About Pixium Vision (www.pixium-vision.com, @PixiumVision)

Pixium Vision is developing innovative Vision Restoration Systems (VRS) that aim to significantly improve the independence, mobility and quality of life of patients who have lost their sight. Pixium Vision's VRS are composed of various high-tech elements, associated with a surgical intervention as well as a rehabilitation period. These systems aim to ultimately provide blind patients with vision approaching that of a normal healthy eye.

Clinical trials are currently underway with the VRS IRIS[®] in several centers in Europe. Patients have tolerated their implants well so far and improvements in visual perception have been observed. The results of these studies will be used to apply for CE mark. Commercialization of IRIS[®] is expected to begin in 2015.

Pixium Vision is also developing PRIMA, a sub retinal implant currently in preclinical trial. The Company plans to begin clinical trials of PRIMA in Europe in 2016.

Pixium Vision is listed on Euronext (Compartment C) in Paris.
