

Paris – 9 March 2016

**Crédipar launches Interparc Connect Management,  
a new fleet management solution for professionals**

**Crédipar**, the financial partner of the PSA Peugeot Citroën Group, launched **Interparc Connect Management**, a **connected mobility solution for professional clients**, on 15 February 2016.

Designed as a telematic fleet management system, **Interparc Connect Management** is a one-stop solution for retrieval of data from the on-board computers of connected vehicles. In addition to information relating to long-term lease financing contracts, notably excess use alerts, amendments, vehicle renewals, servicing and maintenance, **Interparc Connect Management** can upload reliable vehicle-related data, notably real-time mileage, excess mileage alerts, fuel consumption, CO<sub>2</sub> emissions and geolocation.

**Interparc Connect Management** relies on a telematic box fitted as standard on most Peugeot and Citroën passenger cars and on Business trim versions of the DS: "Connect SOS" for Peugeot and "Connect Box" for Citroën and DS. Non-Business trim cars can be fitted with an optional box, included in the PSA Peugeot Citroën product list and available from Peugeot, Citroën and DS dealerships. The box can also be fitted as an option to a client's entire vehicle fleet, regardless of the brand.

Professional clients who take out a Crédipar long-term leasing contract at a Peugeot, Citroën or DS dealership are eligible to sign up for **Interparc Connect Management**, available with three option packages:

- Package 1: fleet management to determine real mileage and fuel consumption, maintenance scheduling and automatic mechanical alerts, allowing each vehicle in the fleet to be monitored individually (€9.50 excl. VAT per month and per vehicle).
- Package 2: Package 1 + an eco-driving option to reduce the company's fuel bills and carbon footprint through an eco-driving facility that includes driving behaviour reports and personalised tips for each user (€10.50 excl. VAT per month and per vehicle).
- Package 3: Package 2 + geolocation technology with several features, e.g. optimised journey management, indication of proximity to a client-determined point of interest. An "incognito" mode is also available (€11.50 excl. VAT per month and per vehicle).

These options expand the Interparc offering for Crédipar clients.

The **benefits** for companies include **lower fleet management costs, time-saving, reliable data reporting and optimised fleet management**.

Sales teams from Automobiles Peugeot, Automobiles Citroën and DS will be attending the Flottes Automobiles trade show on 10 March 2016 to present **Interparc Connect Management** to clients.
