

Technip certified Global Top Employer for the second consecutive year

Technip has been certified as a Top Employer Global 2016 for the second year in a row. The Global certification is a recognition launched last year for the first time by the Top Employers Institute. Out of the eight global organizations rewarded this year, Technip remains the only company of the energy sector. This independent certification underlines the quality and consistency of Technip's human resources (HR) practices and policies around the globe. It also recognizes that the company strives to improve continuously its global employment practices.

The Top Employers Institute is a specialist in the field of international research into HR management and working conditions. Its certification program comprises a comprehensive analysis of organizations' HR environment, through the examination of 600 HR practices. The organizations examined were assessed based on several criteria covering all HR aspects, from talent strategy, learning and development, career management to compensation and benefits, or culture.

This year again, Technip has also been certified as a Top Employer in 24 single countries - Australia, Brazil, China, Colombia, France, Germany, India, Indonesia, Italy, Malaysia, Mexico, Norway, Portugal, Qatar, Russia, Singapore, Spain, Thailand, the Netherlands, United Arab Emirates, United Kingdom, United States, Venezuela and Vietnam - as well as in three regions: Asia Pacific, Europe and Latin America.

Thierry Parmentier, Technip's Group Human Resources Director, commented: *"This is now 6 years that Technip has been recognized as a Top Employer in various countries and regions, and the second time in a row that our company gets the global recognition. This is positive evidence that despite the challenging context we are facing, we continue to make every effort to take our people further by implementing and applying ambitious HR policies and practices everywhere we operate and by offering our employees professional development and international opportunities, regardless of their gender, origin or cultural background."*

Top Employers Institute's CEO, David Plink, stated: *"Since 2011, Technip has demonstrated their commitment to stand out as an employer of choice across all the regions they are active in. On top of that, the company is part of the very select group of employers recognized as Top Employer Global for 2015 and 2016. This exclusive worldwide certification underlines the excellence of Technip's employee value proposition across the globe."*
