About **ESI**

ESI is a world-leading provider of Virtual Prototyping software and services with a strong foundation in the physics of materials and Virtual Manufacturing.

Founded over 40 years ago, **ESI** has developed a unique proficiency in helping industrial manufacturers replace physical prototypes by virtually replicating the fabrication, assembly and testing of products in different environments. **Virtual Prototyping** enables **ESI**'s clients to evaluate the performance of their product and the consequences of its manufacturing history, under normal or accidental conditions. By benefiting from this information early in the process, enterprises know whether a product can be built, and whether it will meet its performance and certification objectives, before any physical prototype is built. To enable customer innovation, **ESI**'s solutions integrate the latest technologies in high performance computing and immersive Virtual Reality, allowing companies to bring products to life before they even exist.

Today, **ESI**'s customer base spans nearly every industry sector. The company employs more than 1,000 high-level specialists worldwide to address the needs of customers in more than 40 countries.

ESI is listed in compartment C of NYSE Euronext Paris and is granted "Entreprise Innovante" (Innovative Company) certification since 2000 by Bpifrance. **ESI** is eligible for inclusion in FCPI (venture capital trusts dedicated to innovation) and PEA PME.
