimisation of the long term safety of their plants.

"AREVA offers to KHNP a large range of solutions for the safety and the modernisation of nuclear reactors. This contract reinforces AREVA's position in the fast growing South Korean market." said Philippe Samama, executive vice-president of AREVA's Installed Base Business Division.

MORE ABOUT AREVA

AREVA is a world leader in nuclear power. The group's offer to utilities covers every stage of the nuclear fuel cycle, reactor design and construction, and operating services. Its expertise and uncompromising dedication to safety make it a leading industry player.

AREVA also invests in renewable energies to develop, via partnerships, high technology solutions.

Through the complementary nature of nuclear and renewables, AREVA's 45,000 employees contribute to building tomorrow's energy model: supplying the greatest number of people with energy that is safer and with less CO₂.
