AREVA Awarded Contract for Integrated Outage Services at Five U.S. Nuclear Power Facilities

Paris, July 15, 2015

AREVA has been awarded a three-year, multi-million dollar contract to perform outage and maintenance activities for five nuclear power facilities throughout the United States.

Beginning in 2016, AREVA will provide integrated outage services for two boiling water and six pressurized water reactors. This contract includes inspection and maintenance services for the reactor vessel and vessel internals as well as the steam generators and reactor coolant pump motor refurbishments.

This contract represents another success for AREVA's "Forward Alliance" program, which enables customers to combine a variety of advanced products and services into an integrated plan to meet their unique requirements.

"This new agreement is testimony to AREVA's expertise in providing services for all types of nuclear reactors, even when it is not the original equipment manufacturer," said Philippe Samama, Senior Executive Vice President, Reactors & Services Business Group.
